TUESDAY, June 10—P.M.

The Stock market opened high this morning, but fell off afterward and closed dull. The quotations are generally about the same as yesterday. A large amount of Reading has been taken over to Boston within a few days by the clique, and the anticipation is general that the shorts are not yet out. The whole amount of stock is 82,000 shares, of which there are held permanently in England 21,000, Boston about 6,500, Philadelphia 7,800, New-York 10,000, leaving 36,700 shares to be operated in by the bulls and bears of Philadelphia, New-York and Boston. Of this amount the Boston interest is reported to hold in cash stock and on contracts some 25,000 shares. In view of the amount of stock afloat the transactions for the last two or three weeks have been enormous. Long Island was heavy under the action of the Board of Aldermen of Brooklyn, who have passed the ordinance prohibiting the use of steam in Atlantic-st. Generally the sound stocks were firm and in fair request. Delaware and Hudson sold at 120, dividend off. Norwich was buoyant. Erie sold at yesterday's prices without much activity. At the Second Board the market was heavy and the business moderate.

Exchanges are quiet but firm. The supply is moderate. Sterling, 10⅞@10¾. Francs, 5.10@5.07½.

Freights have a downward tendency. Engagements 15,000 bushels Corn, 4½d.; 500 bbls Flour, 15d.; Cotton, 5-32d.; Dead-weight, 12s 6d.; 500 Oars and Handspikes at 1d ⅌ foot and 1½d each. To Glasgow, 5,000 bush Corn, 5½d. To Havre the market is dull.

There is an active demand for Money, but the supply continues sufficient. On call the rates are 5@6 ⅌ cent. with occasional loans on Government and State stocks at 4@4½ ⅌ cent. First-class paper is in small supply and sells readily at 5@6 ⅌ cent.

The receipts at the Sub-Treasury are $75,195; Payments, $32,312; Balance, $2,561,506.

An election of nine Directors of the Farmers' Trust Company took place to-day, at which the following gentlemen were elected. The ticket is new, with the exception of Mr. Coit—Robert Schuyler, Gouverneur Morris, Daniel Drew, Eli Kelly, Isaac Newton, Elisha Peck, Solomon B Stone, Israel Randolph, Henry A. Coit.

There is very little doing with wholesale Dry Goods houses. The little activity there is is mostly for the clothing trade, who are buying materials for their Fall demand. Lawns continue the only article which is in great demand, and which are selling ahead of the supply at full and buoyant prices. Some Cotton Goods have been shipped to the East Indies, including both Drills and brown and bleached Shirtings and Sheetings. There has been little other demand for these articles. Shirtings and Sheetings are in large stock and heavy. Drills are in light supply and firm. Osnaburghs are without change.—Denims are dull and prices nominally the same.—Stripes and Tucks are inactive. Clothiers are buying Cotton Flannels to a small extent. Prices are steady. Printing Cloths are in moderate demand and drooping in price. Prints are declining rapidly with few sales. Ginghams are steady. Cotton Pantaloonery is in some request at steady prices. De Laines are quiet—all interest is absorbed in the forth-coming supplies for the Fall season, which are expected to be very large. Cloths are active as regards heavy goods suitable for Fall and Winter clothing, and prices are more steady. Cassimeres are quiet and heavy. Satinets are moderately inquired for at old prices. Sheeps Greys are in good stock with a steady but limited demand. Prices are firm. Flannels and Blankets are quiet. Linseys are without change. The auction sales are drawing to a close for the season. The offerings are much less, and the demand is very languid. In Foreign Goods, Lawns, Fancy Silks, Summer Shawls and Vestings are in most demand, but at low prices. The importations are light. The advices of goods coming are also of small quantities, and we learn from one or two buyers who have already returned from Europe by the Baltic, that the prospect is of very limited importations this Fall. Goods on the Continent and in Great Britain can be bought at a much lower cost, yet there is very little disposition to buy speculatively compared to last season. In France there is a falling off in activity among the manufacturers simultaneously with a decline in price. There is very little doing there or in Great Britain at present for this market. The activity of Manchester is confined to the supply of the East India and the German demand, both of which are good. Silk and Wool in Europe are on the decline, and the course of prices is uncertain, which deters early orders for our markets. In Domestics we can look for little prosperity to our manufacturers until Wool and Cotton settle down to regular and moderate prices. At present there is too much uncertainty. Goods will not advance. Wool is full 10 and near 15 per cent. too high even at the present reduced prices compared to those ruling six weeks ago.

The *Rochester Democrat* says: "An adjourned meeting of the Directors of the Genesee Valley Company, will be held at Avon, on Saturday, at 10 o'clock. It is understood that the route will then be determined upon, the necessary survey having been completed. It is supposed that from this city the line will be upon the east side of the River to Geneseo, and from thence either to Dansville, or to some point near Nunda, intersecting the Attica and Hornellsville road, and connecting with the Erie road at or near Hobbieville, Allegany Co.

