335 EMPIRE 335
SEWING MACHINE.
PATENTED FEBRUARY 14, 1860.
SALESROOM NO. 335 BROADWAY.
This machine is constructed on an entirely new principle of mechanism. It possesses many rare and valuable improvements, has been examined by the most profound experts, and pronounced to be a simplicity and perfection combined.
The following are the principal objections urged against sewing machines:—
1st. Excessive fatigue to the operator.
2d. Liability to get out of order.
3d. Expense, trouble and loss of time in repairing.
4th. Incapacity to sew every description of material.
5th. Disagreeable noise while in operation.
THE EMPIRE SEWING MACHINE
IS EXEMPT FROM ALL THESE OBJECTIONS.
It has a straight needle, perpendicular motion, makes the lock on shuttle stitch, which will neither rip nor ravel, and is same as both sides; performs perfect sewing on every description of material, from leather to the finest Nainsook muslin, with cotton, linen or silk thread, from the coarsest to the finest number.
Having neither cam nor cog wheel, and the least possible friction, it runs as smooth as glass, and is
EMPHATICALLY A NOISELESS MACHINE.
It requires fifty per cent less power to drive it than any other Machine in market. A girl of twelve years of age can work it steadily, without fatigue or injury to health.
Its strength and wonderful simplicity of construction render it almost impossible to get out of order, and is guaranteed by the company to give entire satisfaction.
We respectfully invite all those who may desire to supply themselves with a superior article, to call and examine this unrivaled Machine.
But in a more emphatic manner do we solicit the patronage of
