Fire-proof Safes.

THE END of the CONTROVERSY!—Messrs. Stearns & Marvin, in the Courier and Enquirer, of the 19th inst. profess a readiness to accept my challenge though they couple their profession with such conditions, that it amounts to no acceptance at all. For instance, they say the Committee chosen to test the respective Safes, by burning, shall select Safes which have been made not less than twelve months, when they must know that I have no "Herring's Patent Fire-proof Champion Safe" that has been in use in the city for twelve months.

My challenge embraced two propositions—1st, with respect to Safes; 2d, with respect to Locks. One thing at a time. Let the first proposition be met, and the second will be in order.

In my challenge, I proposed to have the preliminaries arranged by a Committee, to be selected jointly. I will now be more explicit, and propose—which will save the necessity of oaths as to competition, &c., and be most satisfactory to the public and all concerned—that each party shall make a skeleton Safe, of the same size and thickness, the Safe of Stearns & Marvin to be filled with "Wilder's Patent and Rich's Improvement," while mine is to be filled with "Herring's Fire Proof Composition" in presence of the Committee, ourselves, and such others as may be invited to witness the same. The letters Patent to be farnished to the Committee, as that no infringement or quibbling can be resorted to by either party.

The Safes, as soon as filled, to be placed in the hands of the Committee, to be tested by them publicly—their report, made for publication, to be final decision, binding upon each party, the forfeit of the loser to be $1,000, (one thousand dollars,) to be paid over to the Juvenile Asylum; together with the payment of the cost of the Safes, the expense of getting up the trial, the remuneration of the Committee, and three months advertising in five daily and ten weekly papers, of the Committee's report.
