The State Controller advertises for sealed proposals for a 5 ₱ cent State Loan of $350,000, to meet a deficiency in the General Fund. Proposals will be received until June 23.

The coinage of the New-Orleans Mint in March and April was $475,440. The deposits were $378,378 40.

The Hartford Times says the Legislature of Connecticut has chartered the Alton and Chicago Railroad Company, and adds:

"The Company is made up of gentlemen residing chiefly in New-Haven and vicinity who are creditors of the Chicago, Joliet, Alton, or whatever name now belongs to the Illinois Road, which they propose to take possession of. They do this to secure themselves. The road, of course, is to be operated outside of Connecticut; and very large powers are conferred. We believe it is a new thing in the history of our State legislation; but we have not examined the matter fully enough as yet to give a decided opinion with regard to this charter."

The New-Haven Journal, has the following abstract of the report of the Bank Commissioners of Connecticut:

According to the report of the Bank Commissioners to the Legislature, there are in the State 73 banks of discount, 35 savings banks, and 30 savings banks and building associations. In 1837, the circulation of the banks amounted to about $4,000,000; in 1852 it had gradually increased to $7,000,000, and in 1853 it suddenly ran up to $11,270,000. In 1855 it fell to $6,800,000—going up to $9,000,000 the next year, and declining in the panic of 1857 to $4,000,000, the point at which it started from in 1837. On the 1st of April, 1859, the circulation of the banks was $7,550,369, being twenty double what it was a year ago.

The Commissioners approve of the law of last year, which confines the circulation of the banks to 75 ₱ cent of their capital, because it has a tendency to restrict overtrading.

An account is given as to the proceedings of the Commissioners with delinquent or insolvent banks. The Woodbury Bank has paid 80 ₱ cent on $60,000 of its circulation, presented to the Commissioners, and will be able to pay 20 ₱ cent more; but there is $15,000 circulation not presented within the time fixed—Jan. 1, 1859—which will apparently get nothing.

The Litchfield Bank is in a bad way. Almost all its managers seem to have been engaged in plundering it, and the Commissioners more than hint at perjury and a fabulous abstraction of funds. The receivers have as yet been able to make no adequate provision for the claims against the bank, though they have brought a number of suits. The outs anding circulation is $17,500, and total indebtedness $43,000. In consequence of the loss by robbery, the Hatter's Bank of Bethel has had its capital reduced to $60,000, subject to the approval of the Legislature.

The Hartford banks which caved in during the panic of 1857, are slowly but gradually recovering. The Charter Oak Bank incurs a censure for declaring dividends while its capital is impaired, and so does the City Bank of New-Haven. Colchester Bank's claims against its late Cashier S. P. Jones, and Simeon Leland & Co. have been compromised for about $28,000, "out of the $51,000 honestly due the bank."

The bills in an outstanding circulation of this bank, now cut off by the expiration of the time for presentation, and the Commissioners recommend that the time be extended. The Metropolitan Bank of New-York, holds $8,000 of this. The Receiver of the fraudulent Granite Bank has succeeded in procuring all the outstanding circulation, and the Commissioners express their surprise at the escape of the parties to the fraud, especially when two of the number turned State's evidence.

MINNESOTA MINE, May 17, 1859.

MINNESOTA.—Herewith I hand you return of copper raised in April—106¼ tuns. We did expect to have made it larger, but, owing to the disturbance among the men, of which you have already been advised, and the consequent loss of nearly a week's work, it is the best we could do. Besides, we are working at a great disadvantage, and shall be until the new boilers are received and put into operation at No. 3 shaft, as we cannot at present work as many miners, nor at the places we wish, for want of adequate hoisting and pumping power.

At several points in the mine our prospects are improving. We have a fine vein in 50 fm. level, east of No. 10 shaft, from which place we raised last month upwards of two and three tuns each; this is now a vertical mass of 10 fm. level, near No. 9, and the vein near this shaft continues to look favorable.

No. 3 shaft is nearly 60 feet under the 36 fm. level, and is rich in mass copper the entire distance. The stopes between Nos. 2 and 4 in the back of the 36 fm. level are generally productive, especially between shafts 3 and 4. The back of 60 fm. is also rich and productive; last week we blasted out a mass of 24 to 25 tuns, which is now being cut, and will come into May return. Over 70 fm. level, near No. 4, we have a mass of 10 to 15 tuns now exposed. In sinking No. 8 shaft, between 50 and 60 fm. levels, we raised from it last month some 4 tuns mass copper. This shaft also turnes out some good masses above 50 fm. level, and we expect much good ground in this part of the mine will become available during the Summer. The "open cut" is showing more copper again; we raised about 12 tuns of masses there last month, and several sheets are still exposed there at different points, and extending to the conglomerate.

We expect to make a better return of product for May, and to realize a considerable monthly increase after we get the new boilers in place, and all our machinery fully at work again as usual. The weather is now becoming quite warm, and nearly all the snow has disappeared. Our new supplies are beginning to arrive, and as the new boilers were to be ready for shipment from Detroit on the 15th inst., I expect they are now on the way up."

ROCKLAND MINE.—Our April product, as per inclosed return, shows an increase over March, and foots up 28½ tuns. In the 40 fm. level, both east and west of No. 3 shaft, the drifts are exposing some good masses of copper; which, with the proceeds of the stamps now fully at work, will and subsidly increase our returns for May. The same lot near No. 1 shaft is also promising well in drifting, the vein growing better near the bottom. We are all in good spirits about the improved and still improving prospects of the mine.

THOMPSON BROTHERS, No. 2 Wall-st., offer for sale at all times, UNITED STATES and STATE STOCKS for investment or Banking purposes, in amounts to suit.

Orders for the purchase or sale of Stocks on commission promptly executed.

N. Y. Wholesale Prices of Country Produce.

FOR THE WEEK ENDING WEDNESDAY, MAY 25, 1859.

[Reported exclusively for THE N. Y. TRIBUNE, by DREW & FRENCH, Commission Merchants, No. 6 Erie Buildings.]

NOTICE TO CONSIGNORS OF FARM PRODUCE.—Put up everything in neat order. Mark plain, and like directions on every package, including weight, with tare, count, and name of articles. Also inclose a bill of particulars inside of one package, marked "Bill," and always send one by mail, with notice when and how things are forwarded.

COMMISSIONS.—For selling Berries, Fruits, &c., where packages are returned, and on small lots of stuff, 10 ₱ cent. Other Farm Produce generally, 5 ₱ cent.

QUOTATIONS are for sales of good Produce, in good order, at wholesale, such as Farmers realize, and not Jobbers' or Speculators' prices.

BUTTER—The receipts for the week foot up 12,241 packages, previous week, 9,268 packages. Exports for week ending May 24, 32,100 lbs. Strictly fine yellow Butter is in great demand, and valable at 20c., but very few lots can be cleared at this figure. California shippers are beginning to move a little, and are taking choice Western Reserve at 18c. White buttons and mixed colors are judiciously cleared out at comparatively low figures, as hot weather would soon reduce them to the lowest grade.

The Butter-making season has opened very early, and very auspiciously. Dairymen are already holding on to their choice Butter, for better prices and the quantity of choice grades in market is sensibly diminished by this course. Should the season continue favorable, the make must be very large. The experience of the last year is not calculated to encourage contractors to commit themselves to very high prices, or to give producers unlimited confidence in their promises.

There is now no apparent prospect of any unusual demand, so that all things considered we may reasonably look for a lower range of prices than last year. We simply wish to indicate the aspects of the trade. Let those interested consider the facts, shape their own policy, and abide the result without grumbling. We quote:

Orange Co., pails, ₱ lb.	20 @22	West. Reserve, choice	16 @18

State, ex half firkin tubs	19 @20	Old State	10 @12
State, extra Welsh tubs,	18 @19	Grease Butter	8 @ 8½
State, fair to good	15 @17		

CHEESE—The market is dull except for the finest qualities, and these sell readily at about 10c.; but we estimate that not more than one dairy in fifteen reaches this standard. Old Cheese is about done, and we drop the quotation. A year ago new Cheese came in contact with a heavy stock of old, which is not the case this season; hence the better rates at which the new is selling. We quote:

Extra quality, ₱ lb.	9½@10	Common and Skimmed	3 @ 7

FLAX—The receipts have increased, and foot up for the week 3,553 bbls. The market has been steady, at a fraction below the figures of our last report. We quote:

HOPS continue very dull at 8@12c. for new, and 32@36c. for old.

POTATOES—The receipts of old continue quite light, and choice qualities are again a little higher. The receipts of new from Charleston foot up 1,151 bbls., rather green, but better than the previous week, and sold at $3 50 ₱ bbl. We quote:
