NEW YORK BANK CLEARINGS.

The volume of business transacted in or through New York on Saturday is indicated by the fact that bank clearings reported yesterday by the New York Clearing House totalled $[illegible]. These daily figures lack significance unless compared with the daily averages for the year to date and the daily averages in the corresponding period of former years. New York, the financial centre, reflects more or less accurately business and financial conditions throughout the entire country. The comparisons will be found even more valuable when considered in connection with the summary of railroad earnings published under "Railroad News."
