FEDERAL RESERVE BANK STATEMENT

Increase of $46,200,000 in War Paper Holdings Are Shown for Week

RESERVE DEPOSITS GAIN

Note Circulation Advances and Gold Reserves Have Further Drop.

Special Despatch to THE SUN.

WASHINGTON, Aug. 30.—Aggregate increases of $46,200,000 in holdings of war paper accompanied by slightly larger additions to reserve deposits are indicated in the Federal Reserve Board's weekly bank statement. The statement shows increase of $27,100,000 in Federal Reserve note circulation and further decrease of $7,500,000 in gold reserves.

Against considerable rise in war paper on hand holdings of other discounts fell off $5,400,000, while acceptance holdings underwent little change. Treasury certificates, on the other hand, show an increase for the week of $5,600,000. Holdings of war paper by the Chicago, St. Louis and Minneapolis banks include $53,700,000 of paper discounted for other Federal Reserve banks, against $69,000,000 in the week immediately before, while acceptance holdings of the Cleveland, Kansas City and San Francisco banks are inclusive of $39,400,000 purchased from other Federal Reserve banks.

Government deposits show a decline for the week of $48,800,000, reserve deposits an increase of $50,100,000, while the float carried by the reserve banks declined $11,400,000. Net deposits work out about $8,700,000 in excess of the last previous week's total. Total cash reserves fell off $6,700,000. The reserve ratio, because of the reduction in reserves and the increase in both deposit and note liabilities, shows a decline of from 51.8 per cent. to 50.7 per cent.

The following table shows the condition of the banks in the Federal Reserve system at the close of business last night:

CONSOLIDATED STOCK EXCHANGE OF NEW YORK

The Second Largest Stock Exchange in the United States in Volume of Stock Transactions.

The remarkable growth in size and importance of the Consolidated Stock Exchange of New York since the days of its infancy as the New York Mining Exchange, forty-three years ago, is due primarily to the splendid opportunities offered small operators and investors.

Beginning with only twenty-five Charter Members, the Exchange grew rapidly, absorbing the following organizations within the first ten years:—The National Petroleum Exchange, the Miscellaneous Securities Board, the American Mining and Stock Exchange, and the New York Petroleum Exchange and Stock Board.

Within a year of this consolidation the volume of business totaled 41,675,170 shares, and the following year, 1887, the sales increased over six million. In 1906 the transactions totaled 91,346,000 shares, and at the present time the volume of business is enormous.

The universally used Clearing House System, originated and perfected in this Exchange in 1883, renders the members invaluable service at a minimum cost.

The Consolidated Stock Exchange, in conjunction with its efficient Clearing System, handles the tremendous odd lot business of its members with ease and expedition, in nowise interfering with handling and clearing the transactions in large lots. It thus fills the essential and important role of giving equal time and attention to the orders of both small and large dealers.

The increasing demand for Exchange memberships at advancing prices indicates a growing realization of the value of the facilities offered by the Exchange to its members and their customers.

Such memberships as are from time to time offered for sale by retiring members, or those of deceased members, can be obtained through the Secretary's office. As a business proposition no other field offers so great an opportunity.
