market, the rates ranging from 3 to 4 per cent, while in extreme cases even as much as 5 per cent is understood to have been paid for temporary accommodation. "Out of doors," also, the demand has been very brisk, and the market may be pronounced decidedly tight. Messrs. Overend Gurney, & Co. to-day raised their rate for money on call from 2¼ to 2½ per cent. It is further stated that some considerable amounts have been borrowed from the Bank of England at 3 per cent, on the deposit of Government Securities. It is probable that the demand for accommodation was aggravated by the final settlement of the share and foreign stock account, completed to-day.

The Times says: Money on the Stock Exchange is in less demand, and worth about 2½ ⅌ cent. Out of doors it still continues in demand; but there is no increase in the rates of interest on the part of private bankers and the large discount houses.

Notice has been issued that all exchequer bills, whether dated in June or March, may be converted into Exchequer Bonds, bearing 2½ ⅌ cent. interest from the 5th of June next until the 1st September, 1854, and 2½ ⅌ cent. thereafter until the 1st September, 1894, upon application being made on or before the 25th inst.

Notice has also been issued that the Exchequer bonds to be offered to the holders of the South Sea and other Annuities about to be paid off, as well as to the proprietors of Consols and Reduced, are to bear interest at the rate of 2½ per cent. until the 1st of September, 1854, when the Government are to have the power, if they shall see fit, to redeem them at par. The coupons are to be payable on the 1st of March and the 1st of September in each year.

The total amount of new stock accepted up to the latest date is as as follows:

£3 10s. per Cents	£23,708 8 0
£2 15s per Cents	1,223,142 0 5
Exchequer Bonds	4,900 0 0
Total	£1,252,750 8 5

The Bank of England statement shows the following results, when compared with the previous week:

Public deposits	£4,265,469—Increase	£331,107
Other deposits	12,991,614—Decrease	721,661
Rest	3,145,369—Increase	25,022

On the other side of the account—

Government securities	£15,221,382—The same as before.	
Other securities	13,668,166—Increase	£191,421
Notes unemployed	5,274,396—Decrease	413,015

The amount of notes in circulation is £23,464,845, being an increase of £345,290; and the stock of bullion in both departments is £18,925,221, showing a decrease of £129,373

The accounts of the Bank of France for the past month exhibit a considerable increase of bullion. The increase on the present occasion has been £562,000, while in the preceding month it was £508,000. During the period in which the bullion in the Bank of France has thus experienced a total augmentation of £1,070,000, the stocks in the Bank of England has undergone a reduction of almost precisely the same amount, caused by subscriptions to French undertakings, and by the importation of articles of produce to supply the heavy demands of our manufacturers. On the other hand, while, in consequence of the increased activity of trade, there has been a considerable pressure for discounts in England, the commercial bill's held by the Bank of France, which fell off £880,000 in April, now show a further reduction of £589,000.

In one of the London Police Courts, on the 7th inst., Gabriel San Garratt, a foreigner, was remanded on a charge of forgery to a large amount. From the evidence given, it appeared that he had obtained a letter of credit from Messrs Duncan, Sherman & Co., of this City for £810. On this he obtained from the Union Bank of London, their agent, at two several times, £70 in December last. It was charged that he subsequently altered this letter so as to represent the credit at £5 510, instead of the original sum, and obtained therefrom £2,560 from Messrs. Wilson and Co., of St Petersburg, and $500 from a firm in Berlin. It was intimated that there might be another charge of his obtaining a further sum of £800 from another party. The prisoner was remanded for a week

Money matters, at Philadelphia, have been working rather easier during the week. First class paper is readily negotiated at 7½@8 ⅌ cent., and for second class the range is from 9 to 12 ⅌ cent. At these rates the supply of capital is fully equal to the demand.

The Anthracite Coal trade last week was very active. The Lehigh increased its tunnage over the previous week about 30 ⅌ cent. It brought down, for the week ending on Saturday last, 36,145 tuns, and for the season 167,589 tuns. The Reading Railroad brought down, for the week ending on Thursday, 39,014 tuns, a slight falling off on the previous week's business. The Schuylkill Navigation brought down, for the week ending at the same time, 22,114 tuns, making a total tunnage for the season of 193,385 tuns. The tunnage of the three lines, by the last weekly report, is 89,173 tuns. There is a fair demand for coal, and prices are well maintained.

The Ledger says: For several days there have been reports on the street of very heavy loss, perhaps failure, sustained by one or two houses, from an attempt to control the market for clover-seed. The price of the article was run up from about $4 50 to $7 ⅌ bushel; the price is now down to about the starting point, and the loss of the speculators is placed at a pretty round figure.