The *Courier* this morning says "Our exports of specie for the last eight days amount to $5,000,000," whereas they have been only $2,000,000. In the last ten days they have only reached about $3,000,000.

By reducing the Wheat to Flour, the quantity of the latter left at tide-water this year, compared with the corresponding period of last year, shows an increase of 401,283 bbls of Flour.

The following table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to the 7th of June, inclusive, during the years 1849, 38 days; 1850, 46 days; 1851, 53 days.

The business on the Wabash and Erie Canal in Indiana during the month of May, was interrupted for several days by the rise in the Western waters, notwithstanding which the receipts from tolls exceeded those of the same month last year. The receipts for sales of land continue to increase, and add materially to the funds of the Trustees for the completion of the canal. The receipts from tolls in

May, amounted to	$17,507 25
For same month, 1850	16,921 00
	$676 25
The land receipts for May, were	$15,143 08
For May, 1850	9,235 27
Increase (about 61½ ⅌ cent	$5,907 81

The cash receipts for sales of land during the 6 months ending June 1, were $104,591 16
During 6 months ending June 1, 1850, were 44,587 58
Increase (133 ⅌ cent.) $59,912 58

The earnings of the Rutland and Burlington Railroad for the month of May, 1851, were $25,039 62
In the same month last year 13,443 12
Increase (90 ⅌ cent.) $11,597 50

A new Bank has been located at Freehold, N. J.

The Manchester and Lawrence Railroad Company have declared a semi-annual dividend of 3 ⅌ cent. to holders on the 8th of May....The Concord Railroad Company has declared a semi-annual dividend of 3 ⅌ cent., payable to holders on the 7th....The Boston and Maine Railroad Company have declared a dividend of 3½ ⅌ cent. for the last 6 mos.

At Boston the Money market is easy at 6@8 ⅌ cent.

At Philadelphia the market is also easy at legal rates.

The Baltimore and Susquehannah Railroad is doing a steadily increasing business.

The project of the Hamburg and Erie Railroad is being urged on the attention of that part of the country interested, and a meeting has been held at Warren, Pa., at which strong resolutions were passed in favor of a Road from Pittsburgh to Olean, on the New-York and Erie Railroad, along the valley of the Allegheny. A resolution was passed to open the books of subscription.

At a meeting of the stockholders of the Plainfield Railroad Corporation, the amendments to the charter, authorizing a union with the Hartford Company, were accepted; and a vote was passed, authorizing the Directors to form a union upon such terms and conditions as they might deem best for the interests of the stockholders.

The Attica *Atlas*, referring to the Buffalo and New-York City Railroad, formerly Attica and Hornellsville, says "Books were recently opened at Warsaw for subscriptions to the increased stock for extending the road to Buffalo, and $41,000 were taken. The engineers and surveyors are now at work locating the line from Attica westward. Arrangements are being made for subscriptions to the balance of the stock; and the road will probably be all under contract by the 1st of July, and finished through to Buffalo by the 1st of January next." Commencing at Attica, the road passes through the towns of Alexander and Bethany, in Genesee county, Middlebury, Warsaw, Gainesville, Castile and Genesee Falls, in Wyoming; Portage and Nunda, in Livingston, Grove and Burns in Allegany, to Hornellsville. It is 58¼ miles in length, and has an average grade of 45 feet to the mile. The road crosses the Genesee river less than half a mile below the village of Portage, at right angles—there being straight lines on both sides.

The business on the Mississipri and Milwaukee Railroad, both passengers and freight, is steadily and rapidly increasing. The increase for April over March was about 33½ per cent., and for May over April not less than 42 per cent.

From a list in the *Boston Advertiser* of thirteen Railroads and their branches in Massachusetts, with 238 miles of double track, 375½ of single, costing in the whole $33,810,689, it appears that more than half the companies paid dividends in 1850, from the net profits of the year, 8 ⅌ cent.; and the average dividend on the whole exceeded 7 ⅌ cent., each having retained a greater or less reserve. While in England, the past year, no company paid more than 5 ⅌ cent., with the exception of four, which paid respectively £7 14s ⅌ cent., 6 ⅌ cent., 5½ ⅌ cent. and 5½ ⅌ cent. Six other companies paid 3 ⅌ cent., several from 1 to 3, and a number nothing. The Great Western, with a capital of nearly £14,000,000, 264 miles long, paid 4 ⅌ cent.; the London and South-Western, capital £8,390,000, 4 ⅌ cent.; the South-Eastern and Greenwich, capital £9,460,000, 3½ ⅌ cent.; the Midland and Bristol, 196 miles, capital £15,540,000, 2½ ⅌ cent.; the Lancashire and Yorkshire, 260 miles, capital £11,488,000, 2 ⅌ cent.

We annex a statement of the exports from this port from the 31st of May to the 7th June:
