FINANCIAL NEWS AND COMMENT

Downward Trend of Stocks Is Reversed—Marks 4,000 to Dollar, a New Low.

If any further evience were needed to show that the downfall of the Lloyd George Government had little or nothing to do with the movements of the various markets on Thursday it was supplied in yesterday's session, when there was a pretty complete reversal of trend. The general list of stocks and bonds recovered from the slump of the preceding day, sterling exchange worked higher and cotton made substantial gains, while the grain market, in a day of narrow fluctuations, recorded slight net losses in most instances.

So far as the stock market was concerned, it was still dominated almost entirely by professionals. The principal point of difference between yesterday's market and that of Thursday was that the professionals committed to the advance gained a larger measure of success than the clique operating for the decline. On Thursday the positions were reversed.

Public interest in stock fluctuations was a little greater yesterday, but this was because some of the lower priced stocks participated in the advance. Most of the advances during the last week have been confined to the high priced stocks such as Standard Oil of New Jersey, National Biscuit, Mexican Petroleum &c., and it has always been a difficult matter to attract a following in issues of that type.

Sterling exchange resumed the advance which had been interrupted by the resignation of Lloyd George and his Cabinet. It did not duplicate the best price of the preceding day, but was moderately strong nevertheless. The most interesting move in the exchange market was in German marks, which declined violently to a point where the currency unit could be bought at the rate of 4,000 for $1. There were several items in the news which might be expected to exercise a depressing influence on the market for German money. First, of course, was the resignation of Lloyd George. The announcement of Louis Barthou, French chairman of the Reparations Commission, that France demands a very rigid control over German finances was likewise no surprise. Certainly there was small reason for expecting any moderation in France's attitude on the British moratorium proposal, particularly since Lloyd George is out of the picture.

The German bank statement yesterday revealed a new high record in circulation, which now stands at 374,506,900,000 marks, an advance of more than 30,000,000,000 marks in the last week. This, too, was not surprising, but it suggests, nevertheless, that the decline in marks would have been uninterrupted even if the defeat of Lloyd George and the Barthou pronouncement had not been influences in the market. Probably they did no more than to accelerate the drop somewhat.

The indication toward the close of Thursday's market that the sudden big advance of the tax exempt 3½ per cent. war bonds on that day was somewhat a false move and largely the result of the execution of an urgent buying order was borne out yesterday, when further declines brought the price of that issue down to 100.82, a drop of 2.20 from the high mark of the preceding day. Other Liberty bonds moved narrowly and with some irregularity, but most issues declined slightly as the net result of the day's operations. Cotton was definitely strong, and all options sold within a few points of the year's high level. Call money held at 4½ per cent. all day, with little indication of easing just yet.

Statements that business and industrial conditions are not as good as in the last few weeks are refuted in weekly reviews of the general situation. Except for the item of collections, one of these reviews sets forth the general trade and industrial situation as the best since the latter part of the spring of 1920. Added to these indications are the continued heavy car loadings and bank clearings, &c., which leave little to be asked in the way of assurance as to the actual condition of affairs in the United States at this time.

17,850 MARKS TO POUND AND 4,000 TO DOLLAR

German Currency at New Lows in Exchange.

LONDON, Oct. 20.—German marks suffered a further slump later in the afternoon when they touched a new record of 17,850 to the pound under heavy selling.

BERLIN, Oct. 20.—Forebodings that Germany's creditors will now deal with her more harshly than in the past, coupled with nervousness resulting from the resignation of the Lloyd George Cabinet, was the general explanation given here to-day for the slump of the mark in London.

In the New York market German marks were quoted yesterday at the rate of 4,000 to the dollar, a new low record.
