George Baron agt. M. Fanpedni.—Motion granted; plaintiff's costs to abide event.

John McCabe agt. William N. Cumming.—Motion granted on payment of $10 costs of motion, &c.

COURT OF GENERAL SESSIONS—APRIL 23.—Before the RECORDER.

The trial of Dr. Elijah Hunt, charged with manslaughter in the second degree, in causing the death of Harriet Lawson, by procuring an abortion upon her person, was continued from yesterday. The evidence for the defense was merely to show a previous good character. The Jury brought in a verdict of guilty, and the prisoner was then remanded for sentence.

Geo. Harrod was convicted of assault and battery on Robert White and will be sentenced on Saturday.

Anne Cussack pleaded guilty to petit larceny and was remanded for sentence. The Court then adjourned for the day.

COURT CALENDAR—THIS DAY.

THURSDAY, April 23—P. M.

The heaviness in the leading Stocks continues with large transactions. This being the day for opening the transfer books of the Michigan Southern Road, a leading house which has been a buyer of this stock, and had a large number of shares to receive, was unable to meet its engagements. It is supposed that the house alluded to will eventually pay everything. This and another failure which was announced gave a shock to the market, which opened with great heaviness. Southern sold to the extent of about 2,000 shares at 60, afterward improved to 62, and after selling to considerable extent at 61¼@61¾, finally closed at 60¼@61. The aggregate sales of the day are some 7,500 shares. The amount of transfers to-day was very large, probably 12,000 to 15,000 shares, using up 91 pages of the transfer book. Reading fell off 1 ⅌ cent, selling at the close at 81¼@81¾. New-York Central was comparatively firm, closing at 86¾. Erie opened at 44, having been 44¾ yesterday afternoon. The supply of stock was too large for the demand, and under sales of some 5,000 shares for the opening, the market declined to 42¾, at which the stock was offered after the Second Board. Michigan Central is among the firmest stock, and has been so during the whole of the late serious fall in the market. This is accounted for by the fact that the stock is held by very strong men, mostly in Boston, and that very little stock is afloat in the market. Toledo was 63¾ at the close, a decline of 2 ⅌ cent. Illinois Central was strong, with considerable disposition evinced by the bears to sell it. It stands about ½ ⅌ cent better on time sales than yesterday. Milwaukee and Mississippi fell off 1 ⅌ cent. A sale of Stonington was made at 45, the first transaction for some time past. In Railroad Bonds and State Stocks the transactions were quite moderate.

There is nothing of importance doing in Exchange, but the quotations are steady.

Freights are again lower, and very dull. To Liverpool we quote Flour at 1s., Grain at 1½@2d., 300 bales Cotton at ¼d., 150 boxes Bacon at 10s., 2,500 bbls. Rosin at 1s. 2d., 50 hhds. Hams at 10s., 200 bbls. Beef at 2s. We hear of vessels going in ballast rather than accept these very low rates. To London or Glasgow nothing was taken. To Bremen, 2,000 bush. Grain at 6d., in ship's bags. A vessel to load Deal at Quebec for London at £5; one from Wilmington to New-York at 40c. for Rosin and 60c. for Spirits, and another with Rosin at 40c. and Spirits at 65c. A vessel from New-York to New-Orleans with Lime at $1.

The Sub-Treasury continues to suffer depletion. The falling off of payments for duties by the warehousing of goods is already being felt. The business of to-day was: Receipts, $333,621 23; Payments, $457,222 70; Balance, $14,784,567 14.

A new insurance company, called the American Fire Insurance Company, is being formed in this city.

At the recent election of the La Crosse and Milwaukee Railroad, the following gentlemen were elected Directors: Byron Kilbourn, President; Edwin H. Goodrich, Vice-President; Stephen H. Alden, Garrett Vliet, Moses Kneeland, Jackson Hadley, Henry L. Palmer, Samuel Brown, Charles E. Jenkins, Moses M. Strong, Benj. F. Hopkins, Hugh McFarlane, D. D. Cameron. The old officers have also been reelected.

A letter from Milwaukee, dated 17th inst., says that the business on this road is increasing rapidly. On the previous day one freight train came in consisting of forty-six cars, and on the morning of the 17th the outward passenger train consisted of seven full cars. The writer adds: "The road, as far as I have been able to ascertain, is managed with skill and energy, and with the most rigid economy in all its operations."

The business of the Clearing-House to-day was $29,550,000.

The Directors of the Importers' and Traders' Bank have resolved to increase the capital of that Bank $1,000,000.

There is a good home demand for Flour, and quotations are 5@10c. ⅌ bbl. higher. Wheat is quiet but steady, and Corn has an improving appearance. The activity in Sugar is still marked, and prices touched a still higher point to-day. In Coffee there is more doing. The Tea sale to-day went off with great spirit, and all Greens at 45c. and under show an advance of 2c. ⅌ lb.; other descriptions are firm. Pork is irregular. In Cotton the business is to fair extent, and the market is strengthened by the telegraphic advices from the South.

