Consulting Physician. Chairman Executive Com.
JAMES W. ALEXANDER, Actuary.
HENRY A. HILLS, General Agent.

The business of this Company is the insuring against accidents of all kinds, whether by traveling or otherwise.

This Company issues two classes of policies, one to secure the payment of a fixed sum in the event of death caused by an accident of any description, the other securing a weekly allowance in case of injury causing total disablement, and a fixed sum in case of death arising as above. The annual premium varies according to the occupation of the insured.

ORDINARY RISKS

are those of a general public, as professional men, merchants, manufacturers, bankers, clerks, and all such as follow an occupation not in itself hazardous to life or limb.

ANNUAL PREMIUMS ON $10,000, WITHOUT COMPENSATION, $30; WITH COMPENSATION OF $30 PER WEEK IN CASE OF INJURY, $50. SMALLER AMOUNTS INSURED AT CORRESPONDING RATES.

SPECIAL RISKS

are those of Conductors, Architects, Builders, Carpenters, Masons, Bricklayers, Plumbers, House Painters and Mechanics generally, Drivers, Butchers, Horse and Cattle Dealers, Millers, Policemen. No Policy for Special Risks to exceed $5,000.

ANNUAL PREMIUMS ON $5,000, WITHOUT COMPENSATION, $15 75; WITH COMPENSATION, $35.

A person insuring against Death only secures to his family the sum for which he insures if he is killed, provided the death occurs within three months from date of the injury; if the sudden injury he receives no compensation.

IF AGAINST DEATH WITH COMPENSATION the insured secures the amount for which he insures to his family in the event of death; and in case of personal injury the amount stipulated until he is able to attend to his affairs, or until 26 weeks.

GENERAL ACCIDENTS

Include the Traveling Risk, and also all forms of Dislocations, Broken Bones, Sprains, Bruises, Cuts, Gunshot wounds, Burns and Scalds, Bites of Dogs, Assaults by Burglars, Robbers or Murderers—the action of Lightning or Sun Stroke, the effects of Explosions, Floods and Suffocation by Drowning or Choking; where such Accidental Injury is the cause of Death within three months of the happening of the injury, or of total disablement to follow his usual avocation.

INDUCEMENTS.

The rates of Premium are very low.

The plan is so simple that any one can comprehend all its workings.

No Medical Examination is required, and those who have been rejected by Life Companies in consequence of hereditary or other diseases, can effect insurance in this Company at a very small cost.

No better or more satisfactory one can be made of so small a sum.

Internal Revenue.

ASSESSOR'S OFFICE, FOURTH COLLECTION DISTRICT, NEW-YORK, 3d, 5th, 6th, and 8th Wards, 63 Franklin-st., May 26th, 1865.

NOTICE IS HEREBY GIVEN in accordance with the provision of Section 19th of Act of June 30, 1864, as amended March 3, 1865, that

I, PIERRE C. VAN WYCK, Assessor Fourth District of New-York, will sit at my office, No. 63 Franklin-st. in the City of New-York on the 10th day of June next, and for five days next thereafter, between the hours of 9 a. m. and 4 p. m. of the same days, to hear and determine appeals relative to any erroneous or excessive valuations, assessments or enumerations by the assessor or assistant assessors returned in the annual list.

Notice is further given that no appeal will be allowed to any party after he shall have been duly assessed and the annual list containing the assessment has been transmitted to the collector of the district.

All appeals to said assessor, as aforesaid, must be made in writing and specify the particular cause, matter or thing, respecting which a decision is requested, and must state the ground or principle of error complained of.
PIERRE C. VAN WYCK,

CANCER—WHAT IS CANCER?

WHEN CANCER IS CURABLE,
WHEN CANCER IS INCURABLE,
WHAT WILL CURE CANCER,
WHY THE OLD MODE OF TREATMENT HAS ALWAYS FAILED TO CURE CANCER.

BY ROBERT S. NEWTON, M. D.

Late Professor of Surgery, also of Theory and Practice in the Eclectic Medical College of Cincinnati, Ohio.

