NEW STEEL MERGER NEGOTIATIONS OFF

Youngstown Sheet and Tube Will Not Consolidate With Brier Hill.

YOUNGSTOWN, Ohio., Sept. 27.—Negotiations for the merger of the Youngstown Sheet and Tube Company and the Brier Hill Steel Company have been broken off, it was announced to-day in statements made public by both companies.

A statement given out by J. A. Campbell, president of the Sheet and Tube Company, said:

"There has never been any official proposition made, either by the Brier Hill Steel Company to sell its property to the Youngstown Sheet and Tube Company or by the Sheet and Tube to acquire the Brier Hill.

"There have been informal talks between some of the stockholders of Brier Hill and myself in reference to an exchange of stock of Brier Hill for Sheet and Tube and inasmuch as the Brier Hill contemplates making additions to its property, it was thought advisable by me to call a meeting of our directors to give the matter serious consideration.

"Brier Hill is a splendid property with valuable ore and limestone properties and new and up to date blast furnaces, steel plant and finishing mills, but it is not so well balanced as it might be, but with some additions in finishing capacity it can be made a very strong and well rounded property. Our directors, however, were of the opinion that we should not further increase our investment in this district."

J. B. Kennedy, chairman of the board of the Brier Hill Steel Company, confirmed the statement and added that his company would proceed with the program of expansion which it has under consideration.

WEATHER FAVORABLE TO CROPS LAST WEEK

However, Lack of Rain Causes Some Damage.

WASHINGTON, Sept. 27.—Weather conditions in most parts of the country the last week were favorable to the rapid maturing of late crops, according to the weekly review by the Weather Bureau issued to-night. The bureau's study showed, however, that insufficient moisture in many parts of the country had damaged pastures and meadows and had affected fall seeded grains.

Rain was needed also, the review reported, for the preparation of the soil and the seeding of fall grains over large areas. The minimum of moisture, however, permitted harvesting to go forward rapidly, excepting a few places in the South.

Frosts occurred in Colorado and in the Northern States from Minnesota eastward during the week, the review said, but caused little damage. The frost damage reported by the bureau was confined largely to Michigan, where potato vines were affected and unmatured beans suffered.

CANADA'S FOREIGN TRADE OFF.

Decline of $462,000,000 in Year's Exports and Imports.

OTTAWA, Sept. 27.—A total decline of $462,000,000 in Canada's import and export business for the year ended August 31 is noted in Dominion trade figures announced to-day. The decrease in trade with the United States alone as compared with the preceding twelve months amounted to $331,000,000, of which $143,000,000 was in exports and $188,000,000 imports. Canada's trade with the United Kingdom showed a net gain of $5,000,000, a slump of $24,000,000 in imports having been offset by a $29,000,000 gain in exports.

Total imports into the Dominion for the year were $732,000,000, compared with $961,000,000 during the preceding twelve months. In the same period exports were $779,000,000, compared with $1,012,000,000.
