NEW-YORK TRIBUNE.

Trial of Prof. John W. Webster.

[From our Own Correspondent.]

To the Editor of The Tribune:

BOSTON, Wednesday Night, March 20.

Not till to-day has the trial of Prof. Webster presented anything of much dramatic or legal interest. Since the Doctors were called to the stand to-day, we have had rather a rich time of it. They are not as a profession famous for good agreement, and so it appears thus far in this case. They disagree on two points, whether the perforation in the side of the thorax under the left nipple was made by a knife or not, and whether Dr. Parkman, supposing the remains found at the Medical College to have been his, were cut up with any anatomical skill. Drs. Lewis Gay, Stone and Strong have testified that the dissection of those remains did betoken a good degree of skill or experience in *post mortem* examinations. But Dr. Ainsworth, the Anatomical Demonstrator of the Medical College says, they were cut up by a bungler, who could never have taken a knife in hand before for such a purpose. The Doctors who signed the document in regard to the *post mortem* examination of the remains, say there were no marks of a knife in the perforature in the side, but Dr. Woodbridge Strong saw the mark of a very keen knife on the rib next to the perforation. This Dr. Woodbridge Strong, by the way, is one of those providential cases made to relieve the dullness of Supreme Courts. Taciturnity is perhaps the most profitable gift of the medical profession, but it is not his. He is a man of considerable perceptive powers and abundance of language. When called to the stand, therefore, his right hand went up with alacrity, and he poured forth a full torrent of medical and anatomical information, prefacing it with a medical auto-biography, which from my unfortunate position I did not hear distinctly. I gathered from its tone and accent that Dr. Strong came from the land of cakes, or somewhere about the sea, and while a stranger in Boston got little practice, but much leisure to gratify an innate penchant for cutting up subjects. On one occasion the Marshal gave him a *prize*, which was quite a prize. But the man was fat and flashy, and the weather warm, and after cutting a while it was quite desirable to get rid of the subject. He had a large old fashioned fire-place, where he one night made a rousing fire, in order to burn up the fragments. He kept feeding them on as fast as they would burn, all night long, and into the morning, and yet daylight found pieces still scattered about the floor. He concluded it was not an easy matter to burn up a body. It required a fire of wood, and a good deal of it.

Dr. Strong enlightened the Court and Jury with several ingenious dissertations on Anatomy and Physiology, which had not the slightest particular application to the case in hand. He was once the family physician of Dr. Parkman; knew him well; had a keen perception of forms; was always observing in the street whether this man had one shoulder higher than another, or the woman had a curved spine. Dr. Parkman's body was remarkable for being very straight up and down, made to parallel lines, and such was the character of the body found. It answered to Dr. Parkman's in all particulars, and he seemed strongly inclined to recognize it as such.

The Government have thus far, I believe, examined fourteen witnesses, and have seventy-two men to examine, of whom at least eight are medical men. The counsel for the prisoner are rather lame in cross-examination, do not show their hand, and seem to rely rather on the weakness of the Government than their own strength. What explanation they can give of the horrible circumstance of such remains found in such a place at such a time, no mortal can conceive till he knows. The Government certainly has, in a legal point of view, thus far, a singularly weak case for such mysterious horrors as gather around the prisoner.—That man has seemed rather more cheerful during the day, but it is easy to see that his cheerfulness is an artificial drapery around a being not very poetic or sentimental anyhow. Yours W.

The Water-Cure and Its Rationale.

To the Editor of The New-York Tribune:

SIR: Some three years since I wrote several articles, setting forth the value of the *Cold Water-Cure*, which, at the time, were extensively circulated. As it afterwards appeared that many persons were thus induced to resort to establishments of this description, there has been a consequent feeling of *responsibility* in this matter, in regard to all or any who may have been, or are likely to be, influenced by opinions so expressed

During the intervening periods, I have enjoyed great opportunities by reading, inquiry and experience, to test still farther this mode of medical treatment; and as it is possible that the results thus obtained may be made of service to the public health, it is with this hope that the following article has been prepared.