1. I ASSERT that CANCER IS PRIMARILY A LOCAL DISEASE.

2. That Cancer is a parasite—a living animal—which from its first inception subsists as a parasite upon the system.

3. That up to the period of its development when Cancer takes on the conditions of ulceration and absorption it is always curable by the method of treatment discovered and originated by me, and which, so far as I could do so, I have imparted to all my classes, while occupying the chairs of Surgery and Theory and Practice in the Cincinnati Eclectic Medical College during a number of years past.

4. That up to the time when softening ulceration and absorption commence, microscopists have never, in a single instance, been able to find the element of cancerous growth in the blood.

5. That microscopists have invariably found the element of cancerous disease in the blood after softening ulceration and absorption of the *fatally poisonous* matter has the system has fairly commenced.

6. I assert that it is only when cancer reaches this stage that it takes on the condition of a constitutional disease, and may very soon become incurable.

7. That cancer sometimes remains in a latent condition, softening and ulcerating internally. Such very rare cases are beyond the reach of curative means.

8. That cancer in its primary stage can only be *radically* cured by the application of remedial agents to the parts affected.

9. That by my method of treatment I have never failed to cure a single one of several hundred cases which I have pronounced curable and have treated during the past fifteen years.

10. That the knife never did and never can cure real cancer; it is only useful for removing the diseased mass preparatory to the application of the proper remedies to radically extirpate the disease together with the cause that produces it, which my remedies and method will invariably accomplish, when intelligently applied.

11. That the knife is and ever has been the chief sole resource of the practitioners of the old school of medicine in the treatment of cancer; and in their hands it has never yet cured a single case of this terrible disease, as is authenticated by the records of the great cancer Hospital of London. Many thousands of cases have been treated annually in this Institution, without a single permanent, radical cure being effected.

12. I assert that the want of a proper knowledge of the Pathology and treatment of Cancer is the sole reason why its cure has been an impossibility to the Physicians and Surgeons of the old school in all time past, and that this is the fault of the illiberal spirit which governs the entire machinery of this class of medical schools, and the plan of instruction which prevails in them. If old school physicians wish to be on with the times and desire to cure cancer and secure the greatest success in general practice they must adopt the sounder teachings and safer and more effective remedies of the Eclectic School of medicine.

13. Finally I assert that the use of the knife alone for the cure of cancer is advocated only by those who advocate the theory that cancer is in all cases a constitutional disease—a position which I stand, would justify the use of the knife for the removal of fever, or any of the forms of constitutional disease.

In conclusion I wish to say that for the past twenty five years, I have labored hard to instruct both the profession and the public upon this subject, by lectures, by publications of various works and journals, and the establishment of an institution for the treatment of Chronic diseases, which I sustained at the cost of more than ten thousand dollars beyond receipts, while residing at Cincinnati, as may be seen by the following notice of

DR. ROBERT S. NEWTON'S
CLINICAL INSTITUTE AND HOME FOR THE SICK.

"This Institution is situated at No. 207 Sixth-st., Cincinnati, Ohio. Here are to be seen patients from almost every section of the country, being treated for chronic diseases, among whom we notice persons suffering under the following diseases: Bronchocele, Scrofula, Rheumatism, Polypus, both nasal and uterine, Amaurosis, Cataract, Strabismus, Fistula, Hydrocele, Gravel, Piles, venereal vesicles of females, Tumors, Dyspepsia, Chronic Rheumatism, with many other diseases. In fact, this Institution is now full of patients, who are in our city for the purpose of being treated by Prof. Newton. He is among the ablest and established physicians and surgeons of the city, and one that has brought to the city quite a character, more persons seeking medical aid, in the last four years, than any other man in the profession."—[Cincinnati Times, 1862.

DR. ROBERT S. NEWTON'S MEDICAL OFFICE for the treatment of SURGICAL DISEASES, CANCER, FISTULA, PILES, CATARACT, CALCULUS, DISEASES OF THE BONES, ULCERS of every description, TUMORS, every form of DISEASE OF THE EYE, BRONCHIAL AFFECTIONS, POLYPUS (nasal and uterine), STRICTURE of every variety, etc., BY HIS IMPROVED METHOD OF PRACTICE, is at No. 22 EAST EIGHTEENTH-ST., between FIFTH-AVE. and BROADWAY, NEW-YORK.

