## PROPOSALS.

PROPOSALS FOR ADHESIVE POSTAGE STAMPS.

POST OFFICE DEPARTMENT,
WASHINGTON, D. C.,
December 12, 1872.

SEALED PROPOSALS are invited from steel plate engravers and plate printers, and will be received at this Department until 12 o'clock M. on FRIDAY, the tenth (10th) day of January, 1873, for furnishing Postage Stamps for a term of four years, commencing on the first (1st) day of May, 1873.

QUALITY OF STAMPS.

The stamps must be furnished, subject to the approval of the Department, from steel plates, engraved in the highest style of the art of steel engraving, and printed in such colors as may be selected by the Department, in the best and most approved manner, equal in every respect to the stamps now in use, upon paper of the best quality suitable for the purpose, thoroughly gummed with the best quality of adhesive gum, perforated in such manner that each separate stamp can be readily detached and used, the sheets to be well pressed and packed so as to prevent them from adhering to each other; the same to be furnished with all reasonable despatch, in such quantities as may be ordered by the Department to fill the separate daily requisitions of postmasters and postal agents.

STOCK ON HAND.

The contractor shall at all times keep on hand a stock of the several denominations of stamps, subject to the control of the Agent of the Department, in all stages of manufacture, sufficient to meet all orders of the department, and to provide against any and all contingencies that may be likely to occur during the existence of the contract, so that each and every order of the Department may be promptly filled; and the Department shall have the right to require the contractor, at any time during the existence of the contract, to furnish an extra quantity of stamps not exceeding a supply for three months.

PACKING.

Stamps to be transmitted by sea routes must be securely packed in hermetically sealed tin cases, wrapped in strong manilla paper; all others must either be packed in strong binders' board boxes, bound on the edges and corners with muslin, and enveloped in two thicknesses of strong Manila paper or enclosed in strong Manila envelopes, as the quantity to be transmitted may require; all packages to be so enclosed as to enable the agent of the Department to officially seal them.

BLANKS.

In addition the contractor will be required to furnish labels and direct the same for each package in accordance with the daily lists furnished by the agent of the Department, together with all other blanks required to be enclosed with the stamps; also all blanks for daily, weekly, monthly and quarterly returns relating to the number and denominations of stamps furnished.

ESTIMATE OF QUANTITY REQUIRED.

The number of stamps issued and to be issued during the four years embraced by the present contract is estimated to be two billion ninety-four million, the average yearly increase being eight forty-hundredths per cent.

For the next four years it is estimated, at the same ratio of annual increase, two billion eight hundred and eighty-three million stamps will be required.

It must be understood, however, that proposals made under this advertisement shall include all the stamps needed by the Department during the contract term without reference to the above estimates, which are here given only for the information and guidance of bidders.

DELIVERY

The stamps may be required to be delivered by the contractor in separate packages, as above provided for, at the post office in the place where the same are manufactured, or in such quantities at the Post Office Department, Washington, D. C., (each denomination being kept separate), [illegible] street.

DIES, ROLLS AND PLATES

The dies, rolls and plates from which postage stamps are now printed, being the property of the United States, will be placed in the keeping and custody of the contractor on the 1st day of April, 1873, the same to be held subject to the order and control of the Department, as hereinafter provided, and the contractor will be required, from said dies, rolls and plates and from such rolls and plates as may be necessary to be reproduced from the original dies, to have on hand ready for issue on the day the contract term commences a sufficient stock of stamps of the several denominations required to fill the current daily requisitions from the Department, without hindrance or delay.

The contractor will be further required to keep in repair all dies, rolls and plates from which stamps may be printed, and to renew the same whenever required; and should new designs be required at any time to take the place of the present series of stamps, or of any of them, or for denominations of stamps not now in use, the same shall be furnished and engraved, subject to the approval of the Postmaster General, upon his request, within a reasonable time; all which shall be done and executed in the best style of steel engraving by the contractor and at his own expense. All dies, rolls and plates made or used at any time in filling the contract shall be the absolute property of the United States, and shall be delivered, in good working order, to the Postmaster General or his authorized agent whenever demanded.

BUILDING, PLACE OF MANUFACTURE, &C.

The stamps will be required to be manufactured in a fireproof building, and in separate apartments, distinct from those in which any other work is done by the contractor; and when finished must be placed in a fire and burglarproof safe or vault, to be specially provided for that purpose, and said apartments and safe or vault shall at all times be subject to the inspection of an agent of the Department.

REPORTS

The contractor will be required to report weekly, under oath, the number of stamps manufactured (finished, unfinished and spoiled), the number issued during
