many of whom have fled to the city, is too well known to recapitulate.

Experience, which should teach us, clearly points to the necessity of removing the whole Quarantine establishment much farther from the city, and entirely out of the bay and harbor of New York—say at Sandy Hook.

Remember, we are not yet out of August, and not out of danger by any means. If we escape this time it may be owing to the extreme cool weather which has prevailed this month. With the vast and increasing commerce of this city, bringing this pest to our very doors, how can we expect to escape destruction unless we provide immediately for a more suitable place for a lazaretto?

Charcoal and the Yellow Fever.

TO THE EDITOR OF THE HERALD.

By giving insertion to the accompanying article, recently cut from an old newspaper, you will possibly communicate a fact worthy of attention. B.

REMEDY FOR THE YELLOW FEVER.—A correspondent writes:—A few years ago I fell in company with a very intelligent captain of a merchant ship, who had made many voyages to the West Indies and also to the coast of Africa, and he informed me that as an antidote to the fevers prevailing in those climates, he always took with him a large bottle of pulverized charcoal, of which he gave his crew a teaspoonful three times a day, as a glass of water, and he never lost a man by the yellow fever, though other ships were daily losing their men. Should any one have faith to try this, with good effects, I hope it may be published to the world.—*English Paper.*
