The time consumed by land carriage across the Isthmus of Panama has been lengthened by the greatly increased bulk of the mails and the measures necessary for the safeguard of the specie. A remedy for this will be provided by the early completion of the Panama Railroad and with this consequent saving of time the Directors have always anticipated a reduction in cost of freight and passage between California and Atlantic ports. NEW-YORK, May 31, 1853.

☞ **The Directors of the Association for the Exhibition of the Industry of all Nations** give notice that the Exhibition will be opened on the 15th day of July.

In making this announcement, the Directors feel themselves of the opportunity to state that the Building, which they have erected, and the Exhibition which they have organized, will, they believe, fully meet the just expectations of the Public.

It is proper that it should be borne in mind, in order to afford ample scope for the investment of talent and skill of our Countrymen in machinery and agricultural implements, we have kept one-half the floor space solely for such articles as have not been before exhibited, or differ essentially from what was exhibited at Exhibitions, so that we have now for the purposes of Exhibition, two hundred thousand square feet, or nearly five acres.

Not limiting their place to a display merely curious or attractive, the Directors have organized a Department of Mineralogy and Geology to which some of the best scientific talent of the country has been employed; and the foundation is thus laid of a most valuable national collection of the mineral resources of the Country.

The Directors had hoped to open the Exhibition at an earlier period, but the novelty and difficulty of the class of construction and the high standard of architectural beauty, which it has been the object of the Association to attain, have produced delay, and it has been impracticable for the Directors, notwithstanding their utmost vigilance, and their earnest desire, to anticipate the opening of the Exhibition to this day.

It is hoped by the general character of the Exhibition, the benefit promised to the most productive and noble industry of the condolence assistance towards it by the Government of the United States, a condence which has elicited a cordial response from the Governments of foreign countries. It will, unquestionably, be the most extensive and interesting collection of the works of art, the results of science and the productions of industry that has ever yet been assembled in this country, and will tend to increase the active emulation of the age in every branch of intellectual development.

The sole control of the interior of the building, its division, arrangements, classification and place, has been confided to two officers of the Navy of the United States, Captains S. F. DUPONT and C. H. DAVIS, and the energy of the Government given to the appointment of those gentlemen, who have so much distinguished themselves in the special services in which they have been employed, will, we doubt not, be of the great benefit to the Exhibition and the interest felt by the highest authorities of the country, in the general objects of the enterprise.

These gentlemen have organized their Department as follows:
J. M. BAYCHELDER—Secretary of the Superintendent;
SAMUEL WARNER—Arrangement of Space and Classification;
Prof. B. SILLIMAN, Jr.—Mineralogy and Chemistry;
B. P. JOHNSON—Agricultural Implements;
JOSEPH P. HOLMES—Machinery;
EDWARD VINCENT—Textile Fabrics;
FELIX PIZZETTI—Sculpture.

The Official Catalogues and the Illustrated Weekly Record of the Exhibition are to be published in the Building, by Messrs. G. P. Putnam & Co., under the supervision of the Association.

The Directors have actually expended the money placed in their hands by fellow-citizens in subscribers of the country, and they will continue to make every effort to satisfy their just expectations.
