NEW-YORK TRIBUNE.

MASSACHUSETTS.

FUGITIVE SLAVE LAW.—On the trial of Brown, the colored lawyer, at Boston, on Monday the following preliminary questions were put to each juryman, on appearing to be sworn in the cause:

First: Have you expressed or formed any opinion relative to the matter now to be tried.

Second: Are you sensible of any prejudice or bias therein?

Third: Have you formed an opinion that the law of the United States, known as the Fugitive Slave Law of 1850, is unconstitutional, so that you cannot convict a person indicted under it for that reason, if the facts alleged in the indictment are proved, and the Court hold the statute to be constitutional?

Fourth: Do you hold any opinion upon the subject of the Fugitive Slave Law, so called, which will induce you to refuse to convict a person indicted under it, if the facts set forth in the indictment and constituting the offense are proved against him, and the Court direct you that the law is constitutional?

Six jurors were found who could not conscientiously perform this simple duty imposed by the Constitution and laws of the United States.

One of the jurors sworn, a man from Charlestown, had expressed opinions averse to the Fugitive Slave law, and was opposed to it, but thought it would not prevent him from rendering a true verdict on the evidence, and was sworn.

The following named persons were empanneled as the Jury: Stephen Kendall, of Groton, Foreman; Lewis Coleman, of Boston; James Robinson, of Brookline; Consider Stockwell, of Plainfield; John Cuttle, of Westford; Horace Smith, of Hadley; Wm. R. Gay, of Dedham; Isaac Lothrop, of Charlestown; Samuel G. Wardwell, of do.; Caleb Rider, of Plymouth; Marcus S. Round, of Taunton; Nathan Jenkins, of Barnstable.

The indictment was then read, charging Morris with aiding in the rescue of Shadrach on the 15th of February last, from the lawful custody of Charles Devins, Jr., U. S. Marshal, &c., and a plea of not guilty was entered.

When the prisoner was arraigned the Court adjourned to Tuesday morning.

GREAT SPEED OF THE S. S. LEWIS.—As much as was expected from this steamer, every one appears surprised at her speed. Were it not for the accident to her propeller she would have reached Liverpool in 10½ days, being within 24 hours steaming of that port when the accident took place. She has surpassed in speed all propellers heretofore built for the Atlantic.

TUESDAY, Nov. 4—P.M.

The Stock market was heavy to-day under the apprehension of large corn shipments this week, and the fancies show a decline with considerable sales. At the Second Board the downward tendency continued, but in some cases the market was firmer at the close, as in Norwich and Sussex Mining, but there was no animation. Governments were in moderate demand, and weaker. We notice a sale of Virginia Coupon Sixes at 106½, which is an improvement. As 2 per cent. interest has accrued, this price is equal to 104½, which makes them the cheapest State Sixes on the list. The Constitution of Virginia, which has just been adopted, forbids the giving of any further guarantees of the State for Internal Improvement Companies and provides that a Sinking Fund of 1 per cent. per annum on the amount of State debt shall be raised by taxation, for the purpose of absorbing the debt. Government Coupon Sixes of about the same maturity as Virginia's, are selling at 122.

In Exchanges there has been a large business done for the steamer, and the market is firm at 10@10¼ for leading bills. At 10¼ bankers who pay no commissions on the other side can make 1 @1 ⅝ cent. on the shipment of coin. Francs are $5.16¼@ $5.13¼. The supply of bills is moderate.

Freights are quiet and rather heavy. Engagements, Flour 12d. 10,000 bush. Wheat 5½d, ship to bag it. Cotton ⅛d. Dead weight 12s. 6d. @15s. Cheese 20s. To London the packets are full at 2s. for Naval Stores, 1s. 9d. for Flour, 30s. for Cheese, 25s. for dead weight. The Germania for Havre, which ship has been put on for the 8th, has 1,000 bales Cotton at ⅛c., Ashes $4, Rice $6. The Havre steamer has Cotton at ⅛c. and 350 boxes India Rubber goods at $12 ⅌ tun. There are some dead freight offering, but vessels are scarce. To Southern ports the markets are dull. To California there is a moderate business at 45c. @ 60c. per foot.

The receipts of the Hudson River Railroad for October were $60,453 25, showing a large gain on September.

The steamer of to-morrow has a million engaged, and the Collins boat on Saturday three hundred thousand. A portion of the engagements may be counteranded, and, in any count it must be remembered that it is the shipment of two weeks, and still leaves us over a million of the amount received by the Cherokee, which amount the Ohio and Prometheus will probably increase to nearly two millions. The specie brokers estimate that the Cherokee had fully two and a half millions on board. In connection with these shipments, it may be well to study the annexed Mint statement of the operations of that establishment since January.

