The whole expenditures toward the permanent improvement of the canal and works during the year was $63,543 65.

The Company have expended since 1848 for the improvement of the canal $819,799, of which $764,000 was raised by the issue of 10 per cent stock, and the remainder was from the earnings of the Company, in addition to $87,732 of floating debt paid off. The Company has now on hand $39,077 beyond the amount of temporary liabilities. By the improvements the canal has been put in good condition, with at least five feet of water in all the levels, enabling it to be navigated by boats carrying from 65 to 70 tuns, and with a capacity to carry each way during the season about 500,000 tuns; and when the remaining old planes shall have been replaced with new ones the capacity will be increased to about 1,000,000 tuns each way per annum. The bonded debt of the Company, $426,550, became due on the 1st of April, and has been mainly settled and paid from the proceeds of a new six per cent mortgage loan of $500,000, redeemable April 1, 1876. The prospects of business for the ensuing year, it is stated, are fully equal to those of any preceding year.

The business of the Clearing-House to-day was $24,653,000. The Park Bank has applied for admission to the Clearing-House.

In regard to Cotton, Mr. Wright's circular says:

In this market up to Saturday last a fair amount of business was transacted—partly on speculation—and prices advanced ⅛@¼c. ₱ ℔. Since then, under the Atlantic's news, the buying has been mainly for our domestic consumers and shipment to the Continent, and business closed dull, but with little pressing on the part of holders at my last quotations, which are renewed. The total sales for the week are estimated at 10,000 bales, the bulk of which will now be shipped to Great Britain. The export during the same time has been—To Liverpool, 1,972 bales; Antwerp, 136; Naples, 362; Norkoping, 368; Rotterdam, 373. Total, 3,211 bales.

Cotton in transitu, owing to the high cost in the South, and the consequent loss which would result from a sale here, has not been offered, the owners preferring to realize in port of destination. There is less on the market now than at any time during the past four months, and prices for the small amount disposed of have been irregular, but generally at a decline of ⅛@¼c. ₱ ℔ from last week.

Southern Markets are lower. By telegraph, a week later, no change of importance is noticed.

The following is a statement of the movement in Cotton since the 1st of September last, as compared with the previous three years:

	1856.	1855.	1854.	1853.
Receipts at the ports	3,343,000	2,366,000	2,561,000	3,065,000
Exports to Gt. Britain	1,537,000	1,164,000	1,126,000	1,390,000
Exports to France	433,000	342,000	250,000	396,000

Stock on hand	440,000	324,000	605,000	468,000

Of which during the past week, included in the above:

Receipts at the ports	51,000	55,000	41,000	20,000
Exports to Gt. Britain	65,000	30,000	53,000	41,000

Tota exports	97,000	87,000	76,000	64,000

SUMMARY.—Receipts—Increase at the ports over last year, 977,000 bales; over 1853, 188,000. Exports—Increase to Great Britain, 373,000 bales; compared with 1853, 141,000. Increase to France, 91,000 bales; compared with 1853, 147,000. Increase to other foreign ports, 225,000 bales; compared with 1853, 147,000 bales.

A dispatch from New-Orleans, dated the 12th inst., says:

"The news by the Atlantic depressed the market, and middlings may now be quoted at 10¼@10½ to 11 32d. Receipts at this port are falling off, being only about 7,000 bales in three days."

According to Mr. Abram S. Hewitt of this city, the Iron products of the world for 1755 were as follows:

England	3,585,936 tuns.	Prussia	400,000 tuns.
France	650,000 tuns.	Bal'ce Germany.	200,000 tuns.
Belgium	255,000 tuns.	Balance Europe.	119,000 tuns.
Russia	300,000 tuns.	U. S. of America.	1,000,000 tuns.
Sweden	157,000 tuns.		
Norway	22,500 tuns.	Total	6,889,406 tuns.
Austria	200,000 tuns.		

The present annual production of the world does not, therefore, exceed 7,000,000 tuns, of which Great Britain produces rather more than one-half. Assuming the population of the world to be 900,000,000, the production, and of course the consumption is at the rate of 17 pounds ₱ head. In 1746, from the most reliable data, it is evident the consumption was not one pound ₱ head.

We had the pleasure to-day of seeing Mr. Watts Sherman of the house of Duncan, Sherman & Co., who has returned from his Southern tour. He is still quite weak from the severe illness he suffered under at New-Orleans, but his friends will be glad to learn that the disease has entirely left him.

Of the Boston Money market, *The Journal* says:

"Money negotiations outside of the Banks have been at unvarying rates. The range of discount may be stated at from 7 to 8 ₱ cent on satisfactory paper, though but few transactions are reported under 7½, while at 8 ₱ cent names of desirable character are scarce. In point of fact, money is in about the same position as regards demand and supply as reported for several weeks, and until domestic exchange turns against us, it is not likely we shall witness any decided change. Our Banks now hold the largest amount of specie ever accumulated in their vaults, and their deposits are also very large. The adverse points of the market are to be noticed in the high rates of foreign exchange and danger of increased specie exports, at a period of great expansion of Bank loans in New-York. Disturbance in New-York would of course unsettle the market here at once. So far as the great financial center itself is concerned, we see no signs of contraction yet, and Bank managers in that city seem to have no idea that it will be necessary at present."

The Minnesota Mining Company's books of transfer will be closed May 20, preparatory to the payment of the first installment of the dividend of $10 ₱ share recently declared. The dividend will be paid in two equal installments, viz: $5 ₱ share on and after June 2, when the books will be reopened, and $5 ₱ share on and after Sept. 1. These dividends are from the profits of last year's business. The stock of this Company was sold at $5 ₱ share a few years ago, and those who have held on can now realize very handsome profits, if they wish to sell, at $80 ₱ share.

COTTON—We have had a very heavy market to-day generally; the sales have been small; some transactions from dock are reported at 10½c. for middlings Upland. Our quotations must be considered entirely nominal. The week's business is estimated at 12,000 bales, including 2,000 bales in transitu. The exports, 3,211 bales, including 1,972 to Liverpool, 136 to Antwerp, 362 to Naples, 368 to Norkoping, 373 to Rotterdam. The arrivals have been 5,000 bales, and estimated stock 5,000, including all on shipboard not cleared. The following quotations exhibit the rates of the most of the sales, though they are an eighth higher than the feeling at the close:

COFFEE—The pendency of an auction sale of 4,393 bags Rio, and 500 Java, advertised for to-morrow, has been influential in imparting quietness; prices are steady, and stock of Rio 49,713 bags. The only sales we hear of are 1,200 mats Java at 14@14¼c.; 50 bags Laguayra at 11½c., and 118 Rio at 11¼@11½c.

COPPER—New Sheathing is in fair request at 32c. Taunton Yellow Metal in moderate supply: sales at 26c., 6 mos. Of Old Sheathing, sales were made at 27c., cash.

EARTHENWARE—Business continues active, and many of the merchants are much behind hand in filling their orders. Prices, with the exception of one or two leading articles of common ware, are lower. The stock afloat is large, and when thrown upon the market prices must recede still further. The arrivals in prospect are large, and there are indications that this branch of trade will suffer some this season from an excess of supply.

