Fire-Proof Safes.

THE SAFE CONTROVERSY—S. C. HERRING TACKING OUT.—"THE END OF THE CONTROVERSY!" No! Mr. Herring—we cannot permit you to commence a controversy, and end it when it becomes too hot for you. You have tacked out everything, even the "better Lock than Jones's," and made a new challenge, which says virtually, that you have no confidence in your safe-water Safes when a year old, but must have one made new from the Factory! We cannot permit you to back out of the trial on the plea that we have imposed conditions that you cannot accept. The condition imposed upon you was the same on ourselves: each Safe to be selected from those in use twelve months; the oath prefixed by us as to the contents of our Safe, was also to be taken by you as to the contents of yours. Can you really be serious in backing out on those grounds? Do you suppose that the public are so dull as not to see through such a flimsy pretext? If the Safes sold as your Patent Safes are filled in, according to your patent, with mineral water rather, why can you not take the oath? But you say, "we might." We did not know it, and think you labor under a mistake in supposing it. At all events, they have been longer than that in use in Philadelphia, New-Orleans, &c.; and we did suppose, also in the city, judging by your advertisements and handbills. If we are to believe the letter the "Herring's Patent Champion Safe" received a medal at the World's Fair in London in 1851! How is this, Mr. Herring? This same Safe is new in use in your office, with Hall's Lock upon it, still protected by our Jones's Lock! If we are to believe your last advertisement, then this Safe could not have been a "Herring's Patent," but must have been a Wilder's Patent, and to the latter the medal consequently belongs. Which horn of this dilemma will you prefer sitting upon?

But there are some other points that we cannot reconcile with your twelve months." Several fires have taken place during the past year, where "Herring's Patent resisted the flames!" therefore, we think you labor under some mistake as regards the time they have been in use. If your memory is treacherous, the following will refresh it: Upward of a year ago, you established an agency in New-Orleans, and shipped a stock of Safes there, although you had no rights in the State of Louisiana. We remonstrated at the injustice. You replied—"These are Herring's Patent Safes, not Wilder's."

Now, to remove the obstacle you have raised, we will be satisfied with a safe made since the time specified by us, and if the Committee cannot find one in the city, we will be at the expense of sending two of their number to New-Orleans to purchase one there, so as to give you every chance of testing your vaunted patent—THE PATENT THAT TOO PURCHASED WHEN YOU FOUND IT WAS BETTER THAN WILDER'S—THE PATENT THAT OBTAINED THE MEDAL AT THE WORLD'S FAIR, LONDON, IN 1851, and yet has not been twelve months in use! That there may be no mistake about it, we quote the words of your first challenge:

"I to furnish my own Patent—'HERRING'S PATENT FIRE PROOF CHAMPION SAFE'—and you to put against it your 'Wilder's Patent,' provided you add the 'Rich's Improvement.'"

The challenge we accept, but, as we stated before, we do insist upon your reversing that your Safe is filled, according to your Patent, "with the residual matter left from the manufacture of mineral water."

The lock challenge, which you drop so suddenly, we again repeat. The Jones Lock, the Dial Lock, the Lock without a Key, "which you stamped when you "found a better," we place against your "better lock," your Hall's Lock, that obtained the Medal (through Jones) at the World's Fair. The amount and conditions, the same as stated before.

In adhering to your first challenge, and binding you to its conditions, we must not suppose that the third or substituted challenge is going to be passed by. You evidently have no confidence in your patent, when a year old, hence your desire to have a new Safe, fresh from the factory, rumbled into the fire. Now, we have no confidence in our safe-water Safes and soda-water resisting fire at any time, and will cheerfully accept the third challenge when the others are decided.

The concluding part of your first bombastic challenge we will borrow for a FINALE to this acceptance of it.

"Now I consider this as conclusive, practical and conclusive as regards the merits of our Safes and Locks, and I should like to hear from you at your earliest convenience in reference to my propositions.

"You have thought it a very happy conceit to announce me to the public as a 'quibbler.' Let me see if your facetiousness will induce you to 'quibble' out of the above offers. If you accept my proposal, speak out at once. If you dare not to so, stop your 'quibbling,' and hold your peace henceforth and forever." SILAS C. HERRING.

N.B. Letters addressed to Rich & Co.'s No. 146 Water-ST., N. Y., the only makers in the United States of Salamander Safes, containing Wilder's and Rich's Patents.

THE END OF the CONTROVERSY!—Messrs. Stearns & Marvin, in the Courier and Enquirer, of the 19th inst., profess a readiness to accept my challenge thought to be by couple their profession with such conditions, that it amounts to no acceptance at all. For instance, they say the Committee chosen to test the respective Safes, by burning, shall select Safes which have been made not less than twelve months, when they must know that I have no "Herring's Patent Fire-proof Champion Safe" that has been in use in the city for twelve months.

My challenge embraced two propositions—1st, with respect to Safes; 2d, with respect to Locks. One thing at a time. Let the first proposition be met, and the second will be in order.

In my challenge, I proposed to have the preliminaries arranged by a Committee, to be selected jointly. I will now be more explicit, and propose—which will save the necessity of oaths as to composition, &c., and be most satisfactory to the public and all concerned—that each party shall make a skeleton Safe, of the same size and thickness, the Safe of Stearns & Marvin to be filled with "Wilder's Patent and Rich's Improvement," while mine is to be filled with "Herring's Fire Proof Composition" in the presence of the Committee, ourselves, and such others as may be invited to witness the same. The letters patent to be furnished to the Committee, so that no infringement or quibbling can be resorted to by either party.

The Safes, as soon as filled, to be placed in the hands of the Committee, to be tested by them publicly—their report, made for publication, to be a final decision, binding upon each party, the forfeit of the loser to be $1,000, (one thousand dollars,) to be paid over to the Juvenile Asylum, together with the payment of the cost of the Safes, the expense of getting up the trial, the remuneration of the Committee, and three months advertising in five daily and ten weekly papers, of the Committee's report. S. C. HERRING.

RAG MACHINES, of every description, on improved principles—Mr. GEO. ARCHER, native of Dewsbury, has established a manufactory for the construction of these Machines at Chatshoe, Westchester County, New-York. He guarantees to make an article superior to any that are now imported and for less money. ANDREWS & JESSUP, Agents, No. 70 Pine-st., New-York.

SEWING MACHINES!—To TAILORS, TAILORESSES, &c.—The "AVERY SEWING MACHINE" makes beyond question, the best and strongest stitch of any Sewing Machine yet invented. We can satisfy the most sceptical that the work done by this machine will not rip, neither will it ever rip out by any wear. The seam may be taken out by design, but only under such a combination of things as to make this peculiarity really and truly one of the most valuable points of this machine. It is simple in its construction, not liable to get out of order, and no danger of breaking the needles. We believe this machine is, beyond question, the best sewing machine yet invented for Tailors and other cloth sewers. The public are respectfully invited to call and examine the machine and its work at the office of the AVERY SEWING MACHINE Co., No. 231 Broadway.

Price for Machine, $25 and $40. Tables and treadles extra—price, $5 and $10.

NEW-YORK, July 30, 1853.

We, the undersigned, do hereby certify that we have examined the "AVERY SEWING MACHINE," and cheerfully recommend it for its simplicity, durability, and especially for the peculiar stitch made by it. The stitch is original, and in appearance is like the most perfect and handsome "back-stitching." We have thoroughly tested the strength of the sewing, and are satisfied that the stitch of this Machine makes a stronger and firmer seam than can be made by hand. We take pleasure in recommending this machine to our friends, and to Tailors, Seamstresses, and families generally throughout the country.

AUSTRALIAN STEAMSHIP COMPANY—For PORT PHILIP, MELBOURNE and SYDNEY, Australia, via Liverpool. Emp.—The fast and magnificent steamship GOLDEN AGE, 3,050 tons burden, D. D. Porter, U. S. Navy, Commander, having been unavoidably detained, will be dispatched for the above ports on WEDNESDAY, 28th September, at 2 o'clock, from Pier No. 3, N. R.

The steamship is at her dock, ready for inspection, and will positively leave on the day appointed.

Passengers for Australia will find on this ship accommodations superior to any steamer ever built, and from her model and power of engine, it is confidently expected that the passage will be made in shorter time than it ever has been done.

The Directors of the Company, deeming it important for the interests of the Company that the first trip of their pioneer ship should be via England, have determined on sending her by the way of Liverpool.

For freight (a very small amount only of which will be taken) or passage, apply at the office of the Company, to
J. HOWARD & SON, Agents, No. 54 Broadway.

A mail-bag will be made up at the office of the Company. Letters must be prepaid.

UNITED STATES MAIL LINE for CALIFORNIA.—REDUCTION in PRICE of PASSAGE.—United States Mail Steamship Company, connecting with the Pacific Mail Steamship Company, carrying the great United States Mail for California and Oregon via Aspinwall and Panama.
