FINANCIAL NEWS AND COMMENT

Libertys Advance and Foreign Exchange Soars—Stock Market Quieter.

Interest in the financial markets centred yesterday chiefly in Liberty bonds and foreign exchange. Stocks were quieter than on Tuesday, and there were numerous evidences of the return of business into the hands of professional traders, resulting in a decidedly uneven array of quotations at the close. There was, however, no doubt of the power behind the demand for Government war bonds, whose gains of a quarter to nearly a full point added to the advances of preceding sessions of the week, carried several of the Liberty issues 2 to about 3 points above the lowest prices recorded in the last fortnight of the old year. The upturn of Government obligations could be explained on several grounds. In the first place, investment yields extending from about 5 to nearly 6½ per cent. in the various maturities, excepting the first 3½s, has attracted funds from investors with free cash on hand at this time. Also, the reports of bond dealers indicate a round amount of repurchases resultant from sales for income tax record during the late months of 1920, and the expectation in many quarters of easing money conditions has evidently brought into the market much buying. This last factor, too, may be credited for the better tone seen this week in corporation bonds, for it is a financial axiom that when money and credit cheapens the effect is a rise of fixed interest bearing securities. Purchases in anticipation of lower money rates have not yet witnessed the actual event of a money decline, as the call rate continued yesterday at 7 per cent., although the demand was less than the day before, and time funds were as firm as ever.

The day's sharp upturn of 11½ cents in sterling exchange carried the rate to the highest point since the second week of October. Francs gained considerable ground, which was all the more marked in contrast with the sagging tendency in the last days of December, and Holland and Swedish quotations rose with vigor. From what could be learned in banking quarters, the covering of short contracts supplied much of the day's business, and this movement was probably furthered by expectation of results from efforts centred in London to increase credits for the exportation of goods to the Continent and Far Eastern countries. News about steps to be taken in this direction is still too vague to allow of description, but evidently British bankers and exporters are looking for Government assistance in some manner. An influence on the exchange market, whose product should be recognized in a few days, lies in the movement of gold from India to the United States, now getting under way. Offerings of commercial bills on London were reported light, and this made more difficult the task of buyers to fill requirements without bidding rates upward.

In the stock market professional selling made inroads upon some of the oil, rail and miscellaneous manufacturing company shares. But it spoke well for the underlying stability of prices that a reduction of the Midvale Steel and Ordnance Company's quarterly dividend had little effect upon other steel stocks. In fact, Crucible Steel advanced 3 points, and other independent issues were no more than irregular. What was more significant, perhaps, than the steadiness of the steel shares in the face of the Midvale dividend action was the reception accorded information in the weekly survey of the *Iron Age*, that the country's pig iron production in December was 231,900 tons, or 8 per cent. less than in November, while active furnaces were 51 less at the end than at the beginning of December. Copper stocks were strong, aided by an impression that the market for the metal was looking up.

The response to news that the great Amoskeag mills had reopened on full time, with other plants getting under way, was a rise of about $4 a bale in cotton future prices. Wheat, however, lost ground, falling from 3 to 4½ cents a bushel at Chicago.