The total coinage of gold from January to October inclusive, amounts to $40,657,522:

	Gold.	Silver.	3 cts	Copper.	Total.

The exports of coin, gold and silver, have in the meantime been about thirty-three millions, leaving an excess of eight millions of coinage.

The amount received at the Sub-Treasury was $63,272. Paid, $236,634. Balance, $3,493,538, included in the payments was a transfer draft for $200,000.

We gave yesterday the Imports and Exports at this port for October, showing an increase in the former and a decrease in the latter, as compared with October of last year. We now insert the aggregate Imports and Exports of the year, compared with last year, not including the Imports of Specie.

Increase				$21,694,174

As the comparative imports of Dry Goods for the ten months show a variation of only about $50,000, it follows the above excess of $11,940,829 is in other articles. The following table will show the exports of specie for the ten months:

January	$1,266,981	June	$6,462,357
February	1,067,680	July	6,004,170
March	2,368,861	August	2,653,444

May	4,566,135	October	1,770,707
Total			$33,020,978

The People's Fire Insurance Company has declared a semi-annual dividend of 5 ⅌ cent.

There was a more active demand for Money to-day, but the supply offering on call was large, and loans were negotiated with facility at 6@ 7 ⅌ cent. on good securities. There is a good inquiry for first-class paper, and there is but a small quantity in the market. It goes at 6@10 ⅌ cent. mostly 7@8 ⅌ cent. Second-class goes at 12@18 ⅌ cent. The Banks are discounting to considerable extent.

The demand for Dry Goods continues to abate as the season advances, yet the transactions, especially in Shawls, De Laines and Sheeps Gray Cloths, have been large in private trade, and at auction Stuff and other French Goods. Buyers limit their purchases to present wants. The demand is mostly for the East and North. Woolens are very dull but firm. Cotton Staples are steady with a very limited demand. Brown Sheetings and Shirtings are light in stock and well sustained in price. Bleached Goods are less firm, with an accumulating stock and little inquiry. Drills are in dull demand, but are steady in price. Osnaburgs are firm, but with a slight demand. Denims are quiet. Stripes and Ticks are scarcely moving. Canton Flannels are active at steady prices. Printing Cloths are very inactive and prices are nominal. The extending consumption of De Laines has caused a reduced production of Prints. Prints are not so active as they have been, but good qualities are still in demand. Good Madders are wanted and are firm. Ginghams are in good demand for the season and in reference to the diminished supply, there is no stock of any amount, and prices are without change. De Laines continue the most active article on the market; the demand has not abated and many sales are making ahead of arrival. Cloths are quiet with a small stock; prices have reached about the lowest and are firm. The Woolen Jobbers are buying all that they can find below the general current prices, which is but small. Cassimeres are less active, both fancies, plain and blacks, but the demand is sufficient to keep up prices. Satinets are dull. Tweeds and Jeans are inactive. Sheeps Grays are in active demand. Linseys are dull at 12½@13½, which are low figures. Fannels are active of prime qualities. Blankets are dull but steady. The auction sales of French Goods are numerous but prices are not buoyant, as the supply is larger than the demand, though that is active. The principal sale of the week was one of British Stuff Goods, which, in the present state of the market, realized good prices and an advance over previous sales. Silks and Merinos have sold low, but Ribbons and Shawls at a slight improvement for good styles. The trade in Continental Goods is almost confined to the Auction Room, which is crowded. There seems no disposition to withhold French Goods, whatever may be the market, as the expected troubles in France during 1852 are deemed likely to be such as will lead to a large importation next year, not in reference to cost and profit, but in reference to placing them securely. It is deemed both the French and English markets will be crowded with French goods. There is little doing in British Goods. The clothiers are buying to a small extent. The stock of Messrs. F. S. & D. Lathrop & Co. was sold at auction on Friday last, and the goods, which were very miscellaneous, characteristic of the general jobbing trade, brought fair prices. The sale attracted considerable attention.

The Ohio and Pennsylvania Railroad is completed 38 miles from Pittsburgh, and the grading and bridging is nearly finished to Massillon, a distance of 110 miles. Four gangs, comprising 400 men, are now laying the track between Brighton and Alliance, to which point the Road is expected to be finished by the 15th of December, and to Massillon by the middle of January. At Alliance it intersects the Cleveland and Pittsburgh Road, which will open a direct Railroad communication between Pittsburgh and Cleveland.