N. B.—Patients out of the city desiring advice, may address Dr. Robert S. Newton as above by letter.

Clergymen treated without charge.

☞ A number of the Quarterly Medical News and Cancer Journal containing numerous cases with description of symptoms and directions for the benefit of those afflicted by cancer, will be sent by mail to any address on the receipt of a twenty-five cent stamp, the price of a single number.

SYMPTOMS OF CANCER.

CANCER IN ITS FIRST STAGES.—A scirrhous, or cancerous tumor, usually commences in a round and hard tumor or lump, and in a short time is the subject of considerable bite of severe lancinating or burning pain.

The disease often remains latent for a length of time, but then it begins to enlarge, and becomes more painful, and extends through the surrounding parts, and at length, suppuration being formed, it breaks and becomes an open cancer. This ulcer enlarges in every direction, with thick, uneven, or jagged edges, sometimes inverted and all other times everted, presenting an ash-colored and eating surface. The discharge is thin, offensive and irritating, with a burning sensation.

CANCER IN THE BREAST generally commences as a small movable lump or swelling in some part of the breast. At first it is neither tender or painful. However, after a few weeks, months, and in some cases years, it is subject to paroxysms of darting or lancinating pain. The pain increases from time to time, and frequently extends to the lower point of the shoulder blade; sometimes about this stage of the disease the arm is entirely useless—the nipple frequently becomes retracted and a thin, bloody discharge.

After a time the tumor adheres to the skin and the parts beneath it, so as to become fixed and immovable; then it ulcerates and forms an open cancer. The movable lump or tumor, the lancinating pain, the retracted nipple, are never failing symptoms of this disease in the breast.

Every person labouring under the above symptoms, may at once know their real condition.

DR. ROBERT S. NEWTON ON THE DANGER OF DELAY.

I was consulted by a lady in June. I found in the right breast, under the skin, a small tumor or lump, not as large as a common pea, perfectly movable, no redness or tenderness.

I advised the treatment. She declined. In September she called again; then the disease had assumed a constitutional nature, one so much so that it was impossible to relieve her, and death followed in less than three months. At the time she first visited me, it could have been cured in a few hours. Every person who has any of the symptoms of cancer should attend to the case at once.

☞ ALL CASES OF CANCER MUST BE TREATED UNDER MY PERSONAL SUPERVISION. ☜

WHO IS ROBERT S. NEWTON, M. D.?

Dr. ROBERT SAFFORD NEWTON was Professor of Surgery in the Eclectic Medical College of Memphis. He is a true man, and an ornament to his profession. He has always had the friendship and confidence of such bold, independent, and able minds as that of the Rev. W. G. Brownlow. Brownlow and Newton are men of mark, distinguished alike for intellect, independence and benevolence. They will do as friends in peace or war, prosperity or adversity. Of few men can so much be truly said.—[Memphis Bulletin, Sept. 14, 1862.

Dr. J. FOULKES, an old-school Physician, and late Mayor of Memphis, Tenn., who is well known to the Profession in New-York, says that "Prof. ROBERT S. NEWTON is one of the first men in the medical profession in the United States, and operates with singular skill and uniform success.

"He will cure where it be possible, and under no circumstances will he extort and impoverish patients, even for *gold pro quo*."

ROBERT S. NEWTON, M. D., late Professor of Surgery and Clinic Medicine in the Eclectic Medical Institute, Cincinnati, Ohio, and for eleven years Editor of The Eclectic Medical Journal of Cincinnati, is permanently located in New-York. Dr. Newton is the author of numerous works on the Eclectic Practice of Medicine and Surgery, and one of the most progressive and best operating and consulting Surgeons and Physicians of the age. We wish him unbounded success.—[Eclectic Medical Journal of Pennsylvania.

Dr. ROBERT S. NEWTON'S reply to the following query should be read and remembered by the afflicted and their friends:

"ARE WE THE SPIRITUAL DOCTOR NEWTON?"