Respectfully, C. E. BEECHER.

THE COLD WATER CURE.

The following are the general principles which it is believed *experience* has established in regard to the use of cold water as a remedial agent:

First, That for the *preservation* of health the use of cold water in general ablutions is imperative and as a general rule is safe for all, though there are exceptions even to this rule. But the *cure of disease* demands a peculiar and *scientific* use of water, study, skill and experience the same as is needful in the use of drug medicines, so that medical men who have not read and experimented in this branch of medical treatment, are not qualified to judge of its merits, or to adopt any of its methods in their practice, till they have at least read the standard works on this subject. And not unfrequently it happens that the ordinary mode of employing water as a remedial agent, is contrary to the rules of experience obtained in Hydropathic treatment, and seriously hurtful. The use of the *shower bath*, now so common, needs to be regulated by *rules* which are not generally understood, and for this reason it is frequently a cause of mischief, especially for nervous persons and to the young.

Second: The success of the Hydropathic treatment demands a physician who is not only scientific and experienced, so as to be able to detect the true nature of the disease, but one who is careful and attentive in observing the effects of his prescriptions. The writer believes that in large establishments, unless regulated with express reference to this point, the patients are very likely to suffer from neglect, so that if they are not injured, their recovery is greatly retarded, or entirely prevented.

Third: Another scarcely less important requisition is *intelligent* nursing. If a physician is ever so well qualified to prescribe, all his skill may fail if the nursing department is delegated entirely to ignorant and heedless persons. The writer has known such frequent and such serious suffering and wrong from neglect in this particular, that no language can be too strong in warning the sick to inquire and observe in regard to this matter, before commencing a course of Hydopathic treatment—The carrying out of the physician's prescriptions should always be superintended by the physician himself, or by some intelligent, well-educated person, who has a knowledge, either by reading or observation, of the various indications that occur in the treatment, and which ought to be made known to the physician *as soon as they occur*. It is believed that the failure of *very many* to obtain relief from disease, has been owing to neglect in this department. An intelligent superintendent of the nursing department is needed in every large establishment, not only to observe and report the results of the nursing, but to secure faithfulness in those who perform the details of the drudgery. It should also be the duty of this person to secure a faithful obedience to all the *laws of health*, in regard to ventilation, clothing, diet, exercise and sleep. Inasmuch as a part of the success of the water-cure depends on obedience to these rules, care and faithfulness in this respect is of great value.

Fourth: It is believed that the purity of the water has far more influence than has been supposed both in the rapidity and the *certainty* of a cure, especially in those diseases in which unhealthful humors and abnormal secretions are to be discharged from the system. The writer has seen results in an establishment where the water was peculiarly pure, which altogether exceeded anything she ever observed or heard of in institutions which could not command this important item.

Fifth: It is important that the public should understand that there are *two schools* in the Hydropathic world, one of them following what is called the *heroic* treatment, of which PRESSNITZ is the exemplar; the other adopts a more moderate method, and the German author, FRANKE, is probably the fairest exponent of this school. The writer is fully satisfied, both from her own observation and from the testimony of others, that in *this country* the more moderate system is not only the safest but the most efficacious. The heroic treatment originated among the hardy, phlegmatic German race, and both the system and the German physicians who administer it, are not appropriate to the more delicate, nervous and highly excitable temperament of our countrymen, and especially of our country*women*.

FIRE AT THE TREMONT HOUSE.—A few moments before 12 o'clock this forenoon, smoke was discovered issuing from the roof on the south wing of the Tremont House, and it was soon discovered that one of the chambers under the attic was on fire. An alarm was given, and the department were immediately on hand. Two lines of hose from the Cochituate hydrants were taken in at the front door, and several others from the south and private entrance.—While this was being effected the fire had made such headway as to reach the roof, which was extensively on fire, but was soon checked by the immense floods of water thrown into the building. The loss by fire will be considerable, while that by water will be very heavy, as a great number of the rooms on the south side were deluged with water before the furniture could be removed. The origin of the fire we could not ascertain.

The fire is supposed to have originated from a defect in the flue; and having penetrated under the roof and down on the sides, between the plastering and the outer wall, it baffled for a long time all efforts to reach it with the hose. The fire was confined to the southerly wing and west of the main entrance of the building. Before the alarm became at all general, Marshal Tolley was in the vestibule with a number of his trusty officers, scrutinizing the crowd, which passed, and keeping out thieves. The loss will fall heavily on Messrs. Tucker & Parker, the proprietors, not only in the loss of and delay in business, but in valuable and costly furniture, which has been ruined by fire and water. It is said there is no insurance on the House. The loss is estimated between $8,000 and $7,000.

[Boston Transcript, Thursday.

WHEAT BRAN AS A FERTILIZER.—This has been tried by several persons in Delaware with great success. It is said that a handfull to the hill will double the corn crop. Care must be taken to cover the bran before dropping the corn, or the fermentation will kill the seed if in direct contact with the bran. It is said to be equally valuable upon wheat. The matter is worth experimenting upon. It is hoped that those who try it will give us the details, for the benefit of our readers. [American Agriculturist.

A CHOP AT THE GALLOWS TREE.—The Senate of Ohio has passed a bill to abolish the Punishment of Death by the following decisive vote:

AYES.—Messrs. Beaver, Beeson, Blake, Broadwell, Chase, Cunningham, Dimmock, Dobbs, Ferguson, Hendricks, Howard, Lawrence, Lewis, Sailer, Simpson, Swift, Vinal and Wilson—15.

NOES.—Messrs. Blackmon, Burns, Conklin, Dennison, Eckley, Harlan, Horton, Myers, Olds, Patterson, Payne and Speaker—12.

It is not yet clear of the House.

THE SCIENTIFIC CONVENTION.—The sittings of the "American Association for the Advancement of Science" closed at Charleston on the night of Saturday, 16th inst. The occasion is spoken of as one of high gratification to all the parties concerned. The proceedings were of an instructive and interesting character, and although the session was but half the usual length, a large amount of scientific knowledge was obtained from the results of the experiments and investigations undertaken, within the last six months, by the distinguished Professors who take part in those Conventions.

—The Corporation of Charleston, with a commendable liberality, claimed the privilege, through their Mayor, Mr. Hutchinson, of assuming all expense attendant upon the meeting of the Association.

RECIPROCITY IN NOVA-SCOTIA.—We notice that in the Nova-Scotian Assembly a series of resolutions has been introduced by the Attorney-General, to authorize the Lieutenant-Governor, through the Governor-General, to treat with the American Government for reciprocity of trade, and, if necessary, to negotiate with the American Government for the right of free fishery upon the shores of Nova-Scotia. The resolutions were received favorably.

FIRE.—The old stone factory at Olneyville, R. I. belonging to the estate of Samuel W. Greene, was destroyed by fire yesterday afternoon at 6 o'clock. It was occupied by Benjamin R. Almy for making cotton batting. Mr. Almy's loss is $4,500, on which there is insurance for $2,400. It is supposed the fire caught from the stove.

TO TAILORS AND TAILORESSES.—Pantaloons vest, and sack coat hands wanted, at 231 Broadway. m1 tf WM. T. JENNINGS & CO.

$5,000.—Wanted a special partner with the above or a larger amount, in a respectable regular business, liable to very small risks, and paying a handsome profit; the party now engaged in it has intended a considerable sum and has given only a part of his time to the matter. The business having proved very satisfactory, yielding as he is able to show, a clear profit of 25 per cent, he is desirous of devoting his whole attention to it, and in order to do so will require about the amount above mentioned. Address Box 2,196 Post Office with real name. m21 3t*

BOARDING.

