TUESDAY, Nov. 7—P. M.

Gold opened at 217, and sold up to 249¾. It next receded to 245¼, and closed at 247¾. There is less pressure to sell for cash, and parties holding large amounts are not so much pressed as on Monday.

Stocks have been quite steady, and at the close of business, after a good deal of feverishness, close higher and in demand. Upon time, buyers were ready to pay quite large differences, but holders were not disposed to sell, except for cash. United States Stocks, with moderate sales, were firm at about Monday's rates. Erie Railway was especially strong, and sold as high as 102. Quicksilver sold at higher rates, and was in demand. The election reduced the volume of business materially, and no second session was held at the Stock Exchange. Upon the street the market was strong, and everything higher.

Money is in less demand, and the supply is on the increase. Borrowers upon gold are most troubled to make up their accounts. Upon stocks loans are made readily. In commercial paper no change. The rates are 8@12 per cent. The operations of the Sub-Treasury indicate an easy money market.

Freights continue dull, and rates are almost nominal. To Liverpool the only engagements we hear of are 200 tuns mahogany at 15s., and 150 boxes extract logwood 10s. To London, per neutral, 1,000 boxes cheese 20s., and to Belfast 7,000 bushels wheat at 4d.

Sterling Bills are scarce, and rates rather dearer. They are quoted in gold, at 60 days, 109¼@110; ditto Merchants', 108@108¼; Bankers', sight, 111@111¼; francs, 5.07½@5.12½.

A London letter of Oct. 26 says:

The pressure in the London Money market continues to subside, and a reduction of the Bank rate of discount from 9 ⅌ cent to 8 may be expected within the next week or two. Small failures are still announced daily, but in no instances are they of any real importance. It must be admitted, however, that the trial to all parties who are in any degree extended, is very severe, and could not be much longer protracted without leading to more serious mischief. The Liverpool Cotton market has at length been arrested in its downward course, and a recovery equal to a cent per pound, has occasionally been obtained. The Wheat market remains without any symptom of a rally.

At the Mining Board the following sales were made: 100 shares Canada Copper, 1¼; 100 shares Gunnell Gold Co., 3¼; 200 shares Smith & Parmelee Gold Co., 7¼.

The Pacific Steamship Company will pay, 12th instant, a dividend of 5 per cent out of the net earnings of the last three months.

The aggregate amount of exports (exclusive of specie) from the port of New-York to foreign ports for the week ending Nov. 8, 1864, was $1,374,605.

REMARKS ABOUT BEEF CATTLE.

The total number this week, 7,134 head, compares with 5,115 head last week, and with 5,679 head average per week last year, and with 6,271 for the corresponding week one year ago. The number sold yesterday and to-day at the principal market, 4,736 head, compares with 2,415 head last week, and with 4,045 head, the average per week last year, and with 4,474 head, at market one year ago.

THE OPENING OR FRINCIPAL DAY OF THE MARKET.

Monday, Nov. 7.—Three things have combined to knock the hopes of drovers about as heavy a blow as the butchers deal their bullocks. First, there is a severe rain-storm prevailing, and the weather is warm, and exceedingly unfavorable for meat on the hooks. It is also an unpleasant day for out-door business. Secondly, this is election week, and although the people are not expected to fast, butchers do not expect a favorable week for trade, and consequently don't want as many cattle as in a more favorable week. Thirdly, and most important of all, there are 4,500 bullocks here, and only 72 required for Government; and there were 1,479 head sold at Bergen on Saturday, and the best went direct to butchers, besides several hundred sold at the down-town stables during the week, and upon all these we may have a fresh lot to-morrow, but if they come they will not be sold, if we may judge by the state of the trade here this afternoon, for it is decidedly dull, with a marked decline upon rates current last Monday. The market opened this morning with some little show of life, and the first sales were made to buyers who had no idea of the number of cattle on sale, and they say at prices quite as high as last Monday. This may be so for the first-class stock, but it very soon became evident to owners of inferior and medium quality, that a decline must be submitted to, or no sale. The wholesale butchers held back hard, and at two o'clock there was an unusually large number of bullocks unsold, and owners began to be anxious. It was evident that the market was overstocked. The reports from the wholesale meat market were all unfavorable, and the story told in the morning that only 2,000 head were expected, reacted upon those who told the story. Salesmen report sales of the morning at 5c. ⅌ ℔. less than last week, and 1@2c. less in the afternoon. We do not think that many cattle have sold to-day at 10c. ⅌ ℔. Those called first quality generally rated 10@12c. Strong even and fair steers at 9@10c., and steers that average about 5 cwt. net, at 11@12c., and from that down to 6c., for inferior sorts.

CLOSE OF THE MARKET.

Tuesday, Nov. 8.—About 250 fresh Cattle came in last night and this morning, but they could not be sold, or at least, only a small portion of them. Some of those in the yards yesterday were withdrawn, the owners preferring to take their chances next week rather than incur the losses which the present rates would entail. A few sales were forced to-day at prices considerably lower than those of yesterday, but there were no established rates. It was either sell at the best offers they could get, counting how much less they had better sustain now, or save the stock left on their hands another week with a not very flattering prospect, as nearly 500 head were held over from this week, beside several lots not put into market at all. The quality of the stock continues to improve, many of the droves being of really good quality this week, with some superior animals. The extra pair, bought yesterday at what the purchaser wanted, reported nearly 20c. ⅌ ℔. proved, upon killing to-day, to be only 19c., so well did they do. On account of the improved size and fatness, our prices are higher than they otherwise would be, and quite above the closing rates.
