The Introduction of Water.—The following general plan for the Celebration of the Introduction of Water into the city, was agreed upon by the Committee who have the subject in charge, at a meeting held yesterday:

First—A National Salute at sunrise in the Eastern and Western Districts.

Second—The ringing of the bells throughout the city, morning, noon and night.

Third—A fountain in the Western and another in the Eastern Districts to play all day.

Fourth—Fire works in the evening. The public buildings will be illuminated, and all private citizens will be requested to illuminate their houses.

A procession of all the civil and military organizations in the city will be formed, and the exercises at the City Hall will consist of speeches, singing an original ode, &c. The Committee will meet daily at 9 o'clock a. m., on and after Thursday, to receive delegates from Societies proposing to participate in the ceremonies. The celebration is to take place on the 27th of April. The sum of $5,000 is appropriated for the purpose.

Correction of Taxes.—A statement of corrections made in the taxes of 1857 and 1858 was submitted to the Common Council at the last meeting. In the list of 1857 the following appears:

Valuation of real estate remitted	$290,910 00
Valuation of personal estate	583,650 00
Amount of taxation on real estate	5,440 64
Amount of taxation on personal property	9,732 14
Number of corrections	278

The following are the totals in 1858:

Valuation of real estate remitted	$56,525 00
Valuation of personal estate	81,950 00
Amount of tax on real estate	884 71
Amount of tax on personal estate	1,225 98
Number of corrections	58

Desperate Attempt at Suicide.—Last evening, a German named Samuel Errickson, residing in Conselyea street, near Union avenue, attempted to commit suicide, and would have succeeded had it not been for the presence of mind of his wife. He had for some time been despondent, in consequence of being out of employment, and late in the afternoon took a knife, and attempted to cut his throat. His wife succeeded in getting the knife away from him, and soon after he was discovered with a rope around his neck, in the act of leaping out of the window. His wife got hold of him and prevented him from putting his design into execution. He afterward made his escape from the house, and was soon after found in Grand street, trying to procure a knife. He was then taken in charge by Officer Lee of the Fifth Precinct, and locked up to prevent his doing himself further harm.

Sudden Death.—Coroner Snell held an inquest yesterday on the body of a child of Mr. McDonald, corner of Varet street and Bushwick avenue, who died suddenly. Verdict of death from convulsions.

Charge of Burglary.—Officer Velsor of the Fourth Precinct Police arrested Wm. Alexander yesterday on suspicion of entering No. 138 Myrtle avenue and stealing therefrom a gold watch valued at $40. He was held for a hearing by Justice Morehouse.

NEW-JERSEY ITEMS.

The Harden Poisoning Case.—The fall of this young man in Warren County is a mysterious affair. He entered the ministry about two years ago on trial, and had not been received into full connection. His age is only 22 years, and he married a very estimable girl about 6 months ago. His parents reside near Blairstown, Warren County, near the Paulins Kill; his father being a respectable farmer in that neighborhood. What fell spirit could have induced a man so young in years, so lately married, to the perpetration of so foul a crime, under all the circumstances, is hard to divine. It is thought some other circumstances came in to the aid of his evidently unregenerated heart to induce him into so awful a crime as the poisoning of his young wife. It is said that a young woman, with whom he enjoyed some intimacy before his marriage with his wife, was at his house on a visit, and that the plan was concocted between them. The woman, it is said, purchased the poison, and at the proposition of Harden it was taken in a cose of salts, he, at the same time also taking a dose, but not compounded with the poison. Who made the mixture is not stated, but it is said, and probably with truth, that it was the combined act of both. Harden's story is, that his wife, in consequence of a difficulty between her mother and himself, destroyed herself. Whatever may be the true history of this unfortunate affair, it has its lessons upon all.

Habeas Corpus for the Custody of a Child.—The case of the State on the relation of St. Mary's Orphan Asylum of Newark vs. James L. Coyne of Orange, to recover the custody of a child, which was argued on the 12th inst. before Judge Haines, was decided on Saturday last. The Judge gave a long by opinion on the subject, holding that, since the child was not bound to the Orphan Asylum by any person having lawful power over him, they could not maintain any action for enticing away the child, much less recover the custody of his person by habeas corpus. He therefore refused to order the boy to the relators. Mr. Coyne accordingly retains his nephew, and no further action will be taken in the matter. The decision is one of much interest, as establishing the power of such institutions over children that may be temporarily placed under their charge.

