MINING, BUSINESS AND STOCKS

SCRANTON BIG LEAD-ZINC MINE

A Large Body of High Grade Lead Ore Encountered During This Week.

FOUND IN AN UPRAISE

Overlying a Zinc Strata—North Tintic Property is Well Equipped.

The Scranton mine in the North Tintic district continues to astonish its owners. Developments in this property during the past few months have been of such an important character that the property promises to become one of the largest shippers of lead ore in the state, and it already carries the honor of largest producer of zinc. In reality, the Scranton is two mines instead of one, for there are veins of lead containing no zinc and veins of zinc containing no lead.

During the past week an upraise made from the tunnel penetrating the Eldorado claim cut into a 12-foot body of lead, immediately overlying a strata of zinc, the whole of which appears to be of shipping grade.

Secy. W. H. Brammel spent several days at the mine this week and, naturally, is decidedly well pleased with existing conditions. He says the company is forwarding to the markets about 40 tons of ore daily and no attempt has been made to do any stoping; all of the ore extracted being that encountered in regular course of development. The mine is situated five miles from the tracks of the Salt Lake route and sixteen head of horses are kept on the road constantly handling the ore traffic.

The mine is very well equipped for operation and has the finest mine bunk house in the state. Each employe occupied a room to himself and the company supplied an iron bed and good mattress. The boarding house is also well equipped and the management serves meals that would put some of the so-called first class restaurants in Salt Lake in the shade.

The company has about 40 men in its employ at the present time.

ON MINING EXCHANGE.

Daly Judge Closed the Week Down—Closing Quotations and Sales.

Although the weather has been extremely warm during the week, the mining stock brokers have done a fair volume of business. Compared to what they did during the corresponding period a year ago, the showing made is a very good one.

Daly Judge has been somewhat of a disappointment and has closed the week on a decline, although there is no good reason for it. Conditions at the mine are reported to have been never better and officials of the company say the net monthly production is running on the basis of about $45,600. But there has been a limited demand for the stock; it has been offered in several hundred share lots on several occasions with a break in the market resulting. Considerable trading has been done in Columbus Consolidated, while South Columbus has stiffened up on the strength of the part being played by those who have been after a control. Lower Mammoth has held its own and Nevada Hills has fluctuated between $2.25 and $2.50. New York has done fairly well, but is somewhat depressed today. With the close of trading a recess was taken until next Wednesday morning.

The closing quotations and sales today were:

TINTIC ORE SHIPMENTS.

Output of Juab County Camp This Week 105 Carloads.

The ore shipments from the Tintic mining district this week aggregated 105 carloads, the shippers and amounts being: Mammoth, 9; May Day, 2; Ridge-Valley, 3; Scranton, 4; Swansea, 3; Uncle Sam, 2; Victoria, 3; Yankee, 4; Dragon Iron, 13; Eagle & Blue Bell, 7; Eureka Hill, 4; Gemini, 5; Grand Central, 6; Ajax, 3; Bettes lease, 2; Beck Tunnel, 8; Black Jack, 8; Bullion-Beck, 9; Carisa, 4; Centennial Eureka, 6.

UNITED STATES CHANGES.

Official Confirmation of Appointment Of New Officials Received.

Announcement has been made of important changes in the operating staff at the mine and smelter of the United States Smelting, Refining & Mining company in Shasta county, Cal.

Frederick Lyon, who has served the company as general manager with headquarters at Kennett, Cal., has been advanced, and will hereafter have charge of all the company's Pacific coast business, making his headquarters at San Francisco. At the mine Mr. Lyon has been succeeded by A. S. Haskell of Butte; James H. Kirvin, formerly connected with the Bingham Consolidated metallurgical department, has succeeded Mr. Rhoades as superintendent of smelter, with Walter H. Keith, formerly superintendent of the Takima Smelting company's plant at Takilma, Or., as his assistant.

Mr. R. D. Rhodes now serves the United States company in an advisory capacity to the several smelter superintendents among the company's system of plants. Although the appointments were made sometime ago, the fact has been overlooked by western newspapers.

