B. R. T. COMMITTEE ON BONDS REPORTS

Bankers Representing Holders of 5 and 7 Per Cent. Notes Outline Situation.

Kuhn, Loeb & Co. and Kidder, Peabody & Co., comprising the protective committee for Brooklyn Rapid Transit 5 per cent. and 7 per cent. notes and New York Municipal Railway Corporation 5 per cent. bonds, the Central Union Trust Company having resigned from the committee because of possible conflict with its duties as trustee of the first refunding mortgage, sent out yesterday to bond and noteholders a report outlining the situation as represented by the report of Stone & Webster and Price, Waterhouse & Co., who were employed to investigate the properties and accounts of the system.

The circular says in part: "As a result of greatly increased costs due to the war, the city's delay in completing the new rapid transit lines and other causes, it became necessary to provide a large additional sum to meet the system's obligations under the city contracts, including both equipping the new lines and completing the addition to the power plant, which had been commenced to provide power for the new rapid transit lines. This money was provided by the issue and sale of $18,000,000 of the B. R. T. receiver's 6 per cent. two year certificates. The proceeds of $5,000,000 of these certificates have been retained by the B. R. T. receiver mainly for power development, the proceeds of the remaining $13,000,000 being advanced for use by the rapid transit company's receiver under the city contracts. Against this advance the rapid transit companies' receiver has issued $13,000,000 of receiver's certificates secured by a lien upon all the properties of those companies prior to the subway bonds and junior to the underlying bonds, these certificates being in turn pledged to secure the B. R. T. receiver's certificates.

"Stone & Webster advise that, assuming that there will be no further important advance in wages or cost of materials, the proceeds of these certificates, with such part of the income as is available for the purpose under the decree, will be sufficient to meet the requirements of the contract with the city and that, provided the city does its part with reasonable promptness, all of the rapid transit lines provided for in the city contracts should be equipped and in full operation before the maturity of the certificates.

"As a result of the investigation of Stone & Webster it became apparent that the surface lines of the system would be unable to earn their fixed charges, despite the two cent charge for transfers recently allowed by the Public Service Commission, and they now report that with the increased scale of wages and disregarding the effect of the disintegration which has occurred these companies cannot earn during the current fiscal year, and probably for some time thereafter will be unable to earn, even operating expenses and taxes. A receiver for the surface lines was appointed by the United States District Court in July and defaults in payment of the interest on practically all the mortgages resting upon those lines have occurred. Following default in the payment of rental to Brooklyn City Railway Company, that company has taken possession of its lines, comprising about 40 per cent. of the surface mileage of the system, which had been operated by a subsidiary of the B. R. T. Company under lease. The result has been a general breaking up of the system of surface lines formerly controlled by the B. R. T. Company. How far this will affect the earnings of the lines is still problematical.

"The activities of the receiver of the B. R. T. Company proper are now, in general, confined to completing the additional power generating facilities and furnishing power and doing repair and maintenance work for both the rapid transit and surface lines. Under a contract negotiated by the receiver he will also furnish power for the future operation of the Brooklyn city lines. Stone & Webster report that while this part of the system is earning and will probably continue to earn interest on the B. R. T. Company's investment therein there will be no substantial surplus over such interest.

"As appears from the reports of Stone & Webster, with the wages and other operating costs now in force and a 5 cent fare, the earnings of the rapid transit lines remaining after the payment of interest upon the receiver's certificates and the $23,967,000 of underlying elevated bonds, will fall considerably short of the interest upon the $60,000,000 of B. R. T. notes and subway bonds. As already stated, without an increased fare no substantial contribution toward your interest can be expected from the surface lines or from the properties of the B. R. T. Company proper. Efforts are being made to secure higher fares for all lines.

"There have now been deposited with the committee about $30,000,000 of the three year notes, which, together with the $16,544,700 of that issue held by the War Finance Corporation, which has been cooperating with the committee, constitute over 80 per cent. of the entire amount outstanding. The committee also represents the majority of the subway bonds outstanding."

WABASH ROAD LOSES CASE.

Federal Court Awards $51,366,297.98 to Trust Company.

ST. LOUIS, Nov. 24.—An opinion handed down in the United States Circuit Court of Appeals here to-day holds that the Equitable Trust Company of New York is entitled to collect $51,366,297.98 from the Wabash Railroad Company. The opinion affirms the judgment rendered against the railroad company by Judge Elmer B. Adams.

When the Wabash went into receivership in 1914 the trust company, as trustee, held a mortgage against it. The mortgage, long overdue, was foreclosed against the property which it covered. That property was sold, but the proceeds lacked $51,366,297.98 of covering the amount of the mortgage. The trust company then sued to collect a deficiency judgment for the remainder.
