and when she has been stopping everywhere. Don Carlos says, that all the stirring reports that have been so rife originated about the invasion of this country, are pure fy imaginary. To speak to a Costa Rican of a second invasion of Nicaragua is so much of an insult that the subject is never alluded to. Any actual attempt to get up an invasion, would probably result in a revolution against the home Government.

The town of Guanacaste is reduced in population fully one third. The cholera and dysentery have swept the people away by scores. The best idea that can be given of its prostration, is the fact that while the epidemic raged most powerfully, Gen. Canas himself engaged in digging graves, and his adjutant acted as sextman.

Gen. Canas has gone into the interior, leaving Guanacaste occupied by forty men, with a picket guard of fifteen or twenty men, both at Sapon and Salinas. Two or three American deserters had passed through Guanacaste, but they were suffering from want of clothing and food, and the natives are frightened from rendering assistance by the chances of their being made to account to this Government for aiding such men to escape.

CITY ITEMS.

AMUSEMENTS.—This evening the Fall season is inaugurated at several of the Theaters, the managers of which have all made unusual preparations to carry on the campaign with all the vigor and spirit permissible in a friendly struggle for the greatest share of the regard of the fickle public. The new accessions to the several companies are, in the main, performers of sterling merit and established reputation. To borrow the imperious directions of the posters, "for particulars, see small bills."

Academy of Music—Max Maretzek, the indefatigable, commences a short Operatic season this evening, with "Il Trovatore," with Madame La Grange in the principal character. Sesonina Ventaldi, and Signors Brignoli, Amodio and Gasparoni, are also in the Company. With a due regard for the pockets of the public, the price has been fixed at $1.

The Summer Garden.—This evening Mr. Dion Boucicault takes his benefit, and presents his latest play, Victor and Hortense, with the legendary drama of the Phantom, in both of which pieces Miss Agnes Robertson appears. No further announcement is required to crowd the house.

Mr. Brougham begins the Fall season at the "Bowery" to-night with a powerful company, comprising many performers already well known to the New-York public, and also several names with which we are not familiar. The play is the Lady of Lyons, with Miss Fanny Morant as Pauline, this being the first occasion of her appearance in this city. The part of Claude Melnotte will be enacted by Mr. Carlton Howard, who is not personally known here. Mr. Davidge will, in the afterpiece, give his popular rendition of the Wandering Minstrel, Jim Boggs. Attached to the establishment is also a full and effective ballet corps. Mr. Brougham announces as in course of preparation a number of new pieces, among which is the Second of the burlesques on Indian subjects, which he calls Met-a-mo-ra, or the last of the Pollywogs. If it is only half as witty as Pocahontas, it requires no prophet to predict an immense popularity.

Mr. Hackett will on the evening of Tuesday, (to-morrow), give his excellent delineation of Falstaff, in Henry IV., at the Academy of Music. He will be supported by an effective company, among whom the names of James Wallack jr., George Jordan and Mrs. Vernon are conspicuous.

At Niblo's Garden Mr. Burton will play for two more nights, this evening and Wednesday, after which he leaves the field to superintend the arrangements of his own establishment, which will open one week from this evening.

The American Museum.—The regular dramatic season of this establishment also begins to-night. In the afternoon Mr. Lionel Goldsmidt gives his curious recitation or monologue, which he calls "At Home and Abroad, or the Adventures of a Gentleman in Many Lands." In the course of his entertainment he gives a great many excellent imitations of the peculiarities of individuals, and of the natural language of animals. The dramatic performances of the evening commence with the five-act play of "Money." The company comprehends most of the old public favorites of former seasons, and the pieces here presented will be as acceptably and effectually done as they have been heretofore. Mr. C. W. Clarke is still the leading actor, and we can commend him to those who do not already know his merits as a careful and excellent performer.