In the same camp the Balaklalla Consolidated Copper company is pushing preliminary work towards the early construction of the proposed reduction works and the company has about 250 men in its employ. General Manager Robert T. White has taken personal charge of the work, but is ably assisted by Charles Kirchin, smelter superintendent, who went to the Balaklalla from the Sumpter Smelting company, operating at Sumpter, Or.

ZINC COMPANY INSOLVENT.

Montana Concern Finds Itself in Courts And Unable to Pay.

New York, July 20.—A petition in bankruptcy was filed today against the Montana Zinc company of No. 42 Broadway by these creditors: Albert J. Seligman, $5,610; Alvin L. Strasburger, $8,750 and Almon L. Bailey, $4,180, all for money lent to the company. It was alleged that the company is insolvent and admitted in writing its inability to pay its debts. Mr. Strasburger is president, Mr. Bailey, treasurer and Mr. Seligman chairman of the finance committee. The company was incorporated on May 31, 1904, under New York laws, with a capital stock of $300,000 to develop the zinc industry in the Butte district in Montana. A large construction plant was erected at Walkerville, Mont., at a cost of $150,000 and it was reported here today that the plant had been destroyed by fire. The liabilities are estimated at $100,000, the greater part of which is to officers and investors of the company. Judge Hough of the United States district court, appointed Robert C. Morris receiver of the assets, on the application of Liebmann, Naumburg and Tanser, who stated that the assets are about $20,250.

HAS PLACED BONDS.

Utah Apex Company Has Money to Carry Out Proposed Plans.

A private dispatch from Boston bears the information that the Utah Apex Mining company had placed $100,000 worth of first mortgage convertable bonds through one of the big brokerage firms of that city.

The stockholders of the company at a recent meeting authorized a $500,000 bond issue, but soon afterwards E. R. Hastings, the president of the company, stated that it would not be necessary to place more than one-fifth of them to carry out the work that had been planned for the development and equipment of the mine.

The property is being equipped with an aerial tramway system, a new air compressor plant is being installed and the management is carrying on a vigorous and systematic campaign.

NEVADA COPPER AT YERRINGTON

Has Provided for the Future by The Acquisition of Valuable Water Rights.

ORE EVERYWHERE IN DOUGLAS

Working Force at Ludwig to be Increased—Magnetic Concentrator at the Bluestone.

Special Correspondence.

Yerrington, Nevada, July 12.—The Nevada Copper company, which was organized some time ago by Salt Lake and Boston parties, has taken the precaution to provide ample water supply for the operation of reduction works in the future. During the past week agents of the company have secured rights, which will be very valuable as the country develops.

At the Douglas mine, which formed the basis for the organization of the Nevada Copper company, development work is progressing. On the Ludwig south extension shaft where good ore has been continuous from top to bottom, two men are going down on the south extension of the Ludwig ore body, from which the latter company has obtained some big shipments of high grade carbonate ore.

The force at the Ludwig mine has been considerably increased and officials of that company say they will soon have eighty men on the payrolls. At the Ludwig there is but one point of attack, while on the Douglas group there are at least a dozen; where there is an absolute certainty of exposing ore bodies. Work in the Haggenbarth tunnel on the Douglas is going ahead nicely, while on the surface a good grade of ore has been exposed in many places. Some good looking sulphides have been taken from the Pearce shaft, while in the Orem winze the showing is most gratifying to those under whose direction the property is being developed. This winze has been going down on a soft iron stained, but leached, limestone, showing copper carbonates. This condition is said to be very assuring.

The weather has been very hot lately, although the nights are cool enough to break the monotony of the day. Buckskin, the new gold camp, continues to boom, and can now boast of quite a population under canvas.

At the Bluestone mine, which is owned by Captain Delamar, the magnetic concentrating plant is in operation and from it is being turned out a high grade concentrate.

IN ANDY TUNNEL.

Development of Utah-Apex Ore Body Shows Good Results.

The development of as well as the work of adding new equipment to the Utah Apex mine of Bingham is progressing very satisfactory. The lead silver ore body encountered in the Andy tunnel sometime ago has been followed for a distance of over 200 feet and a cross-cut shows the vein to have a width in one place of 30 feet. Samples taken along this cross-cut for a distance of 12 feet assayed 9.1 per cent lead, 1.41 ounces silver and .31 per cent copper with a heavy percentage of iron. Samples taken from the dump assayed 40 per cent lead, while the first class ores have run as high as 73 per cent in lead.