The railroad between New-London and Stonington has been located, the money to build it subscribed, the right of way secured, and, we believe the work commenced, with the prospect of having the road ready to be run upon by October or November. This will make almost an air-line road from New-York to Boston, making the time to Boston, it is expected, one hour shorter, and the time to Newport about four hours shorter than by any other railroad. The receipts of all the roads thus brought into the direct line must be very much increased, but the road that will be particularly benefited by it will be the Stonington, whose earnings will be very much enhanced. It has been paying, when not interrupted by unusual severity of weather, about 5 ⅌ cent ⅌ annum to its stockholders. The additional receipts arising from this connection, together with the guarantee against any interruption of its through travel by the closing of the Sound must make it a much more profitable work.

In another column will be found an advertisement to contractors, asking for proposals for building this link between Stonington and New-Haven. Proposals will be received at the Engineer's office until 7th May, prox.

An evening journal is entirely mistaken in its presumptions in regard to the defalcation alluded to by us yesterday. The defalcation we had reference to was of a junior partner of a house far up town, and off Broadway. We shall endeavor to give the particulars in a few days.

Thompson's Bank Note Reporter says:

We have lowered the price of Warrants one cent per acre, although 40, 80 and 160 acre Warrants are in active demand, while 120 acre Warrants are not called for; hence the wide difference in prices.

We are now (April 23) buying and selling:

	Buying.	Selling.
40 acre Warrants	$1 10	$1 15
60 acre Warrants	0 94	0 99
80 acre Warrants	1 01	1 05
120 acre Warrants	0 94	0 99
160 acre Warrants	1 00	1 05

We have no special change to notice in Money matters. The supply on call appears to be abundant to meet all inquiries. Paper continues in good demand and passes at 8@9 ⅌ cent for first-class names. The offerings at bank are not large, and these Institutions are enabled to accommodate all their customers.

The annual election of Directors of the Southern Michigan Road was held at Adrian yesterday, but as the telegraphic wires are not in working order, the result has not yet reached us. We understand, however, that some changes were to be made by the accession of new names well known in financial and railroad circles. The annual report was read at the meeting, and will in a few days be given to the public. The report is made up to the 1st January, but the Directors are now preparing a supplementary statement, which will give stockholders full information of the position of the finances of the road up to the present time; the public will then be enabled to judge for themselves whether there is any basis for the recent rapid and unprecedented decline in this stock, other than the attacks and sales of the parties in the street operating for a fall. Meanwhile we have seen the general statement of the road made up to January 1; from which we gather that the concern represents in round numbers $17,000,000, about equally divided between stock and debt. Of this the floating debt is $2,300,000, and was not incurred in the building of the Detroit Road, this includes the last dividend, since paid. Against this the Company have 528 miles of road, over a half million of steamboat property, new or nearly new, and some two millions and a half of other assets, bills receivable, bonds and stocks of other roads, cash, &c. The above amount includes the cost of the Detroit Road also. Since the 1st of January the stock account has been increased by the issue of stock for the payment of the dividend, &c., while the bonded account has been reduced by the payment of the $500,000 Income Bonds due in March, excepting so much as was exchanged for Sinking Fund Bonds. The general account probably shows at present $17,500,000, of which $8,250,000 is stock. Deducting from this $2,000,000 for steamboats and other assets, leaves $15,500,000 as the cost of 528 miles of road, making an average of $30,000 per mile, which, at the present market price of the securities of the road, is reduced to $20,000 per mile. Of the route over which this road passes the public have nothing to learn. It is admittedly one of the greatest routes in the United States, the shortest line between two great lakes, and the transit across of the intervening tract of country for the immense and constantly increasing traffic of the illimitable West. If the Southern Michigan Road, with its preeminent natural advantages, under good management cannot be made to pay dividends upon $30,000 or $33,000 cost per mile, it is quite time to stop building railroads, and also to stop paying dividends upon most of those that are built. In regard to the distribution of the stock, it appears from the list of shareholders that there has been a constant increase. In January, 1856, the number was 934. In August following, 1,042. In February last, when the dividend was paid, 1,134; and at the time of the present closing of the books the number was 1,235. This would seem to indicate that, instead of stockholders selling out and concentrating the stock in Wall street, the reverse had been the fact.

Messrs. Winslow, Lanier & Co. advertise in another column $200,000 of City of Chicago 6 and 7 ⅌ cent Bonds, issued for sewerage purposes. The act of the Legislature authorizing this issue makes it the imperative duty of the city authorities to levy and collect a special tax to meet the accruing interest, and to create a Sinking Fund sufficient to retire the bonds before maturity. The entire debt of the city is now $1,124,316, and the assessed value of the taxables of the City $75,000,000. The population is now 110,000, and rapidly increasing. The present debt was mainly created for water-works, and the city owns property, exclusive of the works, to the value of $898,000.
