Curling Hair This Way Preserves Its Beauty

That dull, dead appearance of the hair no longer troubles the woman who has adopted the simpoline method of keeping her tresses in trim. The result is very different from that produced by the drying, devitalizing waving iron. The hair appears more naturally wavy and curly, and the application is really beneficial to the life and growth of the hair.

Any druggist, of course, can supply the liquid simpoline. A small quantity should be put on just before doing up the hair, using for the purpose a clean tooth brush, drawing this down the full length of the hair, from root to tip. The effect is delightfully surprising, and there is no discoloration, no stickiness, greasiness nor any other unpleasant accompaniment. The hair is quite manageable, no matter how it is fashioned. Fine for bobbed hair, too.—Adv.
