tract, in consequence of losses occasioned by the long delays in making appropriations for the work. The present appropriation of $1 000,000 secures its rapid progress to completion. As there is a heavy trade in coal between Georgetown and Alexandria and the North, it occurs to us that a good business might be done by vessels in this trade, taking back a cargo of bricks instead of returning in ballast. This subject is commended to the attention of our Hudson River brick makers. While the price of hard bricks ranges in New-York from $4 50 to $5 ⅌ thousand, the prices in Washington rate at about $7 50. The Hudson River brick, however, is smaller than the Washington brick, and to engage in the trade it would probably be necessary to provide for the use of moulds of the size required by the Municipal regulations of Washington. 1 000 Washington bricks measure about equal to 1,300 Hudson River bricks.

The steamer from Boston to-day took $301,000 in gold.

The Hon. Mr. Dayton of New-Jersey and Mr. Lanier of this city, Committee of Indiana bond-holders, arrived at Indianapolis on Friday last and on Saturday the petition of which they were the bearers, in relation to the Canal debt, was sent into both Houses by the Governor, accompanied by a very favorable message. The petition was received with great courtesy and referred to the appropriate Committees.

The business of the Clearing-House was $26,473 000.

By the Spring arrangements for travel on the Toledo, Wabash and Western Railroad, by which passengers are conveyed through from Toledo to St. Louis without any of the inconveniences attending the change of cars on the route. In relation to this road *The Toledo Blade* of Saturday remarks:

"We are gratified to hear that the travel on this road, is rapidly increasing and that the receipts of the current month will, according to the present appearances, show a large increase over that of January and February. The trains are now running full of passengers and the arrivals of freight, also, begin to show an increase. The night express, which has been discontinued since the late flood, is to be restored immediately, and will take its place as formerly on Sunday evening, leaving Toledo at 12 o'clock. This will give additional facilities to passengers going hence to the West. The road also carries Kansas passengers to Quindaro for $20."

In relation to Cotton, the circular of Mr. Wright says:

CROP.—There is still nothing in the developments at the South to cause any change in opinion as to the result of the crop proving somewhat less than 3,000,000.

RECEIPTS for the week under review are 84,000 bales against 101,400 bales same week last year, and 112,000 bales in 1855. The total deficit is now 115,000 bales as compared with last year, and 16,000 bales as compared with 1855. The telegraphic advices for a week later make it pretty certain that the deficit will be further increased for my tables of next week, probably to 150,000 bales, and for the week ending here on the 24 h inst., I quite expect the deficit will be at least 200,000 bales as compared with the last year. The monthly statements of the interior markets of Georgia have come to hand, from which I make the following:

Receipts at Augusta and Hamburg, inc'g through cotton gin'g	Stock on hand 1st March.	Macon stock 1st March.	Change in stock during Feb'ry. Inc	Dec.
1857	27,000	40,600	13,500	....
1856	53,000	32,200	14,100	2,000
1855	46,000	45,800	15,500	200
1854	28,000	50,300	11,900	7,500
1853	33,000	46,600	15,900	1,500

The above confirms the opinion I have expressed of the receipts at Savannah and Charleston being to a greater extent than usual at the expense of the interior stocks. The receipts at Savannah and Charleston, during February, have been less than in any year since 1851. The receipts during February, at Augusta and Hamburg have also been less than in any of the previous four years. The whole goes to corroborate the shortest intelligent estimate for the Atlantic Crop. From Mobile we learn that cotton freights on the rivers tributary to that port, have fallen to 2⅞c. ⅌ bale.

EXPORTS continue on a liberal scale; France and other foreign ports still take more liberally than Great Britain.

STOCKS are declining, and the reduction will be more rapid in future.

The following is a statement of the movement in Cotton since the 1st September last, as compared with the previous four years:

	1857.	1856.	1855.	1854.	1853.

SUMMARY.—*Receipts*—Decrease at the ports compared with last year, 115,000 bales; compared with 1855, 180,000. *Exports*—Decrease to Great Britain, 198,000; compared with 1855, 213,000 bales. Decrease to France, 41,000; increase compared with 1855, 89,000; decrease to other foreign ports, 74,000; increase compared with 1855, 51,000 bales.

The *Courrier des Etat Unis* gives the annexed programme of the "General Omnibus Company of New-York," which has recently been offered to the consideration of French capitalists. It is a magnificent scheme of 15,000,000 francs capital, half in shares and half in bonds, and it is a little remarkable that it has never been before heard of on this side the Atlantic

"All the shares and a third of the bonds, in all ten million francs, are taken in the United States, so that there remains only two-thirds of the bonds, or five million francs, to be taken in France and England in shares of one hundred francs each.