On the 6th inst. an average of the face of the drift gave assay returns of .18 ounces in gold, 12 ounces in silver, .8 per cent lead and 4.6 per cent copper, with a heavy iron excess. As the drift is extended the copper values appear to increase.

READY FOR BUSINESS.

Siegel Mines in Nevada Preparing to Produce Heavily.

Henry L. Siegel, manager of the Siegel Mining company's mines at Siegel, Nevada, has returned from a trip to camp. Now that the Nevada Northern railroad has been completed to Cherry creek, the wagon haul has been cut down to 22 miles and Mr. Siegel is arranging to inaugurate a vigorous shipping campaign. With this object in view, Mr. Siegel will provide the mine with its own transportation facilities and has entered the market for several teams and wagons.

Teamsters are so busy over in Nevada that it is a difficult matter to get the best of service and for that reason Mr. Siegel has concluded the best plan is for the company to own its own outfits.

Freighting has become one of the most lucrative lines of business in White Pine county. Four to six-horse teams bring the owners in $25 a day, the expenses are not over $7 a day per outfit, Mr. Siegel says, leaving a clear profit a day of $18.

Conditions at the mines are said to be very satisfactory, indeed, and the company is certain to make a good shipping record before the close of the present year.

WILL SINK SHAFTS.

Davis-Daly Company Carrying on Vigorous Development Campaign.

The Davis-Daly company at Butte has announced two places at which it will sink deep shafts, one of which is on the Silver King mine and the other on the Mt. Moriah, says the Standard of Anaconda. Two others will be sunk, but the company is not ready to announce their location. The shaft on the Silver King is about 175 feet deep and is small, but the company intends to enlarge it to a double-compartment and possibly a three-compartment. The one on the Mt. Moriah is also small. It is deeper than that on the Silver King, and its bottom is practically on the apex of a vein of copper-silver ore. This mine adjoins the West Seward on the west and the veins of the latter extend into it. The Silver King is a silver-gold property that may develop into copper with depth. The ore so far taken from it is very rich in the white metal.

Machinery for both shafts has been ordered and is expected in Butte in about three weeks. Ten days or two weeks more will be required to install it. The one for the Silver King will be put up first. Both engines will be only temporary, for when depth is attained and the ground below explored the company will have a better understanding of what it requires in the way of hoisting apparatus and can govern itself accordingly. It expects to sink both shafts to an indefinite depth; anywhere from 1,000 to 2,500 feet.

NEW COMPANY FORMED.

The Interstate Mining & Milling company of this city has filed its articles of incorporation with the county clerk. Its capital stock is $100,000, divided into shares of the par value of 25 cents each. G. B. Kelly is president; R. J. Stewart, vice president; W. J. Ball, secretary; Mrs. M. J. Stewart, treasurer. The company owns some claims in the Silver Lake district, Utah county.

WAITED MANY YEARS.

Correspondent Tells Story of How Two Desert Veterans Became Wealthy.

Special Correspondence.

Round Mountain, Nev., July 16.—The vitalizing of the long dormant mining industries of the Jefferson canyon section has brought into the foreground on the stage of mining action two figures in the passing show who, Rip Van Winkle like, have awakened to a new era of human events after a period of somnolence dating from the demonetizing of silver. These two survivors of the silver age in Nevada took up residence in the canyon at the time the white metal was first discovered in that locality and throughout all the intervening years have remained loyal to the camp.

Both men were young and virile on that day in the early seventies when they followed the beckoning finger of the Goddess of Fortune into the uncharted desert wastes. Today each yet retains the virility of his yesterday, but beard and hair have been blanched by the hand of time to the whiteness of the snow-capped peaks whose treasure they have so long sought.

Of the survivors of the cataclysm which swept over the camp coincident with what has been termed the "crime of '73," Charles Harrison and Charles Kanrohat alone remained faithful, and taking up their abode amid the ruins of the once prosperous mining community they worked and dreamed the years away, each sustained and encouraged in his labors by that most optimistic of all dreams, the dream of wealth. Unlike most dreams they awake to its realization, for in the winter of their lives their ships have come in, and each is well freighted with treasure. While their argosies were in the offing they prospected almost continuously, and yet while they remained true to the scene of their early mining effort they developed a bitter enmity for each other.

The trouble between these two old, desert veterans is of many years' standing, and had its inception in a divergence of opinion in regard to the proper way to prospect and prove up the Jefferson canyon country. Harrison pinned his faith to the partially developed properties abandoned by disheartened operators; Kanrohat declaimed in favor of searching for new ledges. The argument grew heated, the retort discourteous was passed, and each swore never to again speak to the other.

For years this state of affairs has existed. Harrison has labored year after year with the object of proving the worth of the known ore bodies. Kanrohat has toiled with equal persistence to demonstrate the correctness of his theory that the road to wealth lay along the course of the vein outcrops. Residing within 100 yards of each other in the main gulch of the canyon, but exchanging no friendly glance or word of greeting each man has lived his life apart. If either regrets the words of anger spoken, he has given no sign during 30 years of solitude, and with the advent of another era of mining prosperity in the section over which each has kept his lonely vigil the ban of their silence remains unbroken.

Kanrohat has bonded his holdings for $165,000, has received a substantial payment as earnest of good faith, and it appears as though an immediate sale would be consummated. Harrison has disposed of his interests for a sum in excess of $100,000, and each has entered upon the enjoyment of the fruits of a lifetime of arduous toil. The funny part of this feud is the fact that both Harrison and Kanrohat are correct in their deduction, and that after 30 years of animosity hostilities close with honors even.

Mining conditions throughout the entire Round Mountain Jefferson canyon section are continually improving and interest in the mines and prospects is on the increase, but those properties in the vicinity of the town of Round Mountain are receiving the greater attention from the investing public.

BOSTON CLOSE.

Today's closing on stocks in Boston, as reported over the Pollock wires especially for the Deseret News:

CONCENTRATES.

Alex Colbath expects to depart for southern California today on mining business.

Today is the date of payment for the recent dividends posted by the Tonopah Mining company.

Manager George H. Dern of the Consolidated Mercur is expected home from the east on an early train.

S. R. Callway, formerly connected with the Annie Laurie mine in the Gold Mountain district, has gone to the Grand Gulch in Arizona.

S. Herbert Williams, managing director of the Shawmut in Bingham, is in the city again and will give the mine of his company a thorough looking over.

The ore and bullion settlements reported late yesterday by McCornick & Company were: Crude ore and concentrate, $26,000; base bullion, $44,000; gold bullion, $7,800.

Thomas S. Chalmers, representing the Chalmers-Williams Machinery company, of which Robert Glendenning of this city is the local representative, is in the city.

Harry Wassman, superintendent of the Washoe smelters of the Amalgamated Copper company, at Anaconda, is in the city today en route home from the Elk's reunion at Denver. He expects to remain in the city several days, during which he will take occasion to visit the new Garfield smelter.

M. F. Murray, manager of the Log Cabin property at Kimberly was in Richfield on Monday and left for Colorado Tuesday. He says active development will be resumed at the Log Cabin this fall. In the meantime work is being centered on the Colorado holdings of the company at Telluride, where some promising gold claims are being worked.—Richfield Reaper.

Postmaster G. W. Irwin of Butte, who is at the Wilson, says the smelter smoke nuisance in Butte was only made worse by the meddling of experts. It has been probably abated, he says, since Senator Clark built the highest concrete stack in the world at his smelter, 336 feet with devices to avoid trouble with fumes. Mr. Irwin says the Chicago, Milwaukee & St. Paul road is gridironing the state, and will extend to Seattle.

The investigation of the mining districts of Southern Nevada, which has been carried on for several seasons by members of the United States Geological survey, will be continued this summer by Mr. G. H. Garry, assistant geologist, under the supervision of Mr. F. L. Ransome, geologist. A geological examination of the New Manhattan district will be made by Mr. Ransome personally who will also visit the Goldfield and Bullfrog dis-

One hundred De Forest Wireless stock at $3.00. Must be sold at once, so give us a bid. E. M. West & Co., Tel. 165. 327 D. F. Walker block.

E. M. WEST & Co., stock brokers, D. F. Walker Blk. Tel. 165; res. 3510-x.

BANK STATEMENT.

