ahlnge from morning rates. Erie, with sales of some 6,000 shares during the day, closed about ¼ ⅌ cent lower than yesterday. The *receipts* of this road in September were in round numbers $540,000, against $464,000 in September last year—showing, as we have before stated, an increase of over $70,000. The settlements with other roads in September last year showed the *earnings* to have been $326,000—a gain on the *receipts* of $62,000. What will be the result this year cannot be known for several days; but if the settlements produce an equal gain this year, the *earnings* of September will go a trifle over $600,000. Reading, under large sales, fell off to 93¾, a fall of ¼ ⅌ cent. New-York Central was offered at the Second Board at 94½, but we heard of no transactions. We hear that Mr. Corning has written a friend here that the Road will not recede from its present transfer price. If this be the decision, the stock will remain excluded from the Board. The receipts of September are reported in an Albany letter to be about $755,000, which is larger than was estimated. Competition with the Erie has, we understand, reduced the freight of flour by this route between Buffalo and New-York to 65 cents ⅌ barrel, which is 3 cents less than it costs by canal and river. It does not seem possible this rate can pay the road any profit. Harlem fell off to 28¾ and Hudson River to 38¾. Panama was offered freely, and over 1,200 shares sold, closing at a decline of 1-4 ⅌ cent. Western shares were heavy, but without important changes. Galena and Chicago sold at 119; Chicago and Rock Island, 94; Michigan Southern Construction, 96; Cleveland and Toledo, with large sales, 82; Illinois Central, 92¾, &c. Cumberland fell off ¼ ⅌ cent. Other coal shares are lower. Delaware and Hudson sold at 127 and Pennsylvania Coal at 140. Nicaragua is among the firmest fancies, selling at 19. The financial condition of this Company is reported to be very favorable. Railroad bonds are pressed on the market, and lower rates are submitted to. The transactions were nearly $200,000. Erie, 1875, fell off to 86¾; Illinois Central 79; Hudson River, 3d, 73, &c. Illinois Central bonds are held to considerable extent in blocks, and the calling in of loans has forced a large amount on an inactive market. State stocks are also heavy.

The Exchange market is very irregular, but with a decided downward tendency. The supply of commercial bills is in advance of the demand, and rates for such bills are ¼ to ½ ⅌ cent lower than by the last steamer. The range of Sterling we quote at 8¼@9¼, although small sales have been made by bankers at 9¼@9¾, and some bills with bills lading attached have been sold as low as 7½@8 ⅌ cent. First class commercial signatures sold at the close at 8¼@8½ ⅌ cent, and for a large bill bankers would probably have accepted 9½ ⅌ cent. France were 5.17½@5.15, with occasional sales at 5.12½; prominent signatures having been sold at the lowest rate, ¼ ⅌ cent off. All Continental bills are heavy.

Freights are firm but rather quiet. Engagements to Liverpool of 5,000 bushels Wheat at 12½d., 2,000 bbls. Flour at 4s., 600 bales Cotton 7-16d. @ ¼d. To London, 8,000 bushels Wheat 14½d in ship's bags, and 150 tuns Copper Ore 50s. The Baltic has 2,500 boxes Cheese and 200 pkgs. India Rubber goods at 60s. and 300 or 400 bbls. Apples at 7s. The ship Trumbull, 855 tuns was taken for Antwerp at £2,500, to load Flour and Grain.

The Cotton market is heavy at a decline of ⅛c. ⅌ lb. with moderate sales. Breadstuffs are also heavy; Flour having fallen off 6¼ to 12½c. ⅌ bbl. and Wheat 3 to 6c. ⅌ bushel. About 15,000 bbls. Flour sold at $7 62½ to $8 for common and good brands and Western and State. Of Wheat about 50,000 bush. sold at $1 80@$2 07½. Corn is 85½@86c. for Western, and dull. Rye is firm at $1 14@$1 19. Sugar and Coffee are quiet and heavy, but Molasses is firm. Pork is unsettled; Mess $22 31¼@$22 37½ and Prime $21 25. Beef is firm. Lard is heavy and in good supply. Bacon is scarce and 1,000 boxes long boneless Middles sold for December and January at 11c., a very high price.

The business at the Sub-Treasury was: Paid, $92,585 98; Received, $123,916 94; Balance, $7,256,714 20. Paid for Assay Office, $3,689 86. Paid on Disbursing Checks, $73,806 25.

The sales of lands in September by the Illinois Central Railroad Company reached 29,911 acres, for an aggregate of $439,684—averaging $14 70 per acre.

The Illinois Central Railroad Company will pay interest on the stock for the year ending July, 1855, on the 1st of November. Holders of stock on which $15 per share have been paid will receive 80 cents per share, they first paying the installment called as above. The holders of stock on which $20 per share have been paid will receive $1 40 per share.

The North River Insurance Company has declared a semi-annual dividend of 8 ⅌ cent, payable on the 10th instant.

The decline in the price of gold bars caused some purchases for shipment before the fall in Exchange took place yesterday and to-day, and $250,000 are engaged in the Baltic by Messrs. Brown Brothers & Co.

The George Law brings $755,000, which is about a quarter of a million less than was anticipated. The amount brought to Panama was $940,000 of which $197,000 went to England. The advices from the Panama Road are favorable, although the freight business does not increase quite as fast as was expected. The road is in good order. The first entire cargo of Pacific Coast and Isthmus produce, &c., brought to Aspinwall by railroad, and shipped thence, was by the schooner Canton, for New-York, which sailed on the 15th inst., and consisted of the following articles: 998 bales Peruvian bark; 15,491 lb of logwood; 942 hides, and 3 casks of hides; 19,720 lb chain cable; 8,450 lb iron; 1,910 lb old rope; 28 ships' ventilators. The value of this shipment was about $70,000.

The Circular of Messrs. Cammann & Co. for the Baltic says:

The stringency in Money matters which existed at the date of our last report has continued unabated to the present time. The export of specie to Europe, the payment of duties at the Sub-Treasury, the withdrawal of funds belonging to country banks, and drain of coin to the interior, consequent upon the moving of the large crops of breadstuffs to the Eastern markets, have, in the absence of arrivals from California, materially reduced the deposits and specie balances of the banks in this City, and induced, as an act of prudence, a considerable reduction of loans.

Messrs. Marié & Kanz say:

Les steamers de la Californie avant, d'après un nouvel arrangement, retardé d'une semaine leur départ ordinaire, la réserve de nos banques s'en est sérieusement ressentie. Cette circonstance, jointe à la continuation de l'exportation du numéraire et à l'importance des sommes payées pour droits de douane, a obligé nos banques à faire rentrer leurs prêts à présentation et, par suite, l'argent est devenu fort rare. La Bourse a été très affectée par cet état de chosses et une baisse sérieuse en a été la conséquence. La baisse a porté également sur les fonds à spéculation et sur ceux à placement. Ces derniers ne se sont pas faits en quantités considérables; mais, en l'absence d'ordres pour Petrograd, ce qui a été vendu, l'a eu être en baisse marquée. L'état du marché monétaire de Londres reprime la disposition que montraient nos capitalistes de profiter des bas prix actuels. Tout nous porte à croire, cependant, que la gêne actuante ne sera que temporaire.

and Messrs. Decappet:

L'arrivée de steamer du Liverpool du 15 Septembre annonçant le succès des alliés devant Sebastopol n'a point produit sur notre marché des fonds d'effet favorable. La hausse dans le taux d'escompte de la Banque d'Angleterre porte à 4½ p. cent, et les nouvelles financières en général considérées par favorables, arrivant sur notre place tandis qu'une demande plus prononcée d'argent s'y faisait de nouveau sentir, ont plus que neutralisé l'effet que l'on avait pu en attendre et nous avons à signaler une baisse générale sur les fonds publics, mais plus particulièrement sur les actions de chemins de fer et sur les obligations de nombre d'entre eux. A la dernière marche est fermé.

En bonds de Villes la seule transaction marquée à notre connaissance, est la négociation d'environ $200,000 [illegible] de Stockholm au pair, formant la balance de l'emprunt [illegible] de cette ville. Cette somme a été absorbée comme placement par [illegible] de nos institutions locales. Il n'y a du reste pas de [illegible] prononcées dans les prix des fonds de Villes et de Chemins [illegible] restent dans l'inaction.

The business at the Clearing-House to-day was $21,177,500, which is unusually large.

Money continues very active among stock operators at 7@9 ⅌ cent up to 12@15 ⅌ cent on good stocks. The stringency appears to be quite equal to that of the worst day of last week.