"The General Omnibus Company of New York, though established upon a smaller capital than the Companies of Paris and London, will be administered upon the same administrative basis. It will, at least, grant the same privileges.

"The examination of the books of the Omnibus Companies of New York, previous to the creation of this Company, has proved that the profits have increased more than 15 ⅌ cent during the last three years.

"The creation of an *impériale*, with eight outside seats, without additional expense of traction, the introduction of *tiquets*, the economy resulting from the concentration of the directive power, cannot fail greatly to augment the profits.

"Furthermore, the company has the following apparent advantages over those of London and Paris:

"1st. It is established by an act of the Legislature, *with a monopoly of the business for sixty years*.

"2d. In Paris and London the various taxes upon every vehicle amount to sixteen hundred to seventeen hundred francs per year; in New-York they are not more than one hundred francs, and cannot be increased.

"3d. In London and Paris the price of horses and their keeping is a third greater than in New-York. We may add that the population of this city and its environs is 1,200,000 souls.

"The bonds, which constitute a franchise for the bearer, present the following advantages:

"They draw 7 ⅌ cent interest from Feb. 1, 1857. They are exchangeable in shares, at the will of the bearer, until Dec. 31, 1861. (Those which are not exchanged at that time are redeemable in specie.) The bearers of bonds have the right for five years to take the shares if they give large dividends, or to demand their reimbursement if, against all probabilities, the dividends are small.

"The founders of the Company are assured of the coöperation of men familiar with the constitution of the London and Paris Companies, and the construction of omnibuses. They are about to depart for New-York to preside at the union of the Society and the organization of their services.

"N. B.—Fifty thousand bonds of 100 francs each have been created for Paris and London. Five promissory bonds of 100 francs each, from May 1 to December 31, will be exchanged for a clean bond of 500 francs.

"The subscription was opened on the 21st of February, in Paris, with M. M. Ch. Noel & Co., bankers, Faubourg Poissonnière; in London, Messrs. Masterman, Peters & Co., bankers."

The *Courrier* adds:

"There is something in this brilliant programme which needs explanation; it is, how this monopoly for sixty years, with which they allege [illegible] was obtained."

At Cincinnati *The Gazette* says:

"In some quarters the demand for money was less pressing, but generally it was pretty active. The regular discount houses continue to discount to the extent of their ability at 10 ⅌ 12 ⅌ cent. Eastern Exchange is firm at ¼ ⅌ ¾ premium."

At Philadelphia, the Money market is quiet, the Banks doing nearly all the good, short business paper made. The street rates rule at 9 ⅌ 10 ⅌ cent discount for unexceptionable bills, and 10 ⅌ 12 for bills of longer date and railroad acceptances.

The Boston Post of yesterday thus notices the Money market of that city:

"Money is in rather better supply, but rates rule about the same as at the beginning of last week. The passage of the new tariff, the increase in the bank specie in New-York, the decline in importations and in the payments for duties, the favorable condition of the foreign exchange market, and the certainty of a very large supply of bills throughout the Spring—all these have made our people feel better; and as far as confidence alone can have an effect upon fact, the money market has improved during the past week. In addition to these general features, also, our own market has been somewhat benefited by the cessation of the drain of specie to New York. Still State street is now suffering from an actual want of coin; and, therefore, the feeling of the market may be good, and such credits as are sometimes held apart from a lack of confidence may be restored to the street, and thereby visibly add to the supply of the moment, but until our banks recover the three-quarters of a million in gold that they have lost, it is perfectly absurd to talk of a really easy and encouraging money market. Let money be ever so abundant everywhere else in the world, and it will be tolerably tight in Boston until the banks have considerably over $3,000,000 in specie."

In the New-Jersey Assembly, yesterday, the Bank Committee reported a bill to repeal the charter of the Commercial Bank of Perth Amboy. At the same time two legal opinions were presented that the Legislature does not possess the right to repeal the charter.

The New-Orleans Crescent of the 4th says:

"The offerings of paper, though brisker, were of long date, which is purchased with considerable freedom at the rate of 9 ⅌ cent for the higher grades of Cotton factors' acceptances. The transactions to day were $30,000 by one party, $15,000 by another, $20 000 by another, and $10 000 by another.

"The calls on the Banks continue large, the prominent Bank discounting to-day was called on for discount to nearly six hundred thousand dollars.

"The Exchange market was very quiet to-day. In some grades of sterling bankers offered an ⅛ ⅌ ¼ less than yesterday's rates. There was only a moderate demand for remittances. Sales of francs were made at 5.27½ with shipping documents; 100 000 of second grade on Paris were taken at 5.32½. There was some disposition to enhance the rate of Northern funds, but as buyers held off no advance was realized. Sterling Exchange is 7½ @ 8½ per cent. Sight on New-York ¼ @ ½ per cent discount.

Markets..CAREFULLY REPORTED FOR THE TRIBUNE.

WEDNESDAY, March 11, 1857.

ASHES—The market is firm for Pots at ⅌7 75. Pearls are quiet at ⅌7 50; sales of 27 bbls. The stock consists of 391 bbls. Pots and 670 Pearls. Saleratus steady at 7½c.

BOOTS AND SHOES—There is no essential variation to notice in this trade. Buyers do not purchase with the freedom they did in former seasons, which is chiefly attributable to the extreme prices current.

COPPER—New Sheathing is hardly so firm, and we hear of sales at 34c., 6 mos.; Yellow Metal continues dull, with sales of 46,000 ℔ Baltimore at 32c. Old Sheathing is in good request, and we hear of sales at 30c.; Bolts are better; sales of 25,000 ℔ at 29½@30c., cash.

COAL—The demand for domestic has been moderate for local consumption, but a better inquiry has been experienced for small cargoes for coastwise ports. The arrivals have been in excess of the wants of the trade, and prices favor the buyer most decidedly. Sales of small size Peach Orchard at ⅌4 50@⅌4 75 ⅌ ton, and large do. at ⅌5 75@⅌6. Lehigh is quiet but steady at ⅌6@⅌6 25. Foreign is quiet; the supply is moderate, and prices, in the absence of sales, are nominal.

CANDLES—Adamantine continue in good demand; the sales for the week amount to 1,100 boxes at 24@24½c., the former rate for the Phenix Co's the latter for Belmont's. Plain Sperm sell at 42c.; Patent do. at 52c.; Mold Tallow 13@16c.

CEMENT—Business in this line is not very active. We quote Rosendale at ⅌1 25@⅌1 30; Portland at ⅌1@⅌1 50; Roman at ⅌3 50; and Marble at ⅌6@⅌8.

DYEWOODS—The stock of Logwood has become greatly reduced by recent sales, and prices are therefore firmly sustained; the demand is fully equal to the supply. St. Domingo is firmly held at ⅌16 50@⅌17, cash, in bond, and Jamaica at ⅌6. Savanilla Fustic is firm at ⅌13@⅌13. Nicaragua and Red Wood are nominally scarce.

EARTHENWARE—Trade has not been as active during the week past as might have been expected, but this may be in a manner accounted for by the stormy weather. Some Western merchants are in town, and we may soon expect a season of more general activity. The stocks in the market are small, and goods are commanding fair prices. There are many vessels over due, and arrivals of Earthenware in large quantities may be soon expected. The interruptions on the canals between this and Philadelphia prevent the shipment of goods as desired, and many Southern dealers who purchased their supplies here last month, have not yet on this account received them.

FLOUR AND MEAL—The market is seen 5@10c. lower on the low grades of Western and Canadian, the receipts are fair but the stock is much reduced but is ample for our present wants. The better grades are in fair request and firm; the sales are 6,000 bbls at ⅌6 15@⅌6 30 for common to good State, and small lots at ⅌6 35@⅌6 40, ⅌6 40@⅌6 60 for extra do.; ⅌4 25 @ ⅌4 40 for superfine Indiana, Illinois and Iowa; ⅌6 45@⅌6 65 for extra do; ⅌6 50@⅌6 65 for common to good extra Ohio; ⅌6 75@⅌8 for good to choice extra do.; ⅌6 50@⅌8 50 for St. Louis brands, and ⅌7 25@⅌8 ⅌ for extra Genesee. Canadian Flour is heavy and rather easier; sales of 500 bbls at ⅌6 35 for superfine, and ⅌6 60@⅌7 50 for extra grades. Southern Flour is heavy, the arrivals are limited; sales of 2,200 bbls. at ⅌6 65@⅌6 ⅌ for mixed to good brands Baltimore, Alexandria, &c., and ⅌6 ⅌@⅌8 for favorite, fancy and extra brands. Rye Flour is quiet; sales of 60 bbls. at ⅌4 25 for fine and ⅌4 50@⅌5 12½ for superfine and extra. Corn Meal is in very fair request and in small stock; sales of Jersey at ⅌3 35 and Brandywine at ⅌3 70@⅌3 75, puncheons at ⅌17 50@⅌17 50. Buckwheat Flour is in fair request at ⅌2 25@⅌2 37½ ⅌ 100 ℔.
