assurance that the passage by that Isthmus will be kept free from obstruction, I am prepared to receive any proposition which the authorities of that Government may see fit to make, and to open the communication forthwith, if any arrangement can be made which shall afford the requisite security to passengers and property, and sufficient Governmental protection to the several interests involved. Very respectfully, your obedient servant,
C. VANDERBILT, President.

PARKER H. FRENCH, Mansion House, New-York.

Up to 11 o'clock on Tuesday there had been paid to the creditors of the late Republic of Texas, under the act of Congress of February 28, 1855, $1,359,324 12. The amount appropriated was $7,950,000.

Mr. O. D. Ashley has commenced the publication of a business circular. Mr. Ashley, who is well and favorably known as a commission broker, and also as the President of the Boston Stock Exchange Board, appears to be thoroughly informed in regard to all matters appertaining to his active profession. Among the subjects treated of in the present circular are the Boston and New-York money markets, railroad matters, bank statements, sub treasury, specie, currency, exchange dividends, imports, exports, and foreign finances.

The Syracuse and Oswego Railroad, on Monday, declared a dividend of 4 ⅌ cent. on the capital stock.

There is fair activity in Land Warrants at 90c @ $1 ⅌ acre, according to size. The supply is in advance of the demand.

The Baltic to-morrow will take but a small amount of Gold. Only $200,000 were engaged at the office of the ship at half past 4 o'clock this afternoon.

The business of the Clearing-House to-day was $20,253,853.

The amount of money brought by emigrants into the country in May was, according to the report of the Emigrant Commission, about $2,000,000. This source of supply of the precious metals is almost entirely overlooked, although it is one half as large as the monthly receipts from California.

The supply of money on call is superabundant, and we have heard of several loans to-day at 5@6 ⅌ cent. The current rate, however, is still 7 ⅌ cent on stock loans. The Banks and the large houses have to look up borrowers instead of waiting for them. Paper is in moderate supply and good demand at 7@9 ⅌ cent.

The recent distillation of benzole from Breckenridge coal in great purity and strength has given a new impetus to the use of this substance for illuminating purposes. One difficulty heretofore has been the obtaining of pure benzole in sufficient quantities. These machines are very useful for lighting country houses where the gas in common use in cities cannot be obtained. *Thompson's Reporter* says in reference to this matter:

"Breckenridge benzole light is the perfection of artificial illumination. All the apparatus of a perfect gas works takes up less room than a six gallon keg. No fire or heat is used. The benzole is put into a vessel, air is forced in at the bottom, which, in passing through the benzole, becomes so charged with gaseous matter that it is a burning air. A pipe is affixed to the top of the vessel, through which the benzoled air is carried to the burners in the same manner as gas. The whole machine is as simple as a Yankee clock, and is as safely and easily tended. The light is superior to gas, and less expensive. This light, and also the Breckenridge luminating oil, can be seen burning at our office."

The advices by the Niagara are financially favorable. The London Money market was considerably easier, in consequence partly of the repayment of four millions pounds deposited on the bids for the new loan. *The News* of Friday says money in the Stock Exchange was remarkably abundant, and loans on Consols were made at 3 ⅌ cent. In the Discount market the rate for good bills was 5¼ ⅌ cent., which is ½ ⅌ cent below the Bank rate. The demand was good for bills at this rate. It was anticipated that the Bank must soon reduce the rate of interest.

The return from the Bank of England for the week ending the 17th of May gives the following results when compared with the previous week:

Public deposits	£2,991,936	Decrease	£41,632
Other deposits	12,351,097	Increase	1,737,483
Rest	3,249,963	Increase	10,586

On the other side of the account:

Government securities	£12,734,416	Decrease	£133,236
Other securities	16,110,812	Increase	1,413,865
Notes unemployed	3,156,675	Increase	445,986

The amount of notes in circulation is £19,437,040, being a decrease of £505,790, and the stock of bullion in both departments is £9,801,860, showing an increase of £23,270 when compared with the preceding return.

