FINANCIAL NEWS AND COMMENT

General Decline in Stock Market Follows Pressure on Mex. Pete. Issues.

The market setting yesterday favored the efforts of speculators for the fall of values, for business began under the onus of unsettled sentiment, the product of Tuesday's extensive reaction in cotton and grain and hesitant tone of stocks. In consequence, bear pressure, concentrated on Mexican Petroleum and one or two allied issues, and bringing declines of more than 5 points among them, acted to undermine many industrial and not a few railroad stocks and declines were fairly general at the end of the session. The price list gave way easiest in the last hour. That the day's movement was engineered mainly by professional short sellers was indicated in the fact that the market gave no response whatsoever to the best news from the steel industry in two months; moreover, the supporting influence of easy call money—the rate going from 5 to 4½ per cent.—was entirely overcome by the flow of sales for the decline.

As the upturn of stocks in September ran parallel to the rise of cotton and the fairly firm trend of wheat, it was not surprising that the course of commodities should direct, to a degree, the movement of stocks yesterday and on the day before. December and May wheat options receded more than 3 cents a bushel to new low points for the season and the reaction of cotton was more extensive than it was on Tuesday. The reasons underlying the recent retreat of commodities have been outlined as completely in previous market discussions as the present stage of the harvesting warrants. It is certain that future events in those markets will have force in shaping the movement of securities, but the Street is beginning to take more account of matters vested in industry than was the case during the last fortnight. During the period when cotton prices were advancing rapidly the factor of secondary importance in moulding market sentiment was the showing made by August railroad returns. They have been digested, leaving the field open for examination of progress in manufacturing.

The week's reports on the steel and iron trades assuredly give reason for encouragement. The record of pig iron production in September lends more weight to belief that the depths of depression were reached in July than did the August figures. The September iron output, reported by the *Iron Age*, was 31,300 tons larger than the 954,193 tons made in August, and the daily production was 6 per cent. greater. There was a net gain of twelve furnaces in blast, and seven more were scheduled to start up in the fore part of October. The United States Steel Corporation's operations have risen to 38 per cent. of capacity, against 35 per cent. last week and not much more than 28 per cent. in the first week of August, while in one or two districts both corporation and independent plants are more active than are the average ones.

These figures are by no means impressive. As an earnest of gradual business growth, however, they are well worth while. The steel trade would welcome an increase of rail orders, which are still slack, but may expand as the carriers receive additional funds in settlement of claims growing out of Government operation during the war.

The complexion of the foreign exchange market has changed rapidly for the better this week without any complete explanation coming forward. Sterling advanced yesterday 2⅞ cents to the pound, making the improvement since Monday more than 4 cents. Nearly all European rates were firm and the appearance of the weekly statement of the Reichsbank, showing another expansion of more than 4,200,000,000 marks circulation, failed to disturb the rate of German exchange. One or two banks and trust companies have been making large remittances to London. A guess is that they represent in part the transfer of funds obtained from the sale of foreign owned American securities, mainly bonds sold on the rising market here.

FINANCIAL NOTES.

C. E. Denison & Co., 67 Milk street, Boston, have issued for distribution a list of municipal securities yielding 5.40 to 6 per cent.

The directors of the United Eastern Mining Company declared yesterday a distribution of 15 cents a share, payable on October 28 to its stockholders of record at the close of business on October 8.

Lee, Higginson & Co. are prepared to exchange at their Boston, New York or Chicago offices their outstanding interim certificates for the permanent 5 per cent. gold notes of the Bridgeport Hydraulic Company, dated June 1, 1921, due on June 1, 1925, and having coupons due on December 1, 1921, and subsequently attached.

Kenneth P. Budd of the firm of William Iselin & Co. has been appointed a director in the National Park Bank of New York.

Robert M. Ogden, formerly of Low, Dixon & Co., is in the bond department of Watson & White, 149 Broadway.

The American Grain and Feed Corporation has declared a dividend of 1¼ per cent. on its preferred stock, payable October 1 to its stockholders of record on September 15. It is the second dividend paid by the corporation during its four months' operations.
