"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well selected cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette. DISEASES OF THE NERVOUS SYSTEM.

The importance of the nervous system, its power over life and the direct bearing which it has on human happiness are thoroughly recognised; its uses and the danger of overtaxing it, whether through intense mental application or by the excessive indulgence of the appetites and propensities, are proper subjects for consideration. When the nervous system is deranged it is absolutely necessary to promptly seek advice from an expert who, for a long series of years, has devoted his whole time and attention to this study, and who, from his experience and practice, has learned to discover at once the cause, and as promptly apply the remedy, thus avoiding the painfully slow seeking for the truth so common to the inexperienced and so annoying to the patient, who very naturally wants to know without delay what is the matter, the extent of the derangement, the probabilities of recuperation and the time required.

If the brain has become exhausted by intense mental application, depriving it of the power of connected thought, it can only recover its strength by being properly fed and nourished by the use of certain systematic methods. It is precisely the same with the nerves that preside over organic life. The value of this branch of medical practice can scarcely be overrated, for it reaches marriage, the perpetuation of family names the securing of hereditary titles, and the retention of estates in the same family.

From a long and large experience in this direction I have been able to command by my success the thankful appreciation of some of the first families in the city and nation, and I can communicate much that pertains to the over exercise of every department of the nervous system and the means of recovering its powers, whether of brain, appetite, propensity or passion.
