THE PEOPLE'S PATENT OFFICE.—Inventors and others desiring to obtain Letters Patent for Inventions, are requested to communicate directly with the undersigned, by whom all the necessary documents are prepared, with the utmost fidelity and dispatch. Patent business of every description promptly attended to.

Persons wishing for information or advice relative to Patents or Inventions, may at all times consult the undersigned, without charge, either personally at his office, or by letter. To those living at a distance, he would state, that all the needful steps necessary to secure a Patent, can be arranged by letter, just as well as if the party were present, and the expense of a journey be thus saved. All communications strictly confidential. The whole expense of Patents, in the United States, is small.

Under the late modifications of the English Patent laws, and other Governments, the cost of foreign Patents has also been so much reduced as to render them available to American inventors. The foreign Patents of good inventions are generally of great value. American inventions are eagerly purchased by the people of the Old Country, and as the laws do not require the inventor to be the patentee, some of the best American inventions are constantly being sought up and patented by other parties, in consequence of the hesitation or delay of the originator to secure them.

The undersigned is represented in Europe by honorable and responsible agents, through whom he is enabled to secure patents in Great Britain, France, Belgium, Austria, Prussia, Russia, Holland, Spain, and all countries where Patents are granted, with the utmost dispatch, and on the most moderate terms. His facilities for transacting American and foreign Patent business, are unsurpassed. He can generally obtain Certificates of Provisional Protection from the British Patent Office within six weeks from the time the invention is committed to his care. For further information apply to or address post paid.