Fire.—About 1 o'clock yesterday afternoon, a vat of boiling turpentine took fire in the printing ink factory of Geo. Mather, in South 3d st., opposite the gas works. The flames ignited some shafting, belting, &c., which was destroyed. Too men about the place had nearly subdued the fire before the arrival of the fire companies. Loss about $350.

Arrest of a Sneak Thief.—A fellow, giving the name of Wm. Snell, was arrested at the ferry, by Special Officer Clark, and taken before Justice Bedford yesterday, charged with entering the residence of Dr. Gott, No. 134 Washington st. well, and stealing from the hall some wearing apparel. Another was observed to leave the house with a bundle, under suspicious circumstances, and in attempting to cross the ferry, he was taken into custody. He was sent to jail to await the action of the Grand Jury.

TUESDAY, March 22—P. M.

Stocks were quite strong during the early part of the day, and for a short time the market looked as if a smart reaction might be established; but in the afternoon prices gave way again, rather unexpectedly to a majority of the operators, and the closing transactions of the day were marked by the same languor and heaviness witnessed for several days past. The shorts have been large buyers, and have probably contributed very much in giving to the market its firmer tone; but such support is but temporary, as the stocks purchased are not withdrawn from the street, and in many instances are re-sold by the parties to whom deliveries are made. At the first Board, New-York Central advanced to 78⅞, and was in very good demand at the quotation on the second call. Harlem Preferred, on moderate transactions, went up to 38⅞. Reading was one of the firmest stocks on the list, and sold at the close at 49⅞. The cash stock is quite scarce for delivery, and the advance of to-day is no doubt partly owing to the over sales of the bears. Pacific Mail was firm, but not particularly active, at 78⅞. In the Western shares the dealings were not large, but in nearly every instance a sharp rally took place, which was very well sustained through the session. Galena, Rock Island, Michigan Southern and Toledo were each from ½@¾ ⅌ cent higher. At the Second Board prices opened at a slight improvement over quotations of the morning; but before the session closed the tide turned again very suddenly, and with the first symptoms of weakness there was a general rush to sell, and the disposition which some of the bull operators had shown at the First Board to support the market appeared to ooze out at the palms, like the courage of a noted individual, not even "the leading operator"—whoever that distinguished personage may now be—coming to the rescue. The Bond trade was not very active, but the movements were indicative of a steady and rather improving market. The largest share of orders for investment which come into the street are for Government and State Stocks. The United States Loan of 1874 advanced to 104¼ at the First Board, and 104¼ was bid at the Second. Missouri 6s sold to the amount of $68,000, advancing to 85¼. Tennessees were also in good demand, and at the Second Board sold at 91¼. Railroad Bonds were generally firm, but the transactions quite moderate in extent. Illinois Centrals advanced ¼; Hannibal and St. Joseph advanced ½. After the adjournment of the Second Board the stocks most prominent in speculative operations were sold down to points lower in some instances than opening prices of the morning, and the whole market closed dull and heavy. There was never more general complaint among the commission brokers of slack business than at the present time, and it is conceded, we understand, even by the veteran speculators of the street, that there is no "outside business" of any consequence. This corresponds with the impression we have hitherto entertained, and which we have once or twice endeavored to convey to our readers. The closing prices were: U. S. State 5s, 103¼@104¼; Tennessee 6s, 91¼@91¾; Missouri 6s, 85¼@85¾; Virginia 6s, 97¼@97¾; Canton Co., 19¾@20; Cumberland Coal Co., 23@23¼; New-York Central Railroad, 78¼@78¾; Erie Railroad, 10¼@10¾; Harlem Railroad, 12@12¼; Hudson River Railroad, 31¼@31¾; Reading Railroad, 49¼@49¾; Michigan Central Railroad, 51¼@51¾; Michigan Southern and Northern Indiana Railroad, 14¼@14¾; Do. Preferred, 45@45¼; Panama Railroad, 117¼@117¾; Illinois Central Railroad, 66¼@67; Galena and Chicago Railroad, 68¼@68¾; Cleveland and Toledo Railroad, 25@25¼; Chicago and Rock Island Railroad, 58@58¼; Illinois Central 7 ⅌ cent Bonds, 75, 90@90¼; Pacific Mail Steamship Co., 78¼@78¾.

The business in foreign bills has been dull for this steamer, but quotations are well maintained. The demand has fallen off materially, while the supply is fair of outside bills. We make no change, however, in quotations. A line of Southern Sterling bills, with the indorsement of a New-Orleans bank, sold at 109¼. The range is 109¼@109¾. France, 5 15@5 12½.

Freights to Liverpool. 120 bales Cotton, ⅌ steamer, at ⅛d.; by vessel, 1,100 bales Cotton at 3-16d; 400 bbls. Rosin at 1s. 7½d.; 50 boxes Bacon at 25s.; 15 tons Seed, ⅌ steamer, at 20s., and 500 bbls. Spirits at 4s. To Glasgow, 2,000 bbls. Rosin and 100 tuns Logwood on private terms. A brig of 191 tuns, to load at Norfolk for the West Indies and back, on private terms.

The business of the Sub-Treasury was: Receipts, $284,012 16; for Customs, $193,000; Payments, $481,764 44; Balance, $8,734,032 12. The Sub-Treasurer has received further advices of drafts for the redemption of Treasury Notes, but not to a large amount. The Secretary of the Treasury is doing nothing yet in regard to the reissue of these notes, and the impression is that the necessity will not arise until after midsummer.

We annex a comparative statement of the exports, exclusive of specie, from New-York to foreign ports, for the week and since Jan. 1:

	1857.	1858.	1859.
Total for the week	$2,294,349	$1,125,966	$1,217,904
Previously reported	12,121,298	11,421,161	10,430,349
Since Jan. 1	$15,216,136	$12,547,127	$11,547,682

The earnings of the Michigan Central Railroad Co. for the second week in March were:

	1859.	1858.
Passengers	$16,338 54	$13,187 92
Freight	14,419 23	17,869 96
Total	$30,857 77	$31,057 88

The receipts of the Catawissa Railroad Company for

February, 1859, were	$22,574
Less due connecting roads	3,869
Net receipts for February, 1859	$18,645
Net receipts for February, 1858	16,762
Increase	$2,923

The March business will show considerably larger receipts.

The advertisement of the reorganization of the Great Western Railroad of Illinois appears in our columns. This Company starts with a bonded debt on the road of $2,391,000, and stock about $1,600,000, free of all floating debt. At this cost very moderate earnings will suffice to pay interest and a dividend on its stock, the road being 179 miles long, and stock and bonds together showing a cost of only $22,300 per mile. The earnings during 1858 were $475,000. The Company is now prepared to issue stock to the parties entitled under the compromise adopted at the meeting of September 19, 1857, and the claims and coupons on which the issue is to be made should be presented by the first of May next, at the Company's office, No. 54 William street, where the interest coupons, due April 1 and August 1, 1859, on the bonds of the former Great Western Company, the back coupons upon which have been surrendered, and stock taken therefor, will be redeemed at maturity.

The business of the Clearing-House to-day was $19,945,138. The interest, due April 1, 1859, on the bonds of the State of North Carolina is now on deposit in the Bank of the Republic in this city. This is prompt. A new Life Insurance Company is being formed in this city. In Money there is no change to note, excepting perhaps increased abundance on call at 4@5 ⅌ cent. The supply of paper is rather larger, made from grocery as well as dry goods operations, but there is no change in quotations. Strictly first-class six-months Dry Goods paper, single name, goes at 6@7 ⅌ cent, and well-indorsed at 5½@6 ⅌ cent. Sixty day acceptances of favorite names go at 5 ⅌ cent, and occasionally a trifle lower. The Banks appear to be taking paper freely, but do not seem disposed to expand their call loans. In Treasury Notes there is a fair business doing at par to ¼ ⅌ cent discount for 4½ and 4¾ ⅌ cents. The discount is now too small to induce the use of them to any extent for Custom-House purposes. There is a good demand for the new Government Loan, and the market has an improving appearance. The bid to-day was 104¼, and 104¾ asked. There are but few lots pressing on the market.

