NESBITT & Co. for the alacrity and generous disposition manifested in acceding to our simple request in advancing our wages beyond the established scale of prices.

The following is a copy of their reply:

MARCH 22, 1853.

GENTLEMEN: We take pleasure in acceding to your respectful request for an advance of wages. We are entirely convinced of the correctness of your statements, in relation to high rents and the advance in price of all the necessities of life. We are also pleased to have this opportunity to express our appreciation of your services, and trust you will ever regard the advancement of the interests of the establishment as tending to promote your individual interests.

Thanking you for your courtesy, we are, Gentlemen, with great respect, yours truly, GEORGE F. NESBITT & Co.

☞ **South Williamsburgh.**—The Second Regular Meeting of the South Williamsburgh Village Association will be held on WEDNESDAY EVENING, March 23, at 7½ o'clock, at Thalian Hall, No. 492 Grand-st., near Willett.

The object for which this Association was organized is to enable its members, by combining their means, to purchase a plot of land, to be divided into building lots in such manner as to save to themselves the large amount of profits usually realized by speculators. The property selected by this Association is situated on the Williamsburgh and Cypress Hill Plank Road, at the junction of Cooper-av., and within 100 yards of Myrtle-av., which is to be opened immediately. Its advantages of position and beauty of location are unequaled. A line of stages communicates with the Ferry every fifteen minutes. Also, the Myrtle-av. line to Fulton Ferry, Brooklyn, will be extended through as soon as said avenue is opened. There are four cottage houses on the property, not worth less than $1,000, one of which each member will have an opportunity of obtaining. The cost to each member for a Lot will be $36, which includes surveying, grading, &c. Terms of admission, $5 at the time of joining, and $1 50 per week from the date of the organization. All such as desire to escape the ever increasing burden of taxation and high rent, are invited to attend the meeting and share the benefit of this Association.

Dr. E. H. KIMLARK, President.
B. W. WILSON, Secretary.

☞ **Peterseville Homestead Association.**—A number of persons, of small means, finding it impossible to pay the exorbitant rates now being asked for apartments and houses in this city, and believing such increase of Rents will continue for years to come, thereby compelling them to reside in small attic rooms, or damp basements in some low place in this city, endangering the lives of themselves and families, have secured a tract of land on the New-Haven Railroad, in the town of New-Rochelle, which they intend to lay out into village plots.

The land secured contains many of the most beautiful building sites in the State. The scenery is of the most romantic character—hill and dale—which must naturally insure the health and pleasure to those who settle there.

Upon this property are several Houses, Barns, &c., which, as they consider the moneyed man, in associations established for the benefit of workingmen, should not have a preponderating influence over the benefits to be derived from any improvements which may be on the property, they have determined shall not be offered for sale, but that each member shall have an equal chance to draw one of the houses without any extra charge whatever.

Due notice will be given of the time and place of the next regular meeting.

F. A. POTTER, President, No. 2 Hanover-st.
W. H. HOYT, Sec'y., No. 239 9th-av.

A PERIODICAL WORTHY of the AGE.—STRINGER & TOWNSEND, Publishers and Booksellers, No. 222 Broadway, corner Ann-st., New-York, desire to invite the attention of the public and the trade to the fact that by an arrangement with its publishers abroad, they will, early in April, commence the republication of the celebrated Glasgow PRACTICAL MECHANICS' JOURNAL.

It will appear simultaneously with its publication in Glasgow. The well known reputation of this greatest of the mechanical and scientific Magazines almost obviates the necessity of any description of its merits. It has long enjoyed the proud distinction of being the leading periodical of its kind in the world. The work is copiously embellished with designs, illustrative of the most recent discoveries in Science and Mechanics. Each number contains, in addition, from one to three large magnificent full sheet illustrations, on copper, explanative of its current text. Each number is a faithful pen and pencil reflex of the discoveries which have been made in Art, Sciences and Mechanics, since the issue which preceded it. This magnificent Periodical walks hand in hand, and step by step with Progress, in the broad avenues of Intelligence, Science and Mechanics. No written description can convey even a faint idea of its immeasurable superiority over every thing of its kind ever attempted. To be fairly appreciated, the work must be examined. The world's leading minds in Art, Science and Mechanics, are its principal contributors. Each monthly part contains an average of

Two large plate Engravings of Machinery, executed to an accurate scale from the working drawings of the first Engineers of the day.

From thirty to forty wood Engravings, illustrating the details of the plate Engravings, and all articles requiring illustration.

Practical Papers, explaining the minutia of various Arts.

Papers on the Physical Sciences.

Original Communications from Scientific Men, at home and abroad.

Illustrated Specifications of important Patents and Registered Designs.