FLOUR AND MEAL—There is little change to note in the value of Western Canal Flour; the demand is fair, and the arrivals are limited, especially of State brands; the medium grades are in fair request for export; these are firm and not plenty; the sales are 8,000 bbls. at $5@$5 62½ for interior to good brands Michigan, $5 37½@$5 87½ for common to good State, $5 62½@$6 25 for common to good superfine Indiana and Upper Lake; $5 87½@$6 31½ for common to good Ohio; $6 43½@$6 93¾ for common to fair brands extra Ohio; $7@$7 50 for fair to good extra Ohio and $7 12½@$10 for St. Louis brands. TEAS—Since the auction sale on yesterday the business has been but moderate at private bargain; desirable medium grades of Young Hyson are not plenty and are wanted; in fact the assortments of medium grades generally do not offer a choice selection. Blacks are held firmly, the stock of Oolongs is mostly of medium qualities and grades above the lowest class; fine grades are scarce in importers hands. During the season jobbers have been free purchasers in view of the low prices of some grades Greens, they have also sold freely to the country dealers, who have been disposed to operate liberally. Upon the whole the supply of Greens in importers hands, in view of the absence for some time past of arrivals and frequency of the auction offerings, has become much reduced. Several vessels are soon expected with, we are informed, well assorted cargoes. The only sale at present advertised for this season is announced for Friday.

REMARKS UPON BEEF CATTLE.

Our report shows the increase of receipts of Beeves, for the week, in the whole city, upon the weekly average, at 684 head, and 987 more than last week.

The number at market to-day is 3,345 head, which is 1,467 increase on the average, which was 1,878 for each market day last year, and 840 increase upon the number sold last Wednesday and the day previous.

The names of owners of the principal droves are given below, and name of State where cattle are from. The names of salesmen, other than owners, are "Cattle Brokers," who sell on commission for drovers or farmers.

A glance at our table of receipts of Beef Cattle for the week, and the number in market to-day, will give the distant reader, who keeps himself informed of the number required to keep up a fair supply, a pretty full understanding of the state of trade without reading any of our comments. No market day for more than a year and a half has found as many Bullocks in the pens as to-day, and only once in the year 1855 did the number reach 3,400 head, and no day in all that, or the previous two years, did the average weight and quality of the Cattle equal this day. In fact, the quality of the Cattle sold here for two or three months past has been better by a wide difference than for several years past.

On the 16th of May, 1855, there were 1,481 bullocks in market, and the current price was 12½@15c ₱ ℔. To-day there are 1,864 more than that day, and the price is generally 9@10c., with a dull sale. On the 15th of May, 1854, there were 2,233 head, selling at 9½@11½c., which was the lowest market of that month. With the average price to-day at 9½c., the butcher gets better estimate of weights and much better quality of meat.

The weather to-day is clear and cool and remarkably favorable to owners of cattle, or their losses would be much more severe than they are, and some of them are not light. Many of the cattle are bought at the West at 4c. ₱ ℔, live weight.

These will sell for but little more than cost, losing the transportation. We learned the loss on one drove was $900, and on another $444. The owner of the latter was offered $69 a head at Albany, but as that would not pay cost, he brought them here and sold them at $66 to a farmer. Several other lots were taken for the purpose of driving to the country, and unless owners accepted the offers of buyers for that purpose, the indication at 3 o'clock was that a large number must remain unsold, since the supply is entirely beyond the wants of the city, which does not require a large stock of fresh beef at this season, and particularly this week.

There were very few extra good bullocks in market, or but one or two droves that excelled the general average, and we did not notice but one drove of a decided scallawag order, and these, singular as it may appear, came from a part of Illinois where the grass is just springing up in unconsumable quantities, and where corn is worth 10c. or 12c. a bushel. This drove is said to be owned by John Foley of De Witt County, whose name is evidently misspelled, since another *l* should take the place of the *e*. The 56 head were sold to a speculator at $62, who will probably make about $5 a head out of pocket. If the young man who fed these cattle is not satisfied with this trip, we advise him, in Western phrase, to "pick his flint and try again."

D. L. Belden has about as good a drove of beeves as there are in Market to-day, from Logan Co., Ill., where they were fed by P. R. Marquet. They averaged 15 cwt. at home, and are rated at 7¼ cwt. net here. They were sold at Albany at $75, and are expected to retail to-day at an average of $78. Wm. Moore bought 12 at $97, and Wm. Cornell 20 at $84. The drove left Lodi on Ill. Central Road, May 2. Expense to Albany $15. Belden sold a drove of 64 from Illinois, by Norman Felt, at $65—9½c. buyer's estimate. These were good fair average quality.

Culver, Hurd & Co. are selling a drove of 80 head of common Illinois oxen and steers, owned by Samuel Scripture, that were fed at the Elgin Distillery, at prices indicating an average of $72. They are generally in fair order, but some of them pretty coarse, and not of a quality sought after by our best butchers. The best price is 10c., and down to 9c. This drove left Elgin two weeks ago, and came by Detroit, Suspension Bridge and Albany, at $13 a hundred, freight.

C., H. & Co. also have 103 good Ohio steers, bought of S. M. Baker, estimated to average 7½@7¾ cwt., and will sell for an average of $75.

Geo. Ayrault has 200 of a similar description of cattle owned by John Morriss, fed at a distillery a few miles below Elgin, that he estimates at 6½ cwt., and may average $62½. They sell at 9@10 cents.

Ayrault sold through the week, mostly on Friday, 89 good Ohio steers, owned by Wm. Clark, at 10½c., averaging about $69.

Mead & Holcomb have 119 head from Rush Co, Ia., by Dobenspike & Lott, part of which were fed by Mr. D., and are very good, that is for Indiana stock. Some of the others ought to be in Indiana to-day, or somewhere else where they could eat instead of being eaten. Sales average less than 10c.

Miller, Haring & Gurney are selling 81 for Snyder, and 69 for Monett, at 9@10c.; dull sales, with a few very choice, perhaps, at 10½c. Part of the sales were made yesterday and Monday, at Bergen.

Geo. Haws bought the best pair of oxen we saw to-day, at $240, which was not over 10½c.—some said 10. They were out of a first-rate drove, bought by Valentine & Martin of John W. Goodwin, who fed them in Vermillion County, Illinois, and certainly fed them well. They are estimated to average 7¼ cwt., and sell at an average of 10c.

Hoag & Sherman have two droves from Illinois, by Hutchings, 6½@7 cwt. average, the best of which are selling at 10c. Chas. Cooper took a lot at $70, fat but a little coarse, that we estimate not over 9½c. David Allerton bought 20 at $70, called 7 cwt. average.

John A. Merritt is selling a drove of 116 for John P. Mouser, from Pickaway Co., Ohio, which they left last Thursday week. They are estimated to average 8¼ cwt., and the best are selling at 10c. Part of this drove stopped at Campville, on the Erie Road, and the owner commends all drovers to rest their cattle at that excellent stopping place.

T. White & Son are selling two good Illinois droves, one owned by Harris & Reed and one by Ulery, at an average they think half a cent below last week's prices, though a few very choice sold at 10½c.

Wm. H. Belden is selling 84 for Henry Jacoby, of real good well fed Illinois steers, estimated to average 7¼ cwt. and not over $75. L. Beers bought 10 fat ones, estimated 8½c., at less than 10c., for the New-Haven market.

R. Murray is selling a fat lot of Chittenango still fed cattle, oxen and steers, estimated to average 9 cwt. According to sales we noticed, they will fall considerably short of 10c. at that estimate, and they are generally choice, good beef.

Charles G. Teed is selling a drove for Reed & Harris, of tolerably fair Illinois steers, at less than an average of 10c., say 9½c.

Thos. Wheeler is selling a drove for Willis from Fayette Co., Ohio, that left Columbus a week yesterday, and finds dull work at 10c. for the best. Wheeler bought a drove for his farm, of Wm. Ford, at $66, mostly Kentucky grade Durhams, growing, sappy steers, much more fit for the pasture than the shambles.

Phillips & Vail have 100 fine steers and oxen from Iowa, that give sure indication of coming from a rich corn country. The drove will average 10c., as all but thirty of the best sold for that before noon. One yoke of oxen in this drove, one from Nebraska Territory—the first undoubtedly were in market from "the far West."

The sales of Cattle for Boston this week were much less than the week before. The only sales of Western droves at Albany we could hear of were the following: Wm. Florence, 100 head, very choice, fed by his brother, Pickaway County, Ohio, at about $95, or full 11c. A small drove sold by Bedford at $100; and another by H. C. Moreland, Kentucky Durhams, at a better price than he would get here to-day; and a few others, in all about 300.

There is a dissatisfaction growing upon the subject of a fixed market-day, since sales are made here now almost every day in the week, as drovers and butchers and most of the brokers say, to their mutual disadvantage, without a corresponding benefit to any party.

It does seem to us since we have a fixed day, and that is generally understood as the market day, that the interest of all parties would be promoted by concentrating the business upon that day as much as possible, so that all the buyers meeting together at one time would give all equal facilities to get good stock, and and at the same time afford the seller the advantage of greater competition. It would also be a great saving of time. If there is any advantage in spreading the sales over seven days of the week, to any body, we fail to see it; while the disadvantages are very apparent.

SHEEP AND LAMBS—The supply of Sheep continues entirely inadequate to the wants of the city, and the quality, as a general thing, is poor in a superlative degree. The stock of Lambs coming in is very meager, and they are of a size so small that it seems like destroying good seed to kill them before they attain more growth. Most of the Sheep received at Browning's the past week came from Philadelphia, and nearly all unshorn. There was an arrival this morning of 400 very good stock from Ohio, in good order. Previous to that, the pens were empty. Later in the day there was another arrival of 325 sheared Sheep from Ohio, and about 50 head from this State, and 20 Lambs from New-Jersey, making a better supply than we have seen at one time for some weeks.

SHEEP BROKERS'S SALES.

A lot of 123 head of Ohio Sheep from Logan County were sold by Hume & Baldwin for $917 75, averaging $7 46, which indicates a remarkably good drove or a very great price. They also sold 162 for $931; 80 for $490, and 16 for $50. Of course the last were not fit for mutton, because anything that is will bring more than $3 a head.

James McCarthy, at Browning's, sold 1,021 head for $5,397, averaging $5 29 ₱ head. One lot of 31 Sheep and Lambs sold for $183; another lot do. 82 head for $638 50.

MILK COWS—Probably more than three fourths of the cows sold in the city this week went to Long Island. The low price of beef has affected the price of cows, though good ones will always find buyers at fair prices.

VEALS—There is nothing worthy of notice in the market in relation to calves this week. Large as the supply is now, there seems to be no difficulty in finding buyers at some price for all that come, dead or alive, whether fit for human food or not fit for the hogs; and all sell, too, without a single bleat from the city law-makers.

SWINE—There is no material difference in the market for hogs this week from last. The state of the market will be seen by the following report of sales of two average lots by Miles & Bartlett, No. 292 Washington street: 148, J. Hussey, Hendricks County, Ia., average 150 lbs. gross, price 6½c; 243, F. Weatherly, Morrow County, Ohio, average 140 lbs. gross, price 6 33-100c. Stock hogs are in demand at 7c., or a little higher for first quality.

Philadelphia Cattle Market......MAY 14.

The market yesterday and to-day was but little changed since the last report.

BEEF CATTLE sold readily at from $9 to $10 75 ₱ 100 ℔. The number sold was 1,800 head, 500 of which were disposed of at Wm. L. Torbert's Avenue Drove Yard. A fine lot was sent on to New-York.

SHEEP—The sales of Sheep amounted to 5,000 head, at from 5 to 6c. ₱ ℔, which is a slight decline.

HOGS—There were about 1,100 head in all the pens, all of which were sold at from $8 to $8 50 ₱ 100 lbs.

COWS AND CALVES are still in good demand, and 125 readily sell from $25 to $70; good Springers bringing the latter price.

Markets....*Reported by Telegraph.*