We have information from the Terre Haute and Alton Road that through trains would be put on this week, connecting by stages over about ten miles of the route, between the two branches of the Illinois Central Railroad Company.

The unofficial statements of September earnings on the Western Roads show very large figures. We give them as we hear them without vouching for their correctness: Michigan Southern, $250,000; Cleveland, Columbus and Cincinnati, $140,000; Cleveland and Toledo, $80,000; Cleveland and Pittsburgh, $65,000; Galena and Chicago, $250,000 to $275,000; Chicago and Rock Island, $140,000 to $150,000.

The revenue collected at Boston in September was $681,970, against $684,228 in September 1854. The amount received this year so far is $5,908,925, against $6,726,369.

The Indiana State Auditor gives notice that the securities held in trust for the redemption of the circulating notes of the Plymouth Bank at Plymouth; State Stock Security Bank at Newport; Traders' Bank at Terre Haute; Drovers' Bank at Rome; Farmers' Bank at Sterling; Agricultural Bank at Mount Sterling, and New-York Stock Bank at Vincennes—all of Indiana—will be sold at auction at the Merchants' Exchange, in this City, at noon on the 29th inst. These securities consist of Indiana and Pennsylvania fives, and Virginia and Louisiana sixes.

At Boston Money is in good supply, and the banks are discounting liberally for their regular customers. In the street the best paper goes at 7½ ⅌ cent, but higher rates are paid on inferior names.

*The Boston Journal* of Monday says:

"The Railway panic continues, and we have to report still further decline. Maine, under the effect of the Investigating Committee report, dropped to 84, at which sales of regular stock were made after Second Board, although not published in the list. Worcester declined ¼, and was dull; Providence touched 62¾, and Western was offered at 87½. The market has witnessed no such depression and heaviness in Railways for several years."

In regard to the Isle Royale Mine *The Boston Post* says:

"Soon after the concern came into Boston hands last Winter, the Company appeared to be overwhelmed with debt. Its paper had been protested to a large amount, the miners were dissatisfied, and the mining advices were not very favorable. A new Superintendent and a new Treasurer were appointed—the latter was immediately dispatched to the lake to settle accounts with the previous Superintendent. Large assessments were levied, and promptly responded to by the stockholders. The result was that the Company was found to owe some $20,000 less than had been supposed, and every cent that it did owe was liquidated. Upon further development the mine improved wonderfully, the machinery was put into full operation, and the product sent from the mine to Sept. 1, 1855, was 457,000 lb of 70 ⅌ cent copper, after paying freight and smelting charges, full $75,000, or more than enough to pay the expenditures of the whole year, without trenching upon the yield from Sept. 1 to Jan. 1, estimated at about $40,000 more. From these facts it would appear that the 'Isle Royale' is really earning a fair dividend, but we are informed that none is contemplated at present."

## Tellkampf & Kitching's Wool Circular.

No. 44 BEAVER-ST., NEW-YORK, Oct. 1, 1855.

There has been a very large and active business done in Domestic Fleece from the 1st to the 18th of September, since when a steady but more quiet demand has sustained the advance of prices established in the beginning of the month. The higher prices furnish a reason for the falling off in the sales, and another may be traced to the heavy receipts at the opening of September. In general prices have advanced 2@3c ⅌ lb. Our stock of Fleece Wool offers a fair selection, the new arrivals being nearly as large as the sales. Pulled Wool has not exactly shared in the advance of Fleece, but has sold freely at our quotations—the demand could not be satisfied—and the stock remains small. Lamb's Wool is plenty.

The operations in Foreign Wools have been moderate; prices, however, have improved with some kinds, such as Cordova, Entre Rios, Unwashed, Smyrna and some other low qualities. Sellers remain very firm in expectation of higher prices, but buyers do not seem inclined to participate in these views. The present prices are considered too high for speculations, and business is now more than before, between the importers and manufacturers only.

The importations are too limited for our manufacturers, and we have at this period no stock of any amount of unwashed low wools for worsted, and not a proper selection in washed wools for the same purpose or for other yarns.

It is evident that the injury done to our manufacturers by this state of affairs has its real origin in the high duty placed upon foreign wools, and credit at the same time is also affected. The necessity of coing away with the duty on wool entirely, is felt and expressed by the trifling importation of so important a raw material, and we do not expect to find our market properly stocked by speculations in foreign wools, before the salutary measure of allowing wool and raw materials for manufacture to be entered free, is accomplished.

From England we learn that speculations will be checked by the higher discount, and prices, though firm, it is not supposed will advance much further.

It is encouraging to see our manufacturers of woolen goods selling freely and at improved prices, though the rise has not been sufficient in proportion to that in the prices of wool. We presume there will be no overstock of foreign and domestic goods in our markets under the existing circumstances. A steady and safe business may consequently be looked for.

## Faber & Perkins's Circular.

[*Per Baltic.* NEW-YORK, Monday, Oct. 1, 1855.

Private foreign advices to hand a few days subsequent to the date of our circular of August 27, being of a character to lead to the expectation of an early advance in the price of LEAD in England induced those parties who were in possession of this news to take up all the lots to be had to arrive, and an extensive business was done at from ⅌ £6 15 to ⅌ £6 25 ⅌ 1,000 lb—not less than 2,100 tuns having changed hands in one week, including several lots on speculation, and mostly to arrive. The accounts by the two succeeding steamers, although of a strong tendency, were not considered sufficiently encouraging for buyers to go on anticipating their wants at advanced prices; and from the 4th to the evening of the 19th ult. we had a rather quiet market, with sales of about 500 tuns at ⅌ £6 25@⅌ £6 31¼ for Spanish, and ⅌ £6 37½ for English and Galena. The arrival of the Baltic on the morning of the 20th, with advices showing a rise of 10@20s. ⅌ tun in England, and reporting a great scarcity of Lead in all the markets of the north of Europe, caused renewed activity, and about 750 tuns sold in the course of a few days at ⅌ £6 26@⅌ £6 30, nearly all on speculation.

The letters per America received to-day speak still more favorably of the future prospects for this article, some of them quoting an advance of 10@⅌ tun in England, and unprecedentedly high prices all along the coast of Spain, their general tenor being such as to impart increased firmness to holders, which tends to check operations.

The receipts since our last have been heavy, chiefly, however, to manufacturers, being either their own importations or purchases made to arrive.

Our last statement exhibited a deficiency of 4,400 tuns, compared with the receipts of the first eight months of last year, which difference is now reduced to about 2,300 tuns; but as the receipts this month will be light, as set against the 4,600 tuns foreign in October last year, we shall again have a more marked falling off by the end of the month.

Since our last the receipts have been—Foreign, 50,493 pigs; coastwise, &c., 2,409 pigs; together, 52,293 pigs; making since 1st January, 1855—Foreign, 191,362 pigs; coastwise, &c., 31,892 pigs; or, 223,222 tuns; against first nine months, 1854—Foreign, 257,103 pigs; coastwise, &c., 23,336 pigs; or, 16,595 tuns; against first nine months, 1853—Foreign, 179,399 pigs; coastwise, &c., 104,465 pigs; or, 15,442 tuns. Stock on hand, 2,250 tuns.

## Philadelphia Markets.—TUESDAY, Oct. 2.

COTTON quiet and unchanged. FLOUR continues about stationary. The receipts and stocks continue light, and prices are firm. There is a moderate export demand and further sales of 1,000 bbls standard brands were made at ⅌ $8 ⅌ bbl., and a small lot of extra at ⅌ $8 25. There is a steady demand for the supply of the retailers and bakers within the same range, and fancy lots at higher rates. RYE FLOUR is scarce, and held firmly at ⅌ $6 25. CORN MEAL comes in very slowly; 200 bbls. fresh ground Pennsylvania sold at ⅌ $4 50 ⅌ bbl., at which figure it is wanted.

WHEAT is plenty and dull to-day at yesterday's prices; some small sales made, mostly during last evening, at ⅌ $1 75@$1 85 for red and ⅌ $2@$2 05 for white, but these rates are not now obtainable, and the market closes unsettled and dull. CORN is in steady demand, with sales of Southern yellow at 91@92c. in store. RYE is in request at ⅌ $1 12 for Pennsylvania. OATS wanted; 3,000 bush. Southern sold at 42c. GROCERIES and PROVISIONS remain inactive, with a small business doing in the latter at previous rates. WHISKY steady at 41@42c. per bbl. and 40@41c. for hhds. as to the condition of the package.