The following table will show the fluctuations in Consols since the 16th inst.:

	For Money.			For Account.		
May.	Low'st.	High't.	Clos'g.	Low't.	High't.	Closing.
Sat. 17	93⅞	93⅞	93⅞	94	94	94
Mon. 19	94	94⅛	94⅛	94⅛	94⅛	94⅛
Tues. 20	94⅛	94⅜	94⅜	94⅛	94⅜	94⅜
Wed. 21	94⅛	94⅜	94⅛	94⅛	94⅜	94⅛
Thur. 22	94	94⅜	94⅛	94⅛	94⅜	94⅛
Fri. 23	94⅛	94⅜	94⅛	94⅛	94⅜	94⅛

The new loan was taken at 93, and the scrip was selling at 1⅛@2 per cent. premium. The Eagle, from Australia, had brought £266,000 in gold, which had all been taken by the Bank. The Bank had also purchased £100,000 from another source. The demand for France had ceased. A further amount of £280,000 of Australian gold was near at hand. The amount of £400,000 remaining due on the Turkish loan would not be sent from England, but would be paid from the British Commissariat chest in Turkey, which had an accumulation of about £600,000.

At Hamburg the pressure for money has partly subsided and the rate of discount, which was recently 7, is now 6 ⅌ cent.

The advices from Vienna mention the death of Baron Sina, the well-known banker of that city, and one of the wealthiest men in Europe.

In regard to American Securities Mr. Satterthwaite's Circular says:

"There has been a quiet market for American Securities in London during the past week. We note a few small investments in the Bonds currently dealt in, of well-established railroads, but the supply is fully equal to the demand. The non-payment of the coupons of some of the western lines, the Bonds of which have been largely placed in Germany and Switzerland, has created a somewhat unfavorable feeling toward American Bonds, and induced sales. The disposition to take hold of the Bonds of new lines at low rates has been materially lessened by these circumstances, and as the unfunded securities maintain a high price, investors seem to prefer home Stocks, where a rapid advance on the capital can be obtained."

The market for American securities is described by Messrs. D. Bell, Son & Co., as very quiet, scarcely any alteration in prices.

The Times of Friday 23d says:

"The Bank of England have to-day reduced their rate of discount for bills having more than 60 days to run from 7 per cent to 6 per cent. For bills below 60 days the rate remains at 6 per cent, and there will therefore now be no distinction between the two descriptions.

"It was on the 15th of October last that the rates were put up to 6 and 7 per cent. They have consequently been in operation more than seven months. All exceptional influences being now removed from the money-market by the conclusion of the peace, a gradual return to the charges of ordinary times may be looked for, and the only points to challenge the attention of traders and capitalists will be the prospects of each yearly harvest and of the drain upon our capital for schemes of foreign improvement. With regard to the first of these, everything at present is encouraging, while the danger even from the possibility of any failure is greatly lessened by the reestablished freedom of supply from Russia and the Danube. In connexion with the second, although the ultimate consequences of the system of guarantees to public companies from the various European Governments are perfectly plain, they are not likely to manifest themselves in any adverse manner for a year or two or more, and hence no person will be led upon to take them into immediate calculation. Consequently from this date the reestablishment of a safe and untroubled money-market, so far as such a state can be considered to exist at any time, will be held to have taken place."

Southern Flour is without important change, the arrivals are not large, and good brands are held with confidence; the sales are 1,400 bbls at $5 90@$6 50 for mixed to good standard brands Baltimore, &c., and $6 60@$8 90 for fancy and extra brands, and $10 75 for Gallego and Haxall. Corn opened firm, but at the close was heavy and rather easier; prime shipping qualities are not very abundant however; sales of 37,000 bush. at 44@47c. for distilling; 50@53c. for mixed; 54@57c. for Southern White and Yellow; and 54@58c. for Round Yellow and White.

HEMP—The market is very firm for American, owing to the light stock, transactions are therefore limited. At St Louis the demand is very active and the stock on hand is light, the demand being fully equal to the supplies; sales for the week, 1,582 bales fair to prime New at $125@$135—most y $127@$130—including 40 bales Old at $145 and 30 bales Hackled at $175 ⅌ ton. Foreign is inactive.