CITY MORTALITY.—The report of the City Inspector exhibits a further improvement in the public health, as compared with the record of the mortality of the week previous. The following are the figures for the week ending August 30, 1856: Men 67, women 58, boys 220, girls 217; total 562—showing a decrease of five deaths. The following were among the principal causes of death the past week: Consumption 41, cholera infantum 37, cholera morbus 3, convulsions (infantile) 48, diarrhœa 39, dysentery 24, debility (infantile) 13, inflammation of the bowels 9, scarlet fever 7, measles 3, marasmus (infantile) 45. There were also four deaths of apoplexy, 8 of congestion of the brain, 29 of dropsy in the head, 5 of typhoid fever, 6 of typhus fever, 1 of yellow fever, 12 of whooping-cough, 10 of inflammation of the brain, 6 of intemperence, 3 of palsy, 7 of teething, and 6 of small pox, 9 premature births, 30 stillborn, and 20 deaths from violent causes. The case of yellow fever mentioned above was that of a bookkeeper of a firm whose vessel, arrived from Havana, he had visited at Quarantine. The following gives the classification of diseases, and the total number of deaths caused by each disease: Bones, joints, &c., 2; brain and nerves, 113; generative organs, 4; heart and blood vessels, 7; lungs, throat, &c., 77; old age, 2; skin, &c., and eruptive fevers, 21; stillborn and premature births, 36; stomach, bowels, and other digestive organs, 245; uncertain seat and general fevers, 49; unknown, 2; urinary organs, 1. The nativity table gives 459 natives of the United States, 65 of Ireland, 24 of Germany, 6 of England, 1 of British America, 7 unknown, and the balance of various European countries.

AN AGED WOMAN RUN OVER AND KILLED.—On Saturday morning an Irish woman named Bridget Fitzgerald, who resided at No. 73 Washington street, was run over at Washington Market by a wagon driven by Mr. Ezra Woolsey, a farmer from Long Island, and almost instantly killed. The deceased having seen a head of cabbage fall from Mr. Woolsey's wagon, attempted to pick it up, and in doing so fell before the wheel, which passed over her abdomen. Her remains were conveyed to the Third Ward Police Station. Mr. Woolsey was arrested and detained till an investigation could be had before Coroner Connery. The occurrence, doubtless, was purely accidental. Mrs. Fitzgerald was 75 years of age.

CORONER'S INQUESTS—*Suicide.*—Coroner Connery held an inquest at No. 279 Tenth street, upon the body of a German, named Adam Fretlz, who committed suicide by cutting his throat with a razor. The deceased had been sick for some time past, and was very melancholy in consequence. It was very evident that his illness led to the commission of the rash act. The jury in this case rendered a verdict of suicide. Deceased was 56 years of age.

Camphene Accident.—An inquest was also held by Coroner Connery upon the body of a woman, named Elizabeth Baker, living at No. 209 Avenue B, who died from the effects of injuries received by the upsetting of a lighted camphene lamp. The jury rendered a verdict of accidental death. Deceased was 25 years of age, and was born in Germany.

Fatally Injured.—An inquest was also held at the New-York Hospital upon the body of a colored man, about 50 years of age, named Henry Rempson, who died from injuries accidentally received by being crushed by the falling of a safe upon him while it was being lowered into the City Hotel, corner of Broadway and Howard street. Verdict—Accidental death. The deceased was a native of Orange County, N.Y.

Found Drowned.—Coroner Connery also held an inquest upon the body of an unknown man, about 25 years of age, who was found drowned at the foot of Jamaica slip. The deceased was about five feet seven inches high, and was stout built. He wore a silver ring on his hand. Verdict—Found drowned.

PROBABLY FATAL FIGHT BETWEEN BOYS.—At a late hour on Saturday night a probably fatal affair took place between two German boys named Max Overdorf and Isaac Fry, in which the former was severely stabbed by the latter. The boys, it seems, had a fight in the early part of the evening, when Fry was severely punished. But he was not satisfied of his adversary's strength, and accordingly he met him at the corner of Second street and Avenue C about 12 o'clock at night, and there assaulted him with a jack-knife, inflicting a deep stab in the side between the sixth and seventh ribs. Overdorf cried out "Murder!" when the Eighth Ward police came up and took him to the Station-house. Took fever found a home in the wound when the officer charged. The District Surgeon dressed the boy's wound, and gave it as his opinion that it might prove fatal. Coroner Connery, being informed of the occurrence, proceeded to the residence of Overdorf, and held an extra mortem examination. Fry was brought before the wounded boy, and, on being examined, he admitted having committed the assault, but said it was done in self-defence and in the moment of great passion. He further said that Overdorf had beaten a younger brother of his, and had also treated him rather badly. The facts, as related before the Coroner, were the same as given above. The accused was then committed to prison to await the result of the injured boy's injuries. The parties are all under sixteen years of age.

