"THE PORCH TOO BIG"

Under the above caption, the Greenwood Journal of yesterday prints the following editorial comment: In our Southern climate nothing adds more to the comfort of a home than a good sized veranda, but the house must be large enough or the thing will look ridiculous.

The same thing applies to a speech. The introduction should not be long. The speaker should not afford to keep his audience standing too long in the porch, be it small or large.

Now, it strikes us that a performance of this kind is not only in bad taste, but it is in one sense a reflection upon the intelligence of the audience and a bore, not only to the audience, but to the speaker.

We have an idea to whom our contemporary refers, and, if we are correct in our surmise, we can assure him that the introduction which he thinks was of "frightful proportions," was fully as good if not better than that which followed.

But since our contemporary has brought up the subject of speeches, let us consider the speech of that "gentleman of national reputation" to whom he refers.

Somehow or other, we never did think as well of the man who thinks that those who disagree with him are either fools or grafters as we do the man who is hopelessly fixed in his own opinions and not amenable to reason.

Weather Forecast—Fair Wednesday and Thursday.

THE COST OF PREPAREDNESS

The surest thing about preparedness is that it is going to cost the American people a heap of money. Our army and navy have always cost us more per soldier and sailor and gun and ship than those of any other nation.

The government has met with an unpleasant surprise in letting contracts for two new battleships. It finds that the ships can't be built for anywhere near the usual price.

tions stored up to fight a great war, without either counting the cost or suggesting how it is to be met. It is unquestionably necessary to strengthen our defenses.

THE DEATH PENALTY

On the same day that Joseph Hillstrom, the "I. W. W.," was shot to death as a convicted murderer in the Utah penitentiary, William Zimmer, convicted of murder in Baltimore, was sentenced to serve one day in jail for his crime.

These cases represent the extremes in our treatment of murderers. And absurd as it appears to punish a man with only one day's imprisonment for killing a human being, the Baltimore penalty more nearly represents American sentiment than does the Utah penalty.

There were great differences, of course. Joseph Hillstrom was found guilty of deliberate murder. His record was considered bad, and his prominence in I. W. W. activity from which Utah has suffered much, was looked upon as aggravating his offense.

William Zimmer, the Baltimore murderer, is a paralytic, 67 years old. The man he killed was proprietor of a cheap lodging house. Zimmer, while drunk, had an altercation with him, and struck one blow with his fist, which resulted in the victim's death.

Details of German Gun. Although the 42-cm. guns used by the Germans in battering down the fortifications at Liege and Namur attracted world-wide attention during the early stages of the war, the secret of its dimensions and other features has been so jealously guarded that practically nothing has been made public in regard to this monster mortar.
