RAINS HELP CROPS; GRAIN PRICES DROP

Fear of Further Damage in Corn Belt Is Dispelled—Wheat Unsettled.

CHICAGO, Aug. 18.—Timely showers and cooler temperature dispelling fear of damage to corn led to lower prices to-day for all grain. Wheat closed unsettled at 2¼c. to 2⅝c. net decline, with September $1⅝ to $1⅝ and December $1.01⅝ to $1.01⅞. Corn lost 2⅛c. to 2⅜c., and oats ⅞c. to 1⅛c. In provisions the outcome varied from 12½c. decline to a rise of 2½c.

Wheat was on the down grade from the start. The breaking of the drought and the passing of the hot wave led to general selling, especially as Liverpool quotations failed to reflect yesterday's advance here. Prospective quick settlement of the railroad strike also was construed as bearish in view of the likelihood of increased receipts. Besides, some notice was taken of a forecast that the wheat crop in three Western Canadian provinces would be 27,000,000 bushels larger than the last Government estimate.

Little power to rally was shown in the wheat market, final prices being near the lowest of the day. The only buying of consequence was attributed to Minneapolis mills. They took fairly good quantities of December delivery.

On the other hand, European continental finances were unimproved and export buying here was confined to 300,000 bushels. Furthermore, messages from the seaboard said Greek acceptances, which it had been supposed would be liberal, were relatively small.

Cornfields in Nebraska, Iowa, Illinois and Indiana all received more or less rain and prices here broke sharply. Rural offerings of corn to arrive were much decreased as values fell.

Oats were dull and merely followed corn.

Provisions averaged lower with grain and hogs.

"MODERN MILLER'S" OUTLOOK.

Special Dispatch to THE NEW YORK HERALD.

CHICAGO, Aug. 18.—*Modern Miller's* outlook on grain crops for harvesting this spring wheat in the Northwest has been favored by weather conditions and most of the work has been completed. Threshing is general in all but the most northern portions, with yields good to excellent. The four northwestern States have a promise of 220,000,000 bushels. Farm offerings of winter wheat are quite liberal. Transportation conditions remain a restricting influence. Much fall plowing is being done in the Southwest, except in portions where the ground is too dry."

MACY STOCKS IN BIG DEMAND.

It was announced yesterday that the demand for the new preferred and common stocks of R. H. Macy & Company, Inc., offered earlier in the week by Lehman Brothers, has been so great that it was found impossible to fill the orders of many of the customers of the Macy company who were referred to the bankers.