BRUTAL OUTRAGE AT YONKERS—FORCIBLE VIOLATION OF THE PERSON OF A YOUNG LADY.—The following details of a most abominable and disgusting outrage, which was perpetrated at Yonkers, on Saturday, the 23d inst., have been furnished to us: On the afternoon of the day a respectable young lady, aged between 14 and 15 years, whose father was about to remove West with his family, was to the following Monday went out for a walk. When she had reached Warburton avenue she was met by a young man with whom she was acquainted, and who was on intimate terms with her parents. After the usual salutations had been exchanged between them, he joined her and strolled through the village, and down below it toward the railroad line. Here, when in a secluded spot, they were met by two young men, friends of the lady's companion. In a moment the unfortunate girl was seized, thrown on the ground, and held down by two of the friends, while the third ravished her person. This was repeated until each of the three miscreants had gratified his brutal desire. They then left their victim, who was found there in a pitiable plight by her father and some police officers, at 4 o'clock in the evening. All the young men have been arrested, and Justice Smith is now holding an examination into the particulars of the case. [Herald.

FOUND DROWNED.—The body of an unknown man was this morning found floating in the slip foot of Pier No. 32, East River.

RUFFIANISM.—An adventurer from Nicaragua took occasion, while half intoxicated, on Saturday night, to slap the face of one of the patrons of the hotel and present a pistol at his head. The police were not to be found, so the rowdy succeeded in escaping from the premises.

THE FORT HAMILTON MIRACLE.
"My dear friend," exclaimed a gentleman yesterday in the street, meeting another traveler by the hand, "I heard that you had died of yellow fever."
"Not exactly" was the reply, "though I had a good, steady stare in Death's serious face last week down at Fort Hamilton."
"Gracious Heavens! what a narrow escape."
"Yes, you may fairly look on me as a sample of a resurrection. For three days I sat, as it were, on the edge of the grave, contemplating how a man of my size would look inside of it."
"Horrible! and yet you live!"
"Thanks to this!" he exclaimed, drawing a small vial from his pocket and holding it up, while its contents sparkled in the sunlight."
"What! that! why I thought that powerful stuff only cured you of the scrofula."
"So it did. I was afflicted from birth, and two bottles of it completely expelled the scrofulous taint and symptoms from my flesh and bones. I caught the fever and ague, and one bottle thoroughly settled that. But, worse than all, I took the yellow fever; I swallowed some of the contents of three bottles; my friends drew all around me; here I lay."
"Amazing! and what in the world is the name of the extraordinary liquid capable of performing such miracles?"
It was Dr. Henry Anders's IODINE WATER. Sold by Anders & Fosdick, No. 372 Bdway., and No. 252 Broadway, and by all respectable Druggists.

SECURITY AGAINST BURGLARS.—The ROTARY LOCK, patented by VALENTINE & BUTLER, has three essential advantages over every other door-lock in existence. 1. It cannot be picked. 2. The key is very small. 3. No two locks are alike, or can be opened by the same key. Add to this that the bolt is massive, enough for entire security, and that the Lock can be placed on any door without disfiguring it, and at a very moderate cost. For sale by VALENTINE & BUTLER, 90 and 92 Maiden-lane.

UNITED STATES COMMISSIONER'S OFFICE—Aug. 30—Before Commissioner MORELL.
THE CALIFORNIA IMPORTATION.

Throngs of "the fancy" of New-York city filled the United States offices to-day, a large number of whom, in less prosperous days were domiciled in the Tombs. They appeared glad to greet Messrs. Burke and White, and were anxious to have them out on bail. White was liberated on his own bail in the sum of $500; but Burke seemed to have fewer friends among those whose character is a pecuniary point of view was satisfactory. After the examination of several who offered themselves, Captain Rynders stepped forward, and asked if the District Attorney would accept him. "Certainly," was the reply, "if you will justify." Whereupon the Captain left in search of somebody else. Put not your trust in princes is no idle saying, if one can't trust the Captain.

UNITED STATES MARSHAL'S OFFICE—Aug. 30.
SMUGGLING.

John Woods, steward, and John Conner, third mate of the steamship Hermann, was arrested on a charge of smuggling laces and embroideries.

J. Dickey, first mate of the American brig Almine was arrested and gave bail on a charge of assaulting Wm. Carnley, a seaman, with a dangerous weapon.

COMMON PLEAS—SPECIAL TERM—AUG. 30.—Before Judg BRADY.

Martin Dobler agt. the Couthier Lodge No. 1 of the Order of Johnnitter.

Motion to discharge the order requiring the President of the Bowery Savings Bank, &c., to appear and answer concerning the property of a judgment debtor.

Brady, J.—The affidavit submitted alleges that the money deposited in the Savings Bank belongs to the Johannifer German Benevolent Society, which seems to be a corporation different from the defendant. If such be the fact, the examination of the officers of the Bank will show it and discharge the order in effect. Proceedings may be had under Sec. 294 of the Code where the defendant is a corporation. They are not against it directly, which could not be adopted (10 How. Pr. R. 487) but to ascertain whether it has money deposited to its credit and require it to respond to the judgment (12 How. Pr. R. 359.)

SATURDAY, Aug. 30—P. M.

The week closes upon a dull stock market. There is no appearance of any change for the better in the outside demand, either foreign or domestic; and some of the largest holders, under apprehension of a further falling off, have shown a disposition to reduce their line. Reading sold down to day to 84¼, closing heavy. Serious fears are beginning to be entertained in regard to the ability of this company to bring up its receipts for the year to the estimated figure. To the present time they are largely behind, with no immediate prospect of a gain. Erie closed at 30½, with sales of about 5,000 shares. New-York Central declined ½; Michigan Southern, ½; Illinois Central Construction Bonds, ½; Virginia Sixes, ½; Missouri Sixes, ½. Lacrosse and Milwaukee, and Galena and Chicago, each advanced ½. The little money seeking investment in railroad stocks seems to favor the extra Western roads. Their comparative cheapness, large earnings, land grants, &c., apparently warrant a more satisfactory future than the older eastern roads. There was no change in prices, or the tone of the market, after the morning Board.

The demand for Money continues active, with no hange in rates.

The Baltic to-day took out $203,907 in specie, which is less than was anticipated. The aggregate shipments for the week, however, from this port and Boston, do not vary materially from our estimate. The exports of specie from this port for the week ending this day, and for the year 1856, thus far, were as follows:

Steamship Alma, Havre, Am. gold	$10,000 00
Steamship Baltic, Liverpool, Am. gold	200,000 00
Steamship Baltic, Liverpool, Silver coin	3,000 00
Steamship Baltic, Liverpool, English silver	900 00
Total for the week	$213,900 00
Previously reported	22,490,010 10
Total, 1856	$22,704,910 10

Albert H. Nicolay's regular semi-weekly auction sale of Stocks and Bonds will take place on Monday next, the 1st September, at 12½ o'clock, at the Merchants' Exchange. The list will comprise about $80,000 first-class Railroad Bonds, in addition to other desirable Stocks and Bonds for investment.

After the adjournment of the Board to-day, the following sales of Bonds were made at auction by Adrian H. Muller:

$13,000 Chicago and Miss. R. R. 1st Mort. 7s, int. a bond	53
7,000 Chicago and Miss. R. R. 2d Mort. 7s, int. added	20

The 8 ⅌ cent. First Mortgage Bonds of the Milwaukee and Horicon Railroad Co., to the amount of $420,000, we notice will be disposed of at auction to-day, at 12½ o'clock, at the Merchants' Exchange, by Messrs. Anthony J. Bleecker & Co. These securities are a first lien on 42 miles of the road between its junction with the Lacrosse and Milwaukee Railroad, in villages of Horicon and Berlin, and one well worthy the attention of our capitalists, the road being under the management of shrewd, practical business men, and running through a district of country unequaled for fertility and resources in the flourishing State of Wisconsin, while the earnings of fifteen miles of the road, three months prior to May 30, show a much larger amount in proportion to its length than was earned by the Milwaukee and Mississippi Railroad during the corresponding months of its operation in the year 1854.

The Imports other than Dry Goods for the week were $2,501,634, against $1,002,509 for the same week last year. Included in the amount was Bristles, $25,763; Books, $20,252; Buttons, $22,692; Coffee, $146,791; China, $19,137; Cigars, $42,625; Coal, $26,250; Quinine, $20,670; Furs, $75,602; Mirror Plate, $20,624; Fancy Goods, $19,092; Dressed Skins, $48,726; Undressed Skins, $133,678; Cutlery, $54,726; Hardware, $41,261; Guns, $20,099; Iron, tuns, $34,672; Railroad Iron, $62,047; Lead, pigs, $40,513; Steel, $27,206; Tin, plates, $37,561; Zinc, $39,797; Molasses, $49,769; Sugar, hhds., $548,029; Sugar, boxes, $60,476; Salt, $24,256; Tobacco, $22,182; Toys, $22,199; Tea, $304,636; Rags, $22,516; Watches, $25,163; Wine, $30,421.

