—Machines in Successful Operation!
—THE—
Combination Gas Machine Co.,
DETROIT, MICH.

AFTER UNDERGOING THE SEVEREST Tests in all parts of the United States and Canada for more than fourteen years, the COMBINATION GAS MACHINE is universally pronounced to be
THE MOST RELIABLE,
THE SAFEST,
MOST ECONOMICAL,
THE MOST SIMPLE and
THE MOST DURABLE
Apparatus for the purpose of illumination ever before introduced.

THERE IS NO DANGER in its management.

It emits no unpleasant or unhealthy smell or odor.

It is far less troublesome than lamps, requiring no more attention than an ordinary clock.

IT IS AN ABSOLUTE NECESSITY
To directors of public institutions, school trustees, clergymen, religious organizations, manufacturing corporations, owners of theatres, opera houses, hotels, and boxes of families, securing to all such absolute immunity from DANGER and annoyance. To country men, farmers and farmers, giving them a safe and brilliant light at a minimum cost of COAL OIL, at the same time insuring them against DANGER, loss, annoyance, and in many cases, DEATH, from explosions of Coal Oil Lamps.

This Machine having been accepted by the National Board of Fire Underwriters, there is no increase in the Rates of Insurance in consequence of using it.

Refers to Dr. P. W. PEEPLES, of the Edwards House, who is using a 150 Light Machine.

MONEY SAVED!
—BY USING THE—
Combination Gas Machine!

THERE IS NO DANGER in its management.

It emits no unpleasant or unhealthy smell or odor.

IT is far less troublesome than lamps, requiring no more attention than an ordinary clock.

GAS made with this machine costs from 75 cents to $1.50 per thousand cubic feet, or less than ONE-HALF OF ONE CENT per hour FOR EACH BURNER, according to the cost of the material (Gasoline) from which the gas is made.

A BUILDING can be lighted with from ONE to FIVE HUNDRED BURNERS, with less trouble and skill than is required to take care of one kerosene lamp.

There is NO FIRE OR HEAT used to make the gas, and the time required to attend to a Machine for an ordinary building will not exceed TEN MINUTES per week.

By using gas made with this machine the danger by fire and ACCIDENTS attending the use of kerosene lamps is avoided.

THE WEIGHT CAN BE WOUND UP WHILE THE LIGHTS ARE BURNING WITHOUT EXTINGUISHING THEM.

Small machines made especially adapted to farm residences, small stores and places of business, at prices so low that all can avail themselves of this great convenience and luxury.

Machines of all sizes made from TEN to ONE THOUSAND or more lights, as required.

Where buildings are not piped for gas, pipes can be laid for the distribution of the gas at a TRIFLING COST from CELLAR to GARRET, without injury to the walls, and but slight annoyance to the inmates.
