FINANCIAL NEWS AND COMMENT

Stocks Recover in Afternoon, With Call Money at 7 1-2—Exchanges Advance.

The stock market hardly knew yesterday morning what to do about the Railroad Labor Board's decision on rail wages. The average reduction of 12 per cent. was less than the maximum suggested in preliminary estimates and only far enough above the minimum reported from Chicago a few days ago to indicate an apparent straddle between the two extremes of 10 and 15 per cent. Stocks receded for a time, but later the constructive aspects of the mandate were appreciated by traders and early declines were gradually eliminated. Outside of a few issues affected by factors peculiar to themselves, including Crucible Steel, Pierce Arrow preferred and several sugar and tobacco shares, the closing showed net gains. Northern Pacific, Mexican Petroleum, Studebaker, Royal Dutch and others left off more than a point higher than the day before. Business was slightly more active than it was on Tuesday and the afternoon recovery proceeded in the face of a call loan rate of 7½ per cent. Liberty 3½ per cent. bonds reached a new low level under 87 and the bond market as a whole was rather unsteady at times, evidently reflecting the firm tone of money rates.

The full effect of rail wage reductions cannot be ascertained yet. The estimate that $400,000,000 will be lopped off wage costs of the roads is based on a roster of workers as large as that of last summer when a 21 per cent. increase carried the payroll $600,000,000 upward. The number of employees is probably 20 per cent. less just now. Traffic, however, is expected to improve in a few weeks when grain begins to move to storage points and with growth of gross income it stands to reason that the lessening of expense for labor hire will show forth in net revenue. As it stands by itself, the Railroad Labor Board's prescribed reduction is less than railroad employers had hoped for, but as an earnest of official attention to a troublesome phase of operating costs the cut commended itself to persons who realize that the liquidation of labor should be directed by consideration of the trend of living costs. The roads are economizing in many directions and the combination of all efforts to lower expenses and prospects of improved freight movements are believed in financial quarters to be brightening the rail outlook. A matter of growing importance is the movement in Washington to reduce freight charges on commodities, a factor the influence of which upon railroad income cannot be determined yet. A concession in freight rates would not necessarily nullify or impair the force of wage cuts, provided that it helped to stimulate traffic.

The foreign exchange market and the market for wheat futures were decidedly interesting. Relieved of the pressure entailed in last week's transfer of German funds to this side from Europe, sterling and franc rates advanced vigorously, the former rising about 2 cents to the pound and the latter 12 points. Dutch, Swiss and Belgian exchange also swung forward and the German rate was fairly steady. The deposit of $35,700,000 in the local Reserve Bank for the account of the Reparations Commission by no means removes the possibility of additional accumulation of funds here in the near future, with fresh pressure on the exchanges, but the market action showed that the factors working for higher exchanges, which were shunted aside by the reparations transaction, were again at work.

A rise of more than 8 cents a bushel in July wheat indicated that short covering of urgent character had not ceased with the completion of May contracts. But a spread of more than 40 cents between cash wheat and futures suggests that buying is urgent and supplies moderate.