New York, July 21.—The statement of the clearing house banks for the week shows that the banks hold $19,391,000 over the legal reserve requirements. This is an increase of $6,560,200 as compared with last week. The statement follows:

Martha S. Brown to Salt Lake Security & Trust company, sheriff's deed to lots 41 and 42, block 1, Perkin's third addition 2,300

STOCKS FAILED TO SHOW ANIMATION

Changes at Opening Insignificant And Volume of Business Small.

FIRST TENDENCY UPWARD.

Bank Statement Unusually Favorable But Had Little Effect on the Market.

New York, July 21.—Opening prices in the stock market today showed insignificant changes from last night on a limited volume of business. Buying orders carried prices upward for half an hour and then subsided. St. Paul and Reading rose about 1½, and Union Pacific, Northern Pacific, Brooklyn Transit, Tennessee Coal, Sugar and several others about 1. Pacific Coast sold at a decline of 2½. Prices were a fraction below the best all around at 11 o'clock.

Prices were inclined to droop pending the appearance of the bank statement. There was dullness and hesitation afterwards notwithstanding the extraordinarily favorable showing of the banks. St. Paul preferred sold at an advance of 4, Northwestern 1¼ and Southern Pacific and Great Northern preferred 1. Minneapolis, St. Paul and Sault Ste Marie fell 3, Rock Island preferred 1¼ and B. & O. preferred 1. The demand was not sufficient to absorb traders' profit-taking. Prices drifted off and the closing was dull and irregular.

LIVESTOCK.

CHICAGO.

Chicago, July 21.—Cattle—Receipts, 500; market steady. Beeves, 4.00@6.40; cows and heifers, 1.25@5.40; stockers and feeders, 2.60@4.30; calves, 5.00@6.75.

PRODUCE.

CHICAGO.

Chicago, July 21.—The wheat market opened firm today on a fair demand by commission houses. Cables were fairly steady and the advices from Russia were bullish. The favorable weather in this country, however, caused a considerable amount of realizing sales, which soon weakened the market. September opened ⅛ to ⅜ higher at 77⅞ to 78, sold at 78@78½, and then declined to 77.

The corn market was quiet and steady. September opened ⅛@¼ lower to ¼ higher at 49⅝ to 50¼ and held within this range.

The oats market was steady but trading was very light. September opened unchanged to ⅛ higher at 32¾ to 32⅞, sold at 33 @33⅛ and then declined to 32⅝.

September pork was somewhat easier on profit-taking sales. September pork opened 12½ lower at 17.27½; lard was up 2½ at 8.95½, and ribs were 2½ higher at 9.50.

Close: Wheat—July 76¼; Sept., 76⅞.
Corn—July, 49⅝; Sept., 49½.
Oats—July, 33⅛; Sept., 32⅝.
Pork—Sept., 17.30.
Lard—July, 8.75; Sept., 8.85.
Ribs—July and Sept., 9.05.
Rye—July, 85.
Barley—Feeding, Sept., 38½@39½.
Flax and Clover—Nothing doing.
Timothy—Sept., 4.32½@4.37½.
Cash: Wheat—No. 2 red, 77⅞@78; No. 2 red, 76½@77; No. 3 hard, 76@77; No. 3 hard, new 75@76; No. 1 northern, 78⅝@80; No. 2 northern, 76⅝@78; No. 3 spring, 76@77.
Corn—No. 2, 50¼; No. 3, 49½@50.
Oats—No. 2, 32@33; No. 3, 31½@32.

The close was weak and near the lowest point of the day with September off 1 cent at 76⅞.

Corn—The close was weak with September down ⅝@¾ at 49½.

SUGAR AND COFFEE.

New York, July 21.—Sugar, raw, firm. Fair refining, 3¼; centrifugal, .96 test, 3¾; molasses sugar, 3.

Refined—Steady. Crushed, 5.50; powdered, 4.90; granulated, 4.80.

Coffee—Firm. No. 7 Rio 7¾.

LIVERPOOL GRAIN.

Liverpool, July 21.—Close: Wheat—July, 6s 7½d; Sept., 6s 7d; Dec., 6s 7½d. Weather cloudy.

It costs nothing extra, but means a great deal, to say MOUNT'S when you go to buy Pork and Beans or Pickles.
