SEWING MACHINES!—To TAILORS, TAILORESSES, &c., &c.—The "AVERY SEWING MACHINE" makes, beyond question, the best and strongest stitch of any Sewing Machine yet invented. We can satisfy the most sceptical that the work done by this machine will hold, neither will it ever come out by any wear. The seam may be taken out by design but only under such a combination of things as to make this peculiarity really and truly one of the most valuable points of this machine. It is simple in its construction, not liable to get out of order, and no danger of breaking the needle. We believe this machine is, beyond question, the best sewing machine yet invented for Tailors and other cloth sewers. The public are respectfully invited to call and examine the machine and its work at the office of the AVERY SEWING MACHINE Co., No. 251 Broadway.

Price for Machine $45 and $40. Tables and treadles extra—price $5 and $10.

NEW-YORK, July 30, 1853.

We the undersigned, do hereby certify that we have examined the "AVERY SEWING MACHINE," and cheerfully recommend it for its simplicity, durability, and especially for the peculiar stitch made by it. The stitch is original, and is apparently the most perfect and hence the "lock-stitching." We have thoroughly tested the strength of the sewing, and are satisfied that the stitch of this Machine makes a stronger and firmer seam than can be made by hand. We take pleasure in recommending this Machine to our friends, and to Tailors, Seamstresses and families generally throughout the country.

SEWING MACHINES.—The Avery Sewing Machine makes beyond question the best and strongest stitch of any sewing machine yet invented. The stitch is practically very similar to the "lock stitch" in hand sewing, and will not rip although every other stitch be cut. It is simple in its construction, not liable to get out of order, and no danger of breaking the needle. It is entirely original in its construction, not like any other machine now in use. We believe the Avery Sewing Machine is beyond comparison the best machine yet invented for tailors and other cloth sewers. The public are respectfully invited to call at the Company's office, No. 251 Broadway, corner Murray-st., and examine and thoroughly test the strength and durability of the work done by these machines.

Prices for machines $25 and $40; tables and treadle, &c., $5 and $10.

SWEENEY'S CELEBRATED HOT AIR and VENTILATING FURNACE.—THE NEW-YORK FURNACE Co. having purchased the entire right to manufacture and sell the above named FURNACE in the following States, viz: New Jersey, New-York (except the Counties of Niagara and Erie) and all of the Eastern States, are now ready to receive and execute orders from any portion of the above named Territory.

SWEENEY'S CELEBRATED HOT AIR AND SMOKE-CONSUMING FURNACE.

The Proprietors of this celebrated Hot Air Furnace, for Heating Churches, Public Buildings and Dwelling Houses, beg leave to respectfully represent to the few of the testimonials which have been presented to them in favor of its superiority over all other Furnaces for heating purposes now in existence.

Extract of a letter now in possession of the proprietors from Jacob Siebold, Esq., wholesale Grocer, Maiden-st.:

"Being desirous of procuring a Furnace for heating my house, I had tested them both incapable of radiating sufficient heat to warm my house, it being one of the largest class dwellings, and situated on the brow of the hill overlooking the lake, and receiving the full lake winds.

"I employed Mr. Sweeney to take it out and place one of Sweeney's Hot Air and Smoke-Consuming Furnaces in their place, and my house has since been warm and comfortable, and I can regulate the temperature of the atmosphere in my house at pleasure, using from ½ to one-third less coal of least 30 per cent. in the fuel. I cordially recommend Sweeney's Hot Air and Smoke Consuming Furnace, as being the best now in use. JACOB SIEBOLD."

Letter from R. Chevalier, President of St. Joseph's College, Prospect Hill, Buffalo:

BUFFALO, Dec. 15, 1852.

DEAR SIR: I cannot refrain from expressing myself exceedingly pleased with the results produced by Mr. Sweeney's Furnaces, which you have put up in our College. The effect produced by the ingenious inventor leaves nothing to wish for.

The main building, 90 feet by 42 feet, and the wing, 75 feet by 38 feet, are very comfortably heated. We have tested the degree of caloric that could be produced by the two Furnaces in very cold weather, and it was more than we wished to bear with comfort. The superiority of this kind of Furnace consists, 1st, in the simplication of the mode of Furnace construction, and consequent saving of expense in the first cost; 2d, in the economy of fuel, which, by lessening the consumption of fuel at least one-third, produces double quantity of heat; and, third, in the singular advantage of regulating the temperature of the house even when the wind is quite variable. I cannot but congratulate Mr. Sweeney on his ingenious and interesting invention, and I hope that as partners you will meet with all the success you are so justly entitled to. I remain, dear Sir, yours respectfully, E. CHEVALIER, President.

To J. B. COLLINS, Esq.

Copy of a letter from C. F. S. Thomas, Esq.:

BUFFALO, Feb. 3, 1853.

To J. B. COLLINS: I have used one of Sweeney's Smoke-Consuming Furnaces in my house during the past winter, and as a generator of heat I think it exceeds any equal to any furnace I am acquainted with.

We have had no difficulty, during our most severe weather, in thoroughly warming our house (which is rather a large one) with the use of but one Register.

The Sweeney Furnace, as now constructed, seems entirely simple, and not liable to get out of order, and is really unequaled by any description of ordinary compare heaters. Yours truly, C. F. S. THOMAS.

Letters of recommendation and testimonials have been received from the most respectable sources in Buffalo, Lockport, Niagara Falls, Canada, Sandusky, &c., claiming its superiority for heating purposes over all other furnaces ever invented.

J. B. COLLINS, Buffalo, N. Y.
BUFFALO, January 3, 1853.

J. B. COLLINS:

Dear Sir—I beg leave most respectfully to represent my opinions as to the nature and utility of your Furnace, the invention of Mr. P. Sweeney, the so called Sweeney's Hot Air and Smoke Consuming Furnace. In the first place, I would remark that within the last five years I have had two furnaces set up in my store, one of which is known by the name of the Cooper Furnace, the other was that which was brought from Newhaven City by John B. Fleury, of the firm of Fleury & Fritt of this city and was set up by them. At that time my store was 34 feet deep by 21 feet wide, and four stories in height. I found them both inadequate to heat it, and had them taken out some eighteen months since; since it is time I have enlarged my store, now it is 200 feet in length, and for the distance of 100 feet varies 40 feet wide, and with one of Sweeney's Furnaces my store is most exceedingly warm and comfortable. And, now, on the score of economy, judging from what I see in other of the stores, and what fuel I use now I should save at least ten tons of coal in the present season. I most cordially recommend your furnace to those in want of the article.

Very respectfully, WM. CARLAND.
BALTIMORE, March 23, 1853.

PETER SWEENEY:

Dear Sir—I have had trial of your Furnace, and find that it acts well. I think it will heat my house (which you know is large) throughout in the coldest weather.

I have had three furnaces of others make before yours, and none of them answered the purpose. Some would not heat, and others filled the house with gas. Yours is certainly free from gas, and there is plenty of heat. Yours, respectfully, RICHARD FRANC.
