CAPEL COURT HAS GAIN FOR YEAR

Leading Securities Show Advance as Compared With Last Christmas.

Special Cable to THE NEW YORK HERALD.
Copyright, 1922, by THE NEW YORK HERALD.
New York Herald Bureau, London, Dec. 24.

Capel Court suffered pre-holiday lassitude last week, but wound up in a cheerful mood. The markets started hopefully under the influence of American loan rumors, but when J. P. Morgan declared there could be no loan to Germany until the reparations question was settled interest evaporated, and throughout the remainder of the week pre-holiday inertia obtained. At one time the Near Eastern problem gave rise to some anxiety, but later an optimistic feeling pervaded the exchange regarding Lausanne, and the foreign departments were distinctly cheerful.

It is considered unlikely that much activity will be shown when the market reopens Wednesday, though it is a Stock Exchange axiom that a revival often starts between Christmas and New Year's. The customary disposition to take a hopeful view when the coming year is in prospect will be tempered by the knowledge that on January 15 the vexed question of reparations will assume greater prominence. The Turkish situation seems shaping up more favorably, and signs of trade improvement are welcomed, even though they lead no further than realizations on investment securities to provide funds for commerce.

Christmas finds most investors in a brighter frame of mind regarding their stocks and shares nearly all along the line, the prices of the leading securities showing an appreciation on the year. There are exceptions, notably among foreign bonds and oils. It was about this time last year that the stock market began steadily to recover from a long spell of depression following the post-armistice "boom," and as a result there is some year's end profit taking. Gilt edged securities are not so high as they have been during the year, but they show appreciation on the prices ruling last Christmas.

By way of comparison French national loans and German bonds are lower, therby reflecting the adverse movement of the franc and the mark as compared with sterling, and the uncertainty surrounding the financial outlook in France and Germany.