BOARD IN SOUTH BROOKLYN.—Two gentlemen can be accommodated with breakfast and tea, with dinner on Sundays, in a respectable private family, where they can enjoy the comforts of a home. The location is healthy, open and elegant, less than ten minutes' walk from the Ferry. Address "Ferry," box 1,299 Post Office. m22 3t*

BOARD—On 1st of May and after, pleasant rooms in a desirable location in Spring-st. between Broadway and Mercer-st. can be obtained by two or three single gentlemen, with partial board, or by a gentleman and his wife, with full board. Satisfactory references given and required Address L. O. N. Tribune Office. m20 1w*

BOARD.—A house wanted in a pleasant and healthy location, near town, the rent to be taken out in board, and accommodate a few genteel boarders. She has sufficient furniture for a three-story house. Can give good references. A note directed to R. E. Tribune Office, will be attended to m12 1m*

BOARD—Two or three single gentlemen can obtain pleasant rooms with board, at 19 Lindlow-place (Houston-st.) corner of Macdougal-st m22 3t*

MUSIC.—A well educated young gentleman from Europe, who is a Professor of the Piano-forte, wishes to obtain board in a genteel American family, either in the city or Brooklyn, for which he would give instruction on the above instrument. Also, a few pupils wanted. Terms $15 per quarter—three lessons weekly. Address Teacher at this office. Satisfactory references given if required m19 1w*

COUNTRY.—Families who wish to engage board for the Summer months, can be accommodated with pleasant rooms and good board, at the private mansion, on the Bloomingdale road, Eighty-sixth st. There is no situation on the island surpassed by this, as far as beauty of scenery, and healthful location are concerned. The mansion being on an elevated spot on the banks of the Hudson River. Stages pass the premises every 15 minutes. By the 15th of April the house will be in complete order to receive boarders. m13 2aw1w*

A PRIVATE FAMILY residing in the vicinity of McDougal and Prince sts. would like to take one or two gentlemen and their wives, and a few single gentlemen to board. House richly furnished, and supplied with bath-room, hot and cold water, and every convenience adapted to make an agreeable and pleasant home. A line addressed to Comfort, Tribune office, will meet with prompt attention. m29 2t*

ROOMS FOR GENTLEMEN—Two floors to let, unfurnished; possession given May 1. The location is near Broadway, and on a stage route. Breakfast and tea if desired. Apply at 17 Amity-st. before 9½ A.M. or from 4 to 5 P.M. m22 3t*

PLEASANT FURNISHED ROOMS to let with breakfast and tea at 7 Park-place. m21 1w*

PRIVATE BOARD, 490 GREENWICH ST. near Beach-st. m18 1m*

A GENTLEMAN CAN FIND a quiet study or sleeping room at 96 Twelfth-st near Fifth-av. m14 1m*

BOOK TRADE.

WASHING MADE EASY, OR

HOW TO WASH CLOTHES WITHOUT MACHINES, WASHBOARDS OR POUNDING BARRELS.

SEND ME ONE DOLLAR, free of postage, and I will send you, by mail, a printed circular giving plain directions for washing clothes that will enable one person to do all the washing of a large family before breakfast, thus avoiding all the confusion of a washing day. This method requires no machines, washboards or pounding barrels—no turpentine, no camphene or other offensive article—no rubbing the skin off your fingers—no tearing off buttons and wearing out clothes. This plan saves the clothes, makes them whiter, and never injures the finest fabric. The articles need cost but a few cents for a large washing, and can be obtained anywhere.

The Circular also contains directions for Clear Starching, Ironing Laces, Washing and Cleaning Silks, Kid Gloves, Removing Stains, Grease Spots, Mildew from Linen, Raising the nap of Velvet, &c. &c.

These are the greatest chemical discoveries of the age. All the hotels, steamers and large laundry establishments use my method of washing.