HIDES—The market remains unsettled and prices are depressed, but holders at present are storing their Hides sooner than offer them at any further reduction. Sales of 3,000 wet-salted California 50 lbs. on private terms; 2,000 Porto Cabello 22 lbs., 18c., rejecting water-damaged; and 3,000 Carthagena 24 lbs., 14@15c., 6 months, rejecting water-damaged. Beef is in fair request and is steady; the sales are 700 bbls. at $7@$8 for Prime; $8@$9 50 for Country Mess; $8 50@$12 for Repacked Mess, and $12@$13 for Extra. Prime Mess Beef is quiet at $15@$18. SPELTER is dull and prices are lower; Plates are freely offered at 6c. ⅌ lb, 6 months, without attracting the attention of buyers.

SKINS—Sales of 2,000 lbs South-western Deer have been made for export at 35c.

SALTPETER—The stock of Crude is reduced and holders show less anxiety to sell; sales of 15 bags at 8½c., 4 mos.

SHOT—Drop and Buck are selling in moderate quantities to the trade, as wanted, at 7¼@7½c., cash.

SALT—The market is lower for Liverpool Fine; sales of 650 sacks Ashton's $1 50 cash, and 6,000 bush. Ivies on private terms.

SOAP—We notice further sales of 260 boxes Castile at 10½c.; New-York Pale at 5@7c.

SUGARS have not changed; the advance since yesterday morning is ½@¾c., and up to the close prices were buoyant at the improvement. The stock offering is comparatively light—over 10,000 hhds. are held by speculators—and the scarcity in both grocers' and refiners' hands fosters the general conviction that prices have not yet reached the zenith of their highs. Refined goods are very scarce, and several of the most prominent manufactories have stopped selling ahead. Assorted Hard Sugars have sold at 11c. The present quotations of the New-York Steam Sugar Refining Company are as follows: Loaf, 11½c.; Crushed A, 11c.; Powdered, 10¾c.; Granulated, 10½c.; Crushed Circle do., 11½c.; do. New York, 11c.; Powdered, 11c.; Granulated, 11c.; white coffee Circle A, 10¾c.; Yellow do., 9@9½c. These prices show an improvement on this day week of ½c., and ¾@1c. on our last quoted rates. The sales are 1,000 hhds., mostly Cuba, at 7¼@8¾c.; 100 boxes Havana at 8c.

TOBACCO continues quiet; buyers are holding off for easier prices; sales of 60 hhds. Kentucky at 10@30c.; 8 old do. at 8c.; 225 bales Havana at 21@24c., and 61 cases Seedleaf at 7@14c.

TIN—Pig is quiet but firmly held; Plates are in good supply and prices are receding; 1d X is selling slowly at $11 50, and Bars at 26½c. The market generally is inactive.

WHISKY—The market is better, with sales of 400 bbls. at 25½@26c. cash, and Drudge at 25c., time and interest.

WOOL—The market remains wholly inactive. The shearing season has now fully commenced, but it is somewhat retarded by the heavy rains of the past week. At present the attention of dealers and manufacturers is directed toward the interior, and much interest is felt with regard to the opening rates. From present indications the chances are that prices will open at an advance of 5@6c. on last year's opening rates. From Liverpool we have information that the London sales were progressing. The attendance was large, and many of the Continental buyers purchased freely. The selection was very good, and prices advanced 1@2d. ⅌ lb on Sydney and Australian Wools. The sales were to be prolonged until the 4th inst. Foreign is moderate demand and prices are very firm; sales of 75 bales Buenos Ayres, Entre Rios and Cordova at full prices.

TEAS—We are now on the verge of the close of the Spring business—some two or three public offerings will doubtless wind up the activity for the season. A retrospective glance over this wide field of interest reveals a season of equal prosperity to any for many years. Generally, we think, prices have been lower; but the profits have not been much lessened to importers, while jobbers have had their remuneration enhanced. There is at the close of this busy season a fair supply in importers' hands, and the trade generally are well stocked with choice assortments. The auction sale this morning proved heavy; the catalogue was chiefly composed of scrawings of old and new crop Greens, mostly low grade Young Hysons, which declined a trifle. In Blacks there was but little spirit, and prices gave way fully 1c. ⅌ lb from last sale; but a portion of them were withdrawn, while the Green were largely withheld, a large portion before the sale opened—closing at private, steadily, but quietly.

ZINC—A sale of 120 casks Mossel man have been made at 7½c., 6 months, but at the close the market was heavy.
