ute of affection paid him by his personal friends—and all the men of Reading are Talfourds friends. He was born among them, in a position which gave him no more hopes of attaining his present eminence than the humblest among them had; he was educated at their Free Grammer School; he owed the attention he attracted as a boy to his industry and talent; he fought his way to the bar through difficulties of no ordinary character; he maintained his station during that long and wearying struggle which ever preceeds professional success by the continual and laborious exercise of his literary talents; he attained eminence and his townsmen, who had watched him with interest through his adversity, were proud of his achievments. There is no instance in England of a connection between constituent and representative, so pure and disinterested, so honorable alike to both, as that which exists between Talfourd and the electors of Reading If Talfourd were to cease to be a representative of Reading, that borough would probably return a Tory. As it is, he will continue to receive the suffrages of the electors so long as he continues to ask them. *Peacilings of Politicians.*

How like an imprisioned bird is Christianity!—The teachers of Humanity have been, and always are, gilding and adorning its cage, cleansing and sprinkling it with perfume, improving its drinking vessels, and calling us around it to gaze and see how beautiful the captive is, and admonishing us to plume our wings just so; not for flight, but that they may look decorous. Though one of delicate perception may detect something sweet and soothing in the poor bird's gentle note, and something cheering in its bolder melody, yet there is an unhealthy moaning in its music, and a lifelessness in its drooping wing which seperate it from its free and exulting mates of the woods and hills. Where is he who, with pious but not timid hand, may gently unlock its prison-house and say, "Go forth patient sufferer, and cheer the world with thy free and joyous song. Warble it in the ear of the young and happy, chant it melodiously at the window of the sufferer, till answering strain is heard throughout the universe." *'The dial'*

Though popularity, in some respects, is a desirable thing: yet it is not always a criterion of real ability; nor is it to be sought after with avidity as if it were with the foundation of happiness. It has been the occasion of ruin to many, and of distress to more. Those who have aimed at it have been generally left to disappointment and confusion.

It is said that three things the most difficult are—to keep a secret, to forget an injury, and to make good use of leisure.

When malice and envy sit upon the bench, reason and justice may ever sit silent at the bar.

Study the hapiness of others and you will promote your own.

The Commissioners appointed to resurvey the disputed teritory are on their return, having gone over the whole ground, and carefully examined it. It is stated that there is no doubt upon the minds of the Commissioners that the line claimed by the Americans is the true line. The report will probably be soon forthcoming.

CUBA, with a population of less than a million and a half, pays to the mother country the enormous revenue of $12,000,000.

The export of breadstuffs from Great Brittain, independent of rice, for the year ending 30th September, 1839, was $ 9,604,667.

An Iron Steamboat was launched at St. Louis on the 10th inst.

LIBERIA.—We learn by the latest arrival from Monrovia, that a great calamity befel the emigrants having been conveyed to that colony, by the Saluda, that 42 of them had died at Bassa Cove, where they were remaining until another place, known as Bixley could be put in readiness for them. If the above be the fate of emigrants, who can wonder that those who left the Saluda, recently, should have prefered Canada to Liberia —*Col. Amer.*

METHODISTS IN OHIO.—The number of Methodists in the Ohio Conference is 53,621. Of this number only 662 are blacks. There are 400 local preachers.

MOBILE Oct. 19.—The weather continues warm and rainy and the city is still very healthy, strangers are coming in and old citizens are returning from their northern tours daily. The business streets wear an animating appearance, but nothing is doing further than receiving supplies of good from all quarters. The stocks, we anticipate will be full and large, and better assorted than for the last year or two, and at prices is accordances with the state of the times. We hope for a good and healthy business, but we cannot expect it to be a heavy one.

COMMISSIONERS' NOTICE.

WE the subscribers, being appointed by the Honorable the Probate Court for the district of Windsor, commissioners to receive, examine and adjust all claims and demands of all persons, against the estate of *PARSON WESTON*, late of Reading, in said district, deceased, represented insolvent, and also all claims and demands exhibited in offset thereto; and six months from the 15th day of September last; being allowed by said Court for that purpose, we do therefore hereby give notice, that we will attend to the business of our said appointment, at the dewelling-house of Lewis Hawkins, in Reading, on the first Monday's in January and March next from 9,o'clock, A. M. on each of said days.

MUSIC. An extensive and beautiful variety of popular music, just received, and for sale by
Sept. 23. J. H. MURDOCK.

BANK NOTE TABLE.

☞ The bills of all the Banks in the New England States, which are in good credit, are received *at par, on deposite*, by the following banks, viz:—Atlas, Atlantic, Eagle, Freeman's, Globe, Hamilton, Mechanics', Market, Merchants' North, State, Suffolk, Shoe & Leather Dealers', Shawmut, Tremont, Traders', Union and Washington.

☞ The Suffolk bank transacts all the business relating to the country Banks, for the above named banks.

☞ The charter of the Hampshire bank, at Northampton, having expired, the bills are not received at the Suffolk Bank.

☞ The small bills of the Middling Interest Bank are no longer redeemed.

☞ Merchants and others should beware of Post Notes of various denominations, from $1 up to $1000, of New York city and country banks, payable three, six, and nine months after date. They are not countersigned by the Register. Those that we have seen are of the Binghampton Bank, the Farmers' Bank, of Seneca county, Romulus, and the City Trust and Banking Company of New York. They have the appearance of Bank bills, and are calculated to deceive.

B. B. NEWTON.
Norwich, Vt. Nov. 4th 1840. 27-6w.

ELM STREET HOTEL,
NO. 9, ELM STREET BOSTON.
Board reduced to one dollar per day!

THE subscriber, grateful for the patronage heretofore bestowed on him, has the pleasure to inform his patrons and the public generally, that he still continues proprietor of the above well known establishment. To the men of business its advantages are not supassed by any other House in the city; it being located within two minutes walk of the Market, and in the immediate vicinity of the principal business streets of the city.

The proprietor has recently made such arragements in his House that he is now able to accommodate gentlemen and their families with convenient apartments. With the present low price for board, the proprietor's long experience in the busines, and the numerous advantages afforded, he flatters himself that he will still continue to recieve his share of the public patronage.

Attached to the House is a large and commodious Stable capable of accommodating nearly 100 Horses, with careful and attentive Ostlers.

DANIEL CHAMBERLIN.
Boston, Oct. 1840 27-6w.

SAVE YOUR FUEL.

CHASE'S COOKING STOVE,

OPERATING UPON A PRINCIPLE ENTIRELY NEW.

THE subscriber having contracted with Mr S. L. Chase for the right of his stove for the County of Windsor, begs leaves to call the attention of the public to the same. The stove is beyond doubt more economical and convenient than any other cooking stove in use. It is convenient, because of its peculiar construction, and economical, for the reason that it will save three fourths of the fuel necessary to be consumed in other stoves, in order to do an equal amount of cooking. It contains two ovens of large dimensions, which can in an instant have the temperature so changed by dampers, as to be adapted to baking or roasting the most delicate as well as the coarsest food. The boiling department is perfect in every point of view. Six boilers can be used at a time. The broiling department is so constructed, that the smoke is not suffered to pass into the room, being conveyed directly into the stove. Owing to the peculiarity of the principles upon which this stove operates, none of the heat from the fire chamber is suffered to pass directly into the pipe, while all the coldest air in the stove is so discharged. This is done by an air chamber for rerarefying the air and smoke after it has parted with its heat and, in such a manner, as to produce a very strong draught—thus all the heat generated must be applied to some practical purpose.

In proof of the above, I have connected with this advertisment, the following certificates from gentlemen of undoubted character who are now using the stove in this vicinity.

The stoves will be kept constantly on hand and for sale by,

TITUS HUTCHINSON JR.
Woodstock, July 14th 1840.

CERTIFICATES.

Dear Sir.—I have used one of your Cooking Stoves, in my family for some time past. The Stove is all that you have recommended it to be and I feel it my duty to state that I consider it one of the most *important inventions within my knowledge.* Being *simple in construction* and *convenient in form* I deem it to be a *durable*, and well calculated Stove. From the fact that *I believe it would save the price of the Stove in fuel in one year* in addition to the *many conveniences* which this stove possesses *over all other stoves* in use, I have no hesitation in recommending it in pecuniary point of view to every one, whether they already have or have not other stoves. PAUL HOWE.
Woodstock, Vt., June 11th 1840.

This certifies that I have used S. L. Chase's Cooking Stove for all the purposes of cooking Washing &c usual in families and find it to be the most *economical* and *convenient* cooking stove which I have ever used or seen and from experiment I find that it requires *no more than one fourth of the fuel necessary to be consumed in any other cook-stove* which I have used or seen *calculated to do an equal amount of cooking.* The ovens of the stove surpass any thing of the kind in use they *bake and roast* admirably well. In a word the stove is *without a fault* and I would most *confidently* recommend it to all persons in want of stoves. H. B. WITT.
Woodstock Vt., July 13th 1840.

Mr. S. L. Chase.—Having used your cooking stove in my family for some time past and finding it worthy of all praise I feel it my duty to state that I consider it to be *by far the best cooking stove in use.* Having used it for all the purposes of cooking such as baking, roasting, boiling broiling &c. I can confidently assert that in point of *economy* and *convenience* it *very far excel* any thing of the kind which has come to my knowledge. The stoves is most *ingeniously calculated* for every culinary purpose. My family are remarkably well pleased with the *broiling department* of the stove none of the smoke being suffered to *come into the room.* ZERAH LULL.
Woodstock, Vt., July 13th 1840.

Mr. Chase.—Sirr After having used your cooking stove, No. 2, in my family for a sufficient time to have fully satisfied myself of its usefulness; I am prepared to express my opinion that it is *preferable* to *any* COOKING STOVE *of which I have knowledge.* The saving of fuel, the amount of business that may be accomplished by it, the uses of which the hearth is susceptible, and all its advantages taken together, render it, in my estimation, DECIDELY SUPERIOR TO ANY ONE NOW IN USE. I think that none who try it will be disappointed, but *will realize all the advantages* that could be reasonably anticipated from such an article.

JASPER HAZEN.
Woodstock, Vt. Oct. 19; 1840.

HITCHCOCK'S
ANTI-BILIOUS PILLS.
Look at this and Read!

DR JARED HITCHCOCK, more than thirty years since invented, and prepared a composition of pills for the Bilious Cholic, and for some two or three years used them only for that disease, and gave them the name of Cholic Pills; but discovering from their operation, the powerful effect on the Liver and its secretory ducts as a doubtreunt and detergent medicine, induced him to extend the use of them in other diseases (viz) Cholera Morbus, Blackvomit, Cholera, Bilious Cholic, and other pains in the bowels, Dysentary, Dyspepsia, or Indigestion, Ague and Fever, Remittent and Intermittent Fever, Colds and Coughs, and they have been found by their expectorating operation to be efficacious in diseases of the Lungs. He now offers them to the public under the appellation of *ANTI-BILIOUS PILLS*, which experience finds unrivaled for efficacy, usefulness and safety. They are a medicine well calculated to remove the cause of disease in its first attack on the System; and it is well known to the faculty of physic; and may be known to any discerning and reflecting mind, that when the cause of disease is removed it can no longer exist; and there is nothing but the effect of what has taken place to *cure.*

DEAR FRIENDS and FELLOW CITIZENS! purchase and pursue the directions given on the Labels for any disease where Enetics or Cathartic's are useful (and one or the other or both are necessary in almost every disease to cleanse the stomach and bowels) and you will undoubtedly realize a great saving of pain, time and money; beside the danger you run of loss of health and life.

Mr. ALLEN FULLER of Double Branches, Anderson Dis-District S. C. writes us as follows; (viz.) "Dear Sir.—The box of pills which I obtained from you several years since to the amount of $5, is nearly exhausted, and I am desirous of ascertaining by what means I shall get a new supply. Besides those which I had, I have never heard of the pills in all my travels in the southern country, where, in my view, there are much needed."—Further he says, "if they were conveyed here I think it would be the means of introducing this unrivalled medicine (i. e. in my view) more extensively into the southern states, where they would be particularly well suited to the wants of the people." He says, "I esteem these pills so highly that I am very desirous of having them more generally known; and must say that I have some fears lest this medicine should be lost to the world by some means or other, notwithstanding the means which you informed me you had taken to prevent such a result. Above all, I entreat you not to let the secret of compounding this medicine be lost to the world. Place it in some place of safety, secure from fire and water, and beyond the reach of death.

Take and prove the above-mentioned Pills and I will guarantee that you will with thousands of others proclaim like the following.

CERTIFICATES.

This may certify to whom it may concern, that we the subscribers have for a number of years past been acquainted with Dr. Jared Hitchcock, and have known him to effect great cures after other medicical aid had failed, and we believe he derives a great share of his success from the use of his Anti-Bilious Pills. We have made a common use of them in our families, and had them uneeded to our wishes, and we believe them unequalled as to efficacy and safety, even from the most aged down to the infant.

Galway, 1838. OBADIAH ALLEN, RICHARD RIDER, TIMOTHY BROCKETT, JARED P. BROCKETT.

This may certify that we have been acquainted and used Hitchcock's Anti-Bilious Pills, and have found them to answer the recommendation, and that they are called for from a great distance where their utility has been proved—Dated Sandy Hill, July 27, 1838. N. C. NORTHUP, BENJ. CLARK, J. LAMSON.

I certify that I have practiced Physic for twenty years in the neighborhood of Dr. Jared Hitchcock, am well acquainted with the operation and composition of his Pills and believe them to be well adapted to the diseases of the Southern States and a good Anti-Bilious Pill for the more northern inhabitants. B. PECK.
Glens Falls, March 25, 1840. 9-1y

EAST RANDOLPH, VT.
DR. J. SMITH,

TENDERS his grateful acknowledgements to his friends and the enlightened public, for the liberal patronage bestowed on his establishment for more than three years past, and which, he is happy to say, has more than doubled every year, until it is admitted that he does double the business of any other physician in Randolph; and the board of assessors for 1839—one of them an M. D.—have assessed him $40 for his medical faculty—and himself and the rest of the regulars only from $10 to $20 each.—This shows the estimate which is placed upon the skill and practice of Dr Smith in his own town—even by those whose interest it is to oppose him.

The THOMSONIAN SYSTEM, according to an estimate made by Dr Watterhouse, formerly a Lecturer in the Medical Department of Harvard University, now numbers about three millions of advocates; and nothing short of its intrinsic merits could ever have commended it to such general favor. It is found to be speedy and efficient in removing diseases. The Medicines are harmless and operate in harmony with the laws of life. *The bones are not rotted with calomel; the skin is not ulcerated with blisters; the brain and nerves are not deadened by narcotics, nor the body wasted away by depriving it of its only nourishment—the blood.* What is disease but a departure of the system from a healthy condition; and is it possible to use *calomel, blisters, narcotics, or the lancet,* without producing disease to a greater or less extent? The Thomsonians have a *plain and simple* process for the cure of disease without inflicting any additional injury upon the system; and that they have met with brilliant success, *cannot be called in question.*

Dr. SMITH, desires most respectfully, to inform invalid of every description, that *now*, is the time for them to resort to the Thomsonian system of medicine, for relief, and he is ready to receive them, and give them the best of medicine, medical attendance, and nursing—with board and washing, at his Infirmary. He continues to have patients from all the "region round about," and to apply the safe and efficacious remedies of the *immortal Thomson*, according to their situation and circumstances. Many have been *cured*—others greatly *relieved*, after having tried the whole round of the *regular* faculty and found it worse than useless. Many ladies have been relieved of various female complaints, and many more are under a course of treatment and will soon regain their usual health—though they had employed other physicians *in vain.*

SOME OF THE WORST FORMS OF INSANITY HAVE BEEN CURED, AND OTHERS GREATLY RELIEVED; AND FOR THE ENCOURAGEMENT OF THE FRIENDS OF THIS MOST UNFORTUNATE CLASS OF INVALIDS, THE DR. BEGS LEAVE TO STATE THAT, FROM LONG EXPERIENCE WITH CASES OF THIS KIND, HE IS OF OPINION THAT NINE OUT OF TEN MAY BE AS EASILY CURED BY A TIMELY AND JUDICIOUS APPLICATION OF PURE THOMSONIAN MEDICINES, AS ANY OTHER.

Those who are troubled with any of the following complaints—such as Dyspepsia, Liver complaint, Rheumatism, Coughs, Colds, Fever, Ague and Fever, Dropsy, Scrofula, Old sores, all kinds of humors, general debility, weakness, &c. &c., will do well to make a fair trial of the Thomsonian medicine, before it is *too late*; and if they call here they shall be attended to faithfully.

☞ A general assortment of books and medicine on hand, constantly, as agent for Dr. Thompson.

☞ *Charges*, will always be *reasonable*. Board and washing $1,50 to 2,00 per week. Medicine and Medical attendance in all old *chronic cases* where the patient is able to be about the house at from 1,00 to 2,50 per week; to which a reasonable charge will be added for *nursing* when they are confined to their bed.

☞ *Mileage*, to visit patients at a distance, will be one shilling per mile.

☞ Advice gratis. ☜

April 1840.

DISSOLUTION.

THE copartnership heretofore existing under the name and style of S. G. & C. D. CHAMBERLIN, by mutual consent is this day dissolved, and Simeon G. Chamberlin is authorized to settle the accounts of said firm.

S. G. CHAMBERLIN,
C. D. CHHMBERLIN,
Barnard, 23d July, 1840.

S. G. CHAMBERLIN would tender to the inhabitants o Barnard and vicinity, his thanks for their very liberal patronage to the above firm, and would respectfully request a continuance of the same will continue the business as usual at the same place.
July 23, 1840. 13

ASK, INQUIRE—ASK THOSE WHO KNOW.

Those only who know by trial or immediate observation can form any idea of the effects of the *perfect relief* of the almost charm-like cures effected in cases of the PILES RHEUMATISM ALL SWELLINGS, AND ALL EXTERNAL PAINS, no matter how severe, by the use of Hay's Liniment Find one who has used it that will not laud it above all things ever used, and you will find—what cannot be found.

For the relief of suffering human beings who may be afflicted, I beg you to ask—ask of these who know—ask the Hon. ALFRED CONKLIN, U. S. Judge for that district, residing near Auburn; ask MATTHEW J. MYRER, Esq., Ithetus, N. Y.; ask Gen. DUFF GREEN, late of Washington city each of those gentlemen know of cases unconquerable by all other remedies or physicians, though tried for many years, that have been cured by use of the genuine HAYS' LINIMENT. Thousands of other persons known similar cures. We appeal to their sense of justice—their human feelings.

It is but a duty you owe to your suffering fellow beings to let this great remedy be known. *Speak it then to all your friends.* This will save much pain where the newss papers are not read, or where readers are incredulous, because so many worthless articles are advertised for the same purpose. To buyers we say, if all who have used it do not say it is beyond all praise, then do not take it.—The proprietor will not allow this article to be paid for unless it cures, when all the directions are fully followed. *Will any one suffering refuse now to try it? if he does, he ought to be pitied more for his obstinacy than his suffering*

Mr Hays would never consent to offer this article were he not compelled by his sense of moral—of religious duty—so dull in his power for victims of distress and misery. For this purpose he would sooner devote a fortune, than secure a dollar for any worthless article.

LOOK OUT.—*Some swindlers have counterfeited this article, and put it up with various diseases.* Do not be imposed upon. One thing only will protect you—it is the name of COMSTOCK & Co.; *that name must be always on the wrapper*, or you are cheated. Do not forget it.—Take this direction with you, and test by that, or never buy; for it is impossible for any otherto be true or genuine. SOLOMON HAYS.

Sold by COMSTOCK & CO. 2 Fletcher-street, N. Y.

LOOK OUT!!

"Caution" is the Parent of Safety.

An attack of the 'PILES' may be positively prevented by using (when the premonitory symptoms are felt) the celebrated HAYS' LINIMENT. There are more than one hundred people in this city, and in the United States an immense number, who have suffered beyond endurance by this dreadful complaint, who keep themselves wholly free from attacks by applying this Liniment when they feel any symptoms of its approach: of this there is most perfect proof.

☞ None Genuine without the name of COMSTOCK & Co., written on the wrappers. SOLOMON HAYS.

Sold at No. 2 Fletcher-street, N. Y.
For sale in Woodstock Vt., by
5-1y T. HUTCHINSON, Jr.

REFORMED AMERICAN PRACTICE OF MEDICINE.

TO those who are unacquainted with the system, the subscriber would inform them that the Reformed practice was instituted, and a Medical school established in the city of New York, in 1829, by W. Beach, M. D. and now President of the Reformed Medical Society of the U. States—Dr. B. established a board of professors in this school on the branches of medicine, viz. Anatomy, Physiology, Surgery, Chemistry, Materia Medica, Botany, Obstetrics, Theory and Practice of Physic, and Medical Jurisprudence, which were as scientifically taught and demonstrated as at any Medical college in the country. In this practice, no Calomel or other poisonous mineral is administered; but the Vegetable Kingdom is wholly relied on to cure or relieve the sufferings of mankind. About 1829, a grant for a College was obtained from the Legislature of Ohio, which soon went into successful operation, at Worthington in that state, and still flourishes almost without a parallel in the history of any institution. This practice has nearly in that state, supplanted the Mineral practice, as well as N. York and other States. This practice is different from all others, from the fact that it is continually improving and as diseases and climates change to a certain degree, this practice varies accordingly. Why not reform or improve the practice of medicine as well as any other art or science? The Mineral Practice has had no important improvement for half a century; and almost all vegetable practitioners of the day are very much in want of scientific knowledge in Anatomy, Surgery, etc. But the Reformed Practice embraces the good of all systems now in vogue, in this country. The subscriber is a graduate of the Reformed Practice as well as the Old School, and knows from an experience of more than eight years, that the vegetable practice is more safe and scientific than the mineral, and fully believes were the present adherents of that practice, acquainted practically with this extensive Vegetable practice, they would willingly lay aside their minerals; and common charity prompts me to say it. Dr. B. was an office student of Dr. Beach, and for more than three years in New York city had his able counsels and consultations on patients, on most every disease incident to a dense population. I feel warranted in saying that Dr. Beach has not a rival as an author and practitioner in America. He has had five gold medals awarded him as a medical author, from different societies, (what no other physician ever received in the country.) The improvements and discoveries that are yearly made in this reformed Medical Society by its graduates, are sent to the President and published for the benefit of themselves and community. The subscriber left New York city four years ago and located in East Bethel, and has visited patients in more than thirty towns in New Hampshire and Vermont. The undersigned has observed that families who have kept his medicines for use, seldom need a physician for advice. Dr. Hibbard has thought best to have some of his medicines kept for sale in the principal towns in this state, that the inhabitants generally might have a fair opportunity to test the superiority of these medicines for family use. Fifty cents, or one dollar, judiciously expended, may prevent a long, lingering, and perhaps fatal disorder; let it become once seated in the system, and hundreds expended may not even procure one moment of rest. The present era is an age of transition. The practice of physic, is experimental—physicians