To avoid imitations and counterfeits, be sure to direct your letter to Madame BEAVELET, Patent Laundress, 4 Ann-st. 2d floor, New-York, postage paid. m9 3eTuThaSa

TO LANDLORDS AND TENANTS.—A new form of agreement to let houses, the very best yet published, is this day issued by the subscribers, containing, among other provisions a covenant for the tenant to pay the annual rent or charge for the Croton water assessed by the Corporation of the City of New-York. MEDICINES.

DR. S. P. TOWNSEND'S COMPOUND EXTRACT

SARSAPARILLA.

The most celebrated Medicine of the age.

1,500,000 BOTTLES

Manufactured Yearly.

Warranted to keep for any length of time in all climates.

AND IS A SOVEREIGN REMEDY for all diseases of the BLOOD.

Also—Ulcers, Erysipelas, Salt Rheum, Pimples on the Face, Scald Head, Tetter, Neuralgia, Chronic Rheumatism, Dyspepsia, Coughs, Colds, General Debility, &c. &c. &c.

The compounding of this wonderful medicine is under the immediate supervision of

Prof. JAMES R. CHILTON, Chemist,

of this city, who is well known for his superior medical attainments, as well as one of the most eminent analytical chemists of the present day.

The resources of the most refined modern science, and the most consummate skill of art, are thus secured to direct the preparation, and place it beyond the suspicions which very naturally attaches to the ten thousand nostrums that are fabricated by ignorant and knavish charlatans.

Dr. Chilton's name is surety that the elements of this Extract are combined in the most correct and scientific manner, and that it is adapted to the wants of the invalid, with the highest professional skill.

This we hope will be sufficient guarantee to the public, and to those purchasing Dr. S. P. Townsend's Compound Extract of Sarsaparilla. Such may have no fear of getting one of the spurious and baneful mixtures which fill the channels of trade, and are connected without any knowledge either of the nature of remedial agents, or the wants of the human system when labouring under disease. The following is a copy of Dr. Chilton's certificate, which will in future be found on the outside wrapper, in addition to the splendid steel plate label.

This is to certify, that the Compound Extract of Sarsaparilla contained in this bottle, is prepared according to the formula and superviision of Dr. S. P. Townsend's recipe of Dr. S. P. Townsend, and that it is composed of ingredients purely vegetable, and without mercury.

JAMES R. CHILTON, M. D. Chemist.

$1,000 REWARD!

☞ Some patent medicines, the men, who are envious of the immense success of Dr. S. P. Townsend's Sarsaparilla, have said that he published fictitious certificates. Dr. Townsend will pay any of these men $1,000 for such fictitious certificate they can produce.

This medicine has cured more diseases that "Such is life" than any other ever offered to the public.

Hardly a day passes without our receiving a large number of certificates, showing the extraordinary effects of Dr S. P. Townsend's Extract of Sarsaparilla in curing different diseases. Read the following wonderful cure of

RHEUMATISM AND ENLARGEMENT OF THE JOINTS.

NEW-YORK, 26 March, 1850.

Thirty-fifth-st. near Ninth-av.

Dr. S. P. TOWNSEND—Dear Sir: I have been very severely afflicted for four or five years with Rheumatism and enlargement of the joints, having been unable to sleep or rest. I had tried numerous remedies without relief, but since I have used your Sarsaparilla, I am most happy to say that it has almost cured me; and you may publish this, so that others may receive the benefit of such valuable medicine. Yours with respect, MRS SCOLARI

DYSENTERY.

This distressing disease is a deranged condition of the visceral organs. Whether resulting from contagion, improper diet, change of climate, or from any other cause, Dr. S. P. Townsend's Compound Extract of Sarsaparilla is demonstrated to be the most efficacious and potential remedy ever yet discovered.

JACKSON, Mich. Dec. 15, 1849.

MR. H. G. ELLIS—*Dear Sir*: I was taken sick on the 7th August, 1848, with a relax, or dysentery, and did not recover so that I could perform manual labor, until February, 1849. I employed the best physicians, one after another, but none of them could effect a cure. I began to think I never should recover—when a friend told me that he had used Dr. S. P. Townsend's Sarsaparilla with the best of success,
