Machinery, &c.

ECONOMY in GAS—The USES and ADVANTAGES of KIDDER'S GAS REGULATOR.—It gives a better light, and saves at least 25 per cent of the gas-light, there is a certain pressure at which gas is delivered which experience proves to be most economical. This pressure is half an inch of water. It is the most economical because at this pressure there is the most perfect combustion of the gas, and a better and cheaper light is afforded at this pressure. If the pressure is increased beyond this, a large portion of the gas passes through the burners imperfectly consumed, so that there is a greatly increased consumption of gas without a corresponding light. Now all Gas Companies in order to insure a delivery of gas to all consumers, remote as well as near, at a sufficient pressure, are obliged to deliver it to all at a greater pressure than the most economical one. The pressure at which the various Companies throughout the Union deliver gas to the consumer varies from one to three inches. This street pressure is constantly varying from the constant change produced by the shutting off and turning on of the gas in the various buildings supplied. The Regulator applied at a house delivers the gas at any given desired pressure below the street pressure, and when once fixed at any given pressure will, without further attention, continue to deliver the gas for any number of lights and for any period of time at that pressure, independent of the constant variations of the street pressure. It does it with perfect accuracy, and the pressure at which it delivers may be changed at any moment. Before the invention of Kidder's Regulator no other instrument would accomplish these results

The accuracy of the above statements are confirmed by the testimony of Professors Torrey, Gibbs and Eliot, whose reports on the Regulator will be found in the pamphlet issued by the Company.

CITIES AND TOWNS WHERE THE REGULATOR IS IN USE.

Portland, Me.	Newburyport, Mass.	Springfield, Mass.
Concord, N. H.	Lowell, Mass.	Lawrence, Mass.
Boston, Mass.	New-Bedford, Mass.	Lynn, Mass.
New-York City, N. Y.	Brooklyn, N. Y.	Albany, N. Y.
Williamsburgh, N. Y.	Elmira, N. Y.	Auburn, N. Y.
Rochester, N. Y.	Buffalo, N. Y.	Jersey City, N. J.
Utica, N. Y.	Alexandria, Va.	Newark, N. J.
Baltimore, Md.	Richmond, Va.	Charleston, S. C.
Washington, D. C.	Louisville, Ky.	Mobile, Ala.
Chicago, Ill.	Providence, R. I.	Detroit, Mich.
Jamaica Plain, Mass.	Newport, R. I.	New-London, Ct.
Salem, Mass.	New-Haven, Ct.	Waterbury, Ct.
Troy, N. Y.	Cohoes, N. Y.	Hartford, Ct.
Poughkeepsie, N. Y.	Oswego, N. Y.	Middletown, Ct.
N. Brunswick, N. J.	Paterson, N. J.	Geneva, N. Y.
Hoboken, N. J.	Camden, N. J.	Philadelphia, Penn.
Savannah, Ga.	New-Orleans, La.	Easton, Penn.
Augusta, Ga.	West Troy, N. Y.	Cincinnati, Ohio.
Hudson, N. Y.	Cleveland, Ohio.	St. Louis, Mo.
	Syracuse, N. Y.	

PERSONAL EXAMINATION.

Engineers and all others connected with Gas Companies are invited to visit the experimental Room of the Company and fully satisfy themselves of the value of the Regulator.

THE SAVING MADE

Varies with the pressure of the gas in the street mains. Twenty-five per cent is acknowledged by users of the Regulators and places are daily reported to the Company, and the gas bills shown, where thirty, thirty-three, and even forty per cent has been saved. The Circulars of the Company contains a list of references so widely known and of such weight in the community, that no one who desires to use the Regulator can be at fault when seeking a friend's advice as to its merits.

Circulars sent by mail when desired. All orders for Regulators, by penny-post or mail, punctually attended to.

Call and examine for yourselves at the Office of the New-York Gas Regulator Company, No. 262 Broadway.

S. T. CLARKE, Secretary.

The following referees, in addition to the long list published a few days ago, will enable any one readily to ascertain from parties using the machine what its merits are:

A NEW THING ENTIRELY.—The most astonishing performance heard of.—Barrels, Firkins, Kegs, and the whole cooper family made and finished, without a defect, air-tight and smooth enough to varnish, entirely by machinery.

One Machine, with the tools used to perform the work, is a patent, for which we have received Gold and Silver Medals and State Diplomas. It takes the timber in the bolt, saws the stave hollow in the grain, cuts them all of equal length, planes both in and outside perfectly smooth, tries the quality of the timber, joints them in a perfect manner, giving each stave its equal proportion of bilge, according to its width, be it wide or narrow; chamfers bowls, cuts the crease, turns the head, and prepares the barrel or keg for the hooping process, in a manner so perfect, complete, and of superior finish, that we challenge the world to produce a better barrel, firkin or keg, than our Machines make, at the rate of 300 per day to the single set, to which we invite the particular attention of all who choose to give them inspection. We manufacture articles of the barrel family, from the smallest white lead keg to the largest cask in general use, all of which can be warranted to hold the most subtle liquids, or be adapted to the packing of dry goods. In fact, the Machine cannot make an imperfect article, except the defect is exclusively in the timber.

We have a shop at Elmira, N. Y., directly on the line of the New-York and Erie Railroad, and the Elmira and Niagara Falls Railroad, five minutes' walk north of the depot, where any persons who wish can witness the operation of the Machines, and test to their perfect satisfaction, the merits of the work. We will feel the utmost pleasure in exhibiting to such everything connected with the work.

Persons desirous of purchasing the Right and Machines for any location now unsold, can obtain any information in relation thereto by applying to us through the mail. There are but a few of the States remaining in our hands unsold, still, applicants will be referred to the present owners, most of whom will, no doubt, hold for disposal desirable locations within their respective territories. It is conceded by all judges who have examined the Machine, that it surpasses everything that has or can be invented for the same purpose, and most entirely supersede all hand-coopering.

Specimens of our work can be seen by calling on the Editors of The New-York Tribune.

WM. TRAPP & Co., Patentees and Proprietors.

Elmira, New-York, March 10, 1853.

P. S.—A Machine now on exhibition at the Crystal Palace.

C. M. GUILD & Co., (late Walworth, Nason & Guild,) have taken the Store and Manufactory No. 300 Broadway where they will continue the manufacture of all descriptions of STEAM, WATER AND GAS FINDINGS. They design to keep constantly on hand every kind of PIPE and FITTINGS of their own and other's make. Their Stock embraces a great variety of WATER, GAS and STEAM PRESSURE GAUGES and INDICATORS, HEATERS, COILS, VALVES, COCKS, BOILER-FLUES, BOILERS and all the various Fixtures and Attachments connected with the business.

They will also continue to erect Gas Lighting Apparatus and Steam Warming Apparatus, in the most perfect manner, and with many late improvements.

Every facility and information will be furnished which their long experience as pioneers in the business will enable them to give.

New-York, Sept. 26 1853. C. M. GUILD & Co.

FOR SALE—Four Boilers, second hand Locomotive and Flue, from 4 to 6 horse-power, and a 15 Horse Engine, at the Fulton Iron Works, foot of Cherry-st., East River.

PEASE & MURPHY.

GAS FIXTURES, FIXTURES.—
JAMES G. MOFFET,
Nos. 119 and 121 Prince-st., third block west of Broadway, grateful for the extensive patronage he has hitherto enjoyed, begs leave to call the attention of his friends and the public in general, to the large and elegant assortment of
CHANDELIERS, BRACKETS, PENDANTS, MANTLE ORNAMENTS, and MOVABLE READING PEDESTALS,
which he has on hand, suitable for
CHURCHES, PUBLIC BUILDINGS, STORES, HOTELS, and PRIVATE DWELLINGS,
which for design, finish and cheapness cannot be surpassed by any house in the United States. In connection with his large manufactory and warerooms, he has an extensive GAS FITTING SHOP, where all orders for pipe-laying will receive immediate attention.

SPECULATION and MONEY.—CLARK'S MERCHANT MILL, decidedly the most perfect piece of machinery ever invented for the manufacture of Flour. For description we refer to the following certificates from Rochester, the greatest milling point in the world:

This is to certify that we were present to witness the practical operation of the Clark Mill, and we take pleasure in saying that it far surpassed our most sanguine expectations. We were presented with some of the flour produced while present, which to quality possesses all the advantages of any we have ever seen. By this simple invention, from $1 000 to $10 000 worth of machinery is saved; also a large saving of power. This Mill is applicable to any power from two horse upward. They are all complete with the right to use them for $500. Only think of it, a complete Merchant's Mill, French Burr Stone-Bolt of best quality, all ready to go to work, making from one to two barrels of flour per hour of as good quality as any mill in the world. We unhesitatingly recommend this Mill to the public.

R. Chamberlin, mill propietor; R. Turner, head miller; E. D. Spelmire, proprietor, Boston Mills; E. Bouton, miller; E. Woolnough, head miller, Whitney Mills; T. Stutterd, first miller at Boston; F. A. Ringsley first miller at Pitts Mills; J. C. Stone, proprietor Irving Mills; A. Rushmore, proprietor Crescent Mills; and many other Rochester millers.

The above Mill is on exhibition at the Harlem Railroad Depot, room No. 23, entrance on White-st. State and County Rights for sale. Some have made fortunes already out of this patent, and good opportunity still offers. Address the PROPRIETOR at Depot as above.

This Company was established in Scotland under the direction of persons who had been long practically acquainted with, and connected with, the working of Life Assurance Institutions, the leading object of its promoters being to afford, as far as possible to parties residing in Great Britain or in all parts of the world, the same facilities and advantages as are enjoyed in that respect by parties in Great Britain. Branch Establishments were first extended to the Colonies of Great Britain, and these have been attended with complete success.

The Report of the Seventh Annual General Meeting of the Company, held at Edinburgh, on Tuesday, the 1st of November, is given in the Company's Prospectus, which can be obtained at the Company's Office.

The First Division of Profits, being for a term of seven years, falls to be made in 1854, and all Policies taken out in the Participation Class on or before the 15th of May, have right to participate in that Division.

The Company is now as American as well as a British institution, having conformed to the laws of the State of New-York in relation to Life Assurance Companies. Securities to the amount of $100,000 have been deposited with the Controller of the State and in addition to the security thus afforded parties effecting Assurances with the Company in America have the advantage of the large subscribed Capital in Great Britain.

Detailed prospectuses, forms of proposal and every information may be obtained on application at the Company's office.

By order of the Board of Directors
G. A. THOMSON, President of the Co. in New-York.

ARE YOU INSURED?
