Professional Notices.

DENTISTRY.—Our attention has recently been called to the very superior manner of inserting Artificial Teeth by Dr REED, of No. 208 3d av., which in all respects surpass any thing we have ever seen. He brings to the practice of his profession the nice observation of years, a thorough medical education, assiduous attention to the mechanical arrangement and adaptation of Artificial Teeth. We are sure that a few more examples of thorough education for the practice of the profession, such as Dr REED has secured, will do much to send adrift the vast army of pretenders and quacks who now torture and fleece humanity. Yet people are to be found who will allow them to afflict and disfigure the mouths of their wives and daughters with perfect indifference. We trust, however, none who read this article will hereafter suffer themselves to be duped by ignorant pretenders, with high-sounding titles, while gentlemen (who modestly keep silent) of education, superior skill and taste, are in the midst of us.

DRS. NAPOLEON PRETERRE & S. LOUNSBERY, Dentists, have removed their office from No. 333 Broadway to No. 383 Broadway, between White and Walker-sts., where they will continue the practice of their profession in all its various branches.

New-York, March 3, 1852. HORACE H. DAY.
[Certificate.]—This may certify that I have, after many years' experience, made thorough trial of the different articles of Elastic or Gore for Congress Boots, attempted to be introduced as a substitute for HORACE H. DAY'S Webbing or Elastic Gore. And I freely state that the article made by Mr. Day is altogether he best and cheapest, in my opinion, and I cheerfully recommend the same to my friends.
WINSLOW L. WHITING,
Manufacturer of Ladies' Congress Boots,
No. 435 Broadway, New-York.
[Legal Opinions.]—I have examined the Letters Patent issued to Dupont and Hyatt, bearing date the 20th October, 1840, and am of opinion that the use of Elastic Gores, made by weaving fibrous materials which expand and contract, in combination with India Rubber Springs, if applied in the manufacture of Gaiter Boots, is an infringement upon the Patent.—New-York, April 28, 1851. F. B. CUTTING.

WHITE ZINC PAINT,
After thorough test in Europe and the United States, has been found to retain its beauty and protective qualities longer than any other paint. For whiteness and brilliancy it is unrivaled; it is free from all poisonous properties so common and dangerous in other pigments; will cover—equal weight—from 40 to 100 per cent. more space than lead, and is, therefore, much cheaper to the consumer. As an inside paint, it will not turn yellow, even when exposed to the sulphurous gases of coal fires or the foul air of ships. Their White Zinc ground in varnish produces the porcelain finish. Their
BROWN AND BLACK ZINC PAINTS
in a few hours form a hard and solid metallic coating upon wood brick iron and other metallic surfaces, and are remarkable for their fire-proof properties. They are specially adapted for marine purposes, having been found to resist the corroding action of salt water, so destructive to other paints. Dealers supplied on liberal terms by

Medical.

GREAT MEDICAL DISCOVERY—A. B. L. MYERS' COMPOUND EXTRACT ROCK ROSE.—This medicine may truly be called one of the most valuable discoveries of the age. The amount of human suffering it has already relieved would appear almost incredible, were it not substantiated by undoubted testimony. The success of the Rock Rose has exceeded the most sanguine expectations of its boldest advocates. It cures the scrofula, that direful disease, which for so long a time has baffled the most skillful medical men. By purifying the blood and cleansing the stomach, it also cures the dyspepsia, liver complaint, bilious disease, erysipelas, salt rheum, and all cutaneous diseases, as well as sickheadache and general debility. Its virtue has been fully tested and it has proved itself worthy of implicit confidence, both for its sanative and alleviating properties. Its efficacy depends upon its attacking the cause and not effects of the disease.
An old and influential member of the medical profession recently said that the Rock Rose possessed far more alterative properties than the popular Sarsaparilla. Another testifies that the virtues of the plant have been to much neglected.
Health is one of the greatest blessings that man can possess; and who, among the afflicted, would not give a few dollars to obtain an article that will insure health! All persons labering under the above diseases are requested to try Myers' Rock Rose.

A WONDERFUL CURE.—LANCASTER, October 9, 1850.—Mr. ROBACK—*Dear Sir:* This is to inform you that since I made use of your wonderful composition and medicine lower I am perfectly cured of the inflammation in my eye, a headache and disordered stomach. I have been in this situation for ten months; I made use of everything I could hear or think of; I applied to several of the most eminent doctors, all of no use. I am happy to say that my stomach has become so strong that it retains any victuals that I please to eat. Any one wishing more particulars can call on me at my residence, in East King-st., at the Eastern Hotel, City of Lancaster, Pa. Be so kind as to answer this as soon as convenient.
I remain your affectionate friend, JOHN A. LANDIS.

Another Scientific Wonder.
GREAT CURE for DYSPEPSIA—Dr HOUGHTON'S PEPSIN—The true DIGESTIVE FLUID, or GASTRIC JUICE, prepared from Rennet, or the fourth Stomach of the Ox, after directions of Baron Liebig, the great Physiological Chemist, by J. S. HOUGHTON, M.D. Philadelphia, Pa. This is a truly wonderful remedy for Indigestion, Dyspepsia, Jaundice, Liver Complaint, Constipation and Debility, curing, after Nature's own method, by Nature's own agent, the Gastric Juice. Half a teaspoonful of Pepsin, infused in water, will digest or dissolve five pounds of roast beef in about two hours, out of the stomach.
Scientific Evidence—Baron Liebig, in his celebrated work on Animal Chemistry, says: "An artificial Digestive Fluid, analogous to the Gastric Juice, may be readily prepared from the mucous membrane of the stomach of the Ox, in which various articles of food, as meat and eggs, will be softened, changed and digested, just in the same manner as they would be in the human stomach."
Call on the Agent and get a descriptive Circular, gratis, giving a large amount of scientific evidence, similar to the above, together with reports of remarkable cures from all parts of the United States. To be had, wholesale and retail, at No. 267 Broadway.