The Exports of the week were $1,080,114 against $883,855 same time last year, including—

Cotton	$70,555	Corn	$26,500
Flour	197,243	Tobacco	27,318
Wheat	40,799	Naval Stores	31,987
Corn	39,195	India-rubber Goods	19,695

The work on the Northern Central Railroad, between Millersburg and Bridgeport, Pa., is so far advanced as to insure its completion by the 1st of October next. The Lykens Valley Railroad Company, anticipating this result, have at this time a large force engaged in building sidings and turn-outs by which to connect with the Northern Central Road, at the lower end of Millersburg, where the union of the two roads will be made to accommodate the coal business. Between Millersburg and Trevorton the work is also going on well, and it is hoped that it will be completed by December. The Trevorton Company are having 1,000 coal cars constructed for use upon the road.

The Lake Superior Journal of the 23d inst. furnishes the following intelligence relative to Upper Mining operations:

"We have encouraging accounts from the copper mines of late. The stock of several mines has advanced considerably, and there is an evident anxiety to purchase among stock-jobbers. The Clark Mine has lately received a visit from its French proprietors, and we understand has met with their highest approval. This mine has of late turned out several tuns of copper, and its present indications are every way encouraging. We are glad to see this, and hope to hear of more of the same sort from the Keweenaw Mines, for we have good reason to believe that as good mines exist on the point as elsewhere and will sooner or later be developed. The Central Mine is looking up still, and gives every evidence of a bona fide mine, her lower levels having improved the appearance and richness of the mine very much, from the abundance of copper brought to sight. Several other mines are looking up, such as the Isle Royale, Pewabic, Toltec, Rockland, &c. We are gratified to hear that the Portage Lake Mines are doing well, and have every appearance of proving to be real mines. As soon as money matters get a little easier we look for renewed efforts in copper mining."

The receipts of Iron over the Iron Mountain Railway, for the week ending on the 23d inst., are thus recorded in the same paper:

Sharon Iron Company	470 gross tons.
Cleveland Iron Company	500 gross tons.
SHIPMENTS DURING SAME TIME BY SHARON IRON COMPANY.	
Per schooner St. Paul	295 gross tons.
Per schooner St. Anthony	314 gross tons.
Per schooner Susquehanna	306 gross tons.
CLEVELAND IRON COMPANY.	
Per schooner Comely	500 gross tons.

The Anthracite Coal trade for the past week has been active, and shows an increase on the tunnage for the corresponding week last year, exclusive of the amount brought over the Lehigh Valley Railroad. The shipments on the Lehigh Canal for the week ending on Saturday last were 40,969 tuns, and for the season to that date, 705,112 tuns, against 775,085 to the same date last year, being a decline of 69,973 tuns. The Schuylkill Canal shipped for the week ending on Thursday, 35,901 tuns, and for the season to that date, 676,725 tuns, against 683,883 tuns to the same date last year, being a decline of 7,108 tuns. The Reading Railroad brought down for the week ending on Thursday last 53,459 tuns, and for the year, 1,132,048 tuns, against 1,287,433 tuns to corresponding date last year, being a decline of 155,385 tuns. The total amount of the decline by the three lines is 232,466 tuns. The supply from the two regions is about 140,000 tuns less than last year to the same date, the Lehigh Valley Railroad having probably brought down 90,000 tuns.

The Dry Goods trade has been quite active during the week with most of the jobbing houses. Some of the commission men have also transacted a large business, and the trade now may be considered fully commenced in earnest; many of the large jobbers have sold a larger amount of goods than in any previous season, but those who do a Southern trade have been rather quiet up to this time, trade from this section being somewhat backward. The same is true of those who do a California business, trade in that quarter being entirely prostrate, and nobody is insane enough to ship goods to that section at present. It is to be feared, from the unsettled state of affairs there, that many bad failures must ensue. The Directors of the Crystal Palace, in order to promote industry and rivalship, offer the following inducements for the next Fair of the American Institute:
