Water Power Securities

The diminishing supply of coal and oil presages a more extensive use of hydro-electric power, and discriminating investors recognize that no business rests upon a more secure foundation than that of well established water power companies.

We have prepared a circular describing the securities and properties of several of the largest and most important of the water power companies of this continent and shall be pleased to send a copy upon request.

Write for Circular No. 1748.

FINANCIAL NEWS AND COMMENT

Realizing Features Pre-Holiday Stock Market, Which Holds Well.

The stock market session preceding a holiday is usually marked by profit taking transactions on one side or the other, and yesterday afforded no exception to that process. Shares of most prominence in the last fortnight had risen from 4 to as much as 20 points, hence there was incentive for speculative purchasers of recent days to lie back and see what might happen before the markets reopened on Saturday. The price list reflected selling of steel, rubber and copper shares and several specialties, some declines running as high as 1½ points, but the main body of stocks, while highly irregular at times, was by no means weak, and certain shares, notably Atlantic, Gulf and West Indies and Houston Oil, scored sharp advances. Call money lent at 6½ per cent. on the official market, with sizable supplies offered outside at 6 per cent.

There was opportunity for uncertainty in the market movement contained in news of communist uprisings in Germany, yet prices appeared to pay no attention whatever to this development. In speculative quarters closest to trading—and that describes about all the factors at work in the market—there was a suspicion that more than a coincidence connected the sporadic German riots with the position of Germany in regard to the reparation payment. But, be that as it may, the foreign exchanges indicated no disturbance in European centres and traders in stocks took their cue early from the steady position of sterling between $3.91¼ and $3.91⅜. Francs changed little on the day, and a moderate decline of marks was no more than the reaction of several days of last week when business was a little more active. In foreign events, now passing through almost daily changes of great interest, the financial markets on this side are more attracted to happenings in Russia than elsewhere. Sentimental rather than practical considerations clearly must direct the attitude of the American business man toward the Russian situation for some time to come, but this alters not all the prospect for a new outlook for American goods if the complexion of Soviet methods is found to be changed in a genuine fashion. The cotton market again showed the stimulating effect of the Russian news, although a reaction in Liverpool in final transactions there induced sales in New York and eliminated most of the morning advance. The week's rise of 100 points or more was doubtless potent in urging realizing sales as was the case in stocks.

The day's domestic factors of direct application to security values were comprised in railroad earnings and in additional indications of improvement in woollen manufacturing. The largest unit in the woollen industry was reported well sold up for autumn delivery, which spoke with equal authority of the effect of price reductions since the first was made last September and of reduced stocks of clothing. The Southern Pacific's statement for February was illuminating of success in reducing costs, as the company was enabled to expand an increase of about $1,000,000 in gross receipts into a gain of $2,148,000 in net operating revenue as compared with the same month of last year. The report of the Union Pacific on Wednesday displayed the same sort of progress, although final results in dollars were less.

Another, the weekly statement by the Bank of England, found the minimum rate of discount still at 7 per cent. A decline of the reserve ratio, while slight, showed that money was tight over there, a situation connected with the approaching end of the fiscal year.