In relation to the movement in Cotton, Messrs. Wm. P. Wright & Co.'s Circular of to-day, says:

Receipts—The excess, which last week stood at 900,000 bales, is reduced 43,000 bales, and now stands at 862,000 bales. Next week a further considerable reduction will be shown. The receipts into the ports are now on a moderate scale; those in the Atlantic may be kept up for a few weeks by receipt of the stock held in the interior towns. There is more disposition in the South to reduce the larger estimates of crop, and less confidence here than before, in outside figures.

Exports are to a fair amount for Great Britain, small to Havre, and large to the Continent. At the latest mail dates from New-Orleans, there was more doing for Havre as well as the Continental markets of Europe. For the next five weeks at least, the exports for Great Britain are likely to be short of the corresponding five weeks of last year, during which we exported 326,000 bales to that country. It begins to be a question able matter whether England will receive out of our prse of crop much if any, more than she got out of the last. The detention on the bar at New-Orleans continues; over 100,000 bales are kept back. At the latest accounts there was no improvement in the passage.

The following is a statement of the movement in Cotton since 1st Sept. last, as compared with the previous four years:

The Boston Post says of the Money market of that city:

"The week closed with money quiet, but firm at 6 ⅌ cent for the best paper. Exchange with New-York seems to have turned in favor of Boston, New-York funds being in good but not superfluous supply, while our bank specie has shown no diminution for some days. The increase of cotton bills has relieved the sterling exchange market, while by the payment of the greater part of the cotton acceptances of New-England manufacturers, the business between Boston and New-York is nearly reduced to ordinary transactions, in which, as the notes received for Spring sales on Boston account come to maturity, Boston has a fair chance of being the creditor city through the Summer. The rumors of wars in Europe do not, of course, affect the small operations of the day, but they have a deadening influence upon large business of all sorts. Appearances indicate a dull sort of a Summer, with an easy money market until dog-days, at all events. In the early Autumn, what with the imports, which are likely to be very heavy, the extended condition of the bank loans, the natural increase of business and the amount of money wanted for the movement of Western crops, the chance is we shall see money very considerably tighter. There are millions on millions of our bank loans to day (renewals of old debts), that could no more be paid up by the debtors than the English Parliament could pay the national debt. Although business has been comparatively light for a year and a half, any special tightness in the money market would be as inconvenient to many, as far as we can perceive, as if the country had been doing a rushing trade, without panic or interruption."

The Horse Market.

We have not seen the market so full of horses as it is now at any time in the previous two years. All the large stables in Twenty-fourth street are nearly full, and should the arrivals outnumber the sales during the next fortnight as largely as they have during the past one, quarters will have to be sought in some other street. Dealers generally concur in the opinion that the market has been pretty dull during the last few days, and also that prices this Spring correspond almost exactly with prices last Spring. But there has been, probably, more than twice as many horses sold in the three months of 1859 as in the first three months of 1858; and judging by the number now in market, and known to be already purchased and destined to come here, we should say that the proportion in future will be still larger. A very large proportion of the stock received this season is composed of work horses, and we don't recollect ever to have seen the stables so well filled as now with work horses of a general good quality. There are very few of them valued below $125, at which, and up to $150, the class of good fair city stage horses sell for. That class are also taken to some extent by the farmers in this vicinity, but not, we think, in as great numbers as was expected by those who knew what large numbers of working oxen have been sold to butchers during the Winter.

Probably the most saleable class of horses at this time in market are such as are required for our heaviest city work, ranging from $175 to $225 each. Of such there is no lack at the present time, and as the sales are considerably slower than owners anticipated, we presume that they are frequently sold at $10 to $25 less than they fondly hoped to realize.

From the appearance of the stables, we estimated the number of horses on the two blocks between Second and Lexington avenues, on Tuesday, at about 1,000. The largest portion of these are late arrivals, and nearly all of the low priced order—that is, under $250 each.

There are some "fancy horses" and fine pairs that have been so long on hand that they have become stale. Buyers of high priced horses appear to think there is "something the matter" when horses "stick" a long time in the stables. The fresh "fancy stock" has not yet begun to come in much. A lot of forty by Jerolomon, said to be very good, is almost daily looked for from Whitestown, N. Y., and several smaller lots are only waiting for the "good time" that the owners are daily expecting to be notified has come. We think any considerable fresh arrival in the next fortnight will crowd the market.