We answer, No! Whatever we do accomplish in the practice of medicine and surgery is by the knowledge of the same as a branch of science obtained by hard study, close application, and almost a quarter of a century's daily practice and observation.—[Ed. New-York Medical News and Cancer Journal.

Dr. Robert S. Newton is a regular practitioner of Medicine and Surgery; he graduated at the Louisville Medical College in 1841, while Profs. Drake, Gross, Caldwell, Yandell, Short, Cook and Miller occupied the various chairs of the Institution.—[Respectable Journal.

Proposals.

OFFICE COMMISSARY OF SUBSISTENCE, No. 6 STATE-ST., NEW-YORK, June 1, 1865.

ARMY SUPPLIES—BEEF CATTLE.—Sealed Proposals (in triplicate) will be received by the undersigned, at this office, until 12 o'clock m. on THURSDAY, the 8th inst., for supplying BEEF CATTLE for the use of the United States army, to be delivered at the WASHINGTON GROVE YARDS, New-York City, or at some other convenient point in or in the near vicinity of the City of New-York, to be designated by the undersigned, and in such numbers as may from time to time be required, not exceeding one thousand head in any calendar month, from the 15th of June, 1865, to the 15th of September, 1865; notice to be given to the contractor on SATURDAY of each week on his application at this office, of the number of cattle he shall be required to deliver during the following week.

As the cattle will be required for shipment, they will be subject to a rigid inspection, and none but FIRST QUALITY of oxen or steers, entirely free from all the usual or imperfections, and not less than three years old, will be received, and no lot of cattle the average gross weight of which is not as high as *thirteen hundred* pounds, nor any bullock of less gross weight than *twelve hundred and fifty* pounds. The exact gross weight of each bullock to be ascertained by the resident time of weighing to be determined by the Inspector on the part of the United States, whose certificate of inspection, stating the number of cattle delivered, their weight, &c., will constitute the voucher, on presentation of which the accounts will be paid when funds are in hands for the purpose. The expense of weighing to be paid by the contractor. Each proposal, to be entertained, must have a printed copy of this advertisement pasted at its head, and be in the following form:

"I, A—B—, of the city or town of ——, county of ——, State of ——, hereby propose to deliver to the Subsistence Department of the United States Army, at the Washington Grove Yards, New-York City, or other point in or near said city, to be designated, such number of beef Cattle, not exceeding one thousand head in any calendar month, of the quality, condition, &c., described in the advertisement above posted, as I may from time to time be required to furnish on due notification, at —— cents per pound, gross weight."

To be subscribed by two responsible sureties, as follows:

"We, the undersigned, hereby agree that should the above bid be accepted we will give our bond in the sum of ten thousand dollars that the contract shall be filled.

"——, ——."

Payment will be made in currency or its equivalent, as soon as funds are received for the purpose.

The ability of the sureties to respond in the sum of ten thousand dollars must be certified by the U. S. District Attorney, or other proper officer; each certificate to accompany the proposal.

Proposals to be indorsed "Proposals for Beef Cattle." The right is reserved by the United States to reject any or all the bids that shall not be regarded satisfactory. All bidders must be present at the opening of the bids.
A. E. CARLTON, Capt. and C. S. V.

NAVY DEPARTMENT, BUREAU OF YARDS AND DOCKS, May 25, 1865.

SEALED PROPOSALS for each class separately indorsed "Proposals for Class No. (name the class) for the Navy Yard at (name the yard)," will be received at this office until the 3d June next, at 12 o'clock m., at which hour the opening of the bids will be commenced, preliminary and following are the several navy yards, name of the matter to be furnished, as contained in printed schedules, which, with full instructions, will be furnished on application, and sent by mail, if so requested, to persons desiring to offer a contract for any or all of the classes named therein, by the commandants of the several navy yards, for the class for the yard under their command, or by the navy agent nearest thereto, or by the inspector at any or all of the yards.

In consequence of recent orders to reduce Government expenses, one only per cent of the quantity of each class named in the schedules for navy yards, except for building materials, machinery, and coal, and fuel Hughes, will be required or received, but bidders will affix the prices and carry out the amounts on all the articles named in the schedules, in order that the bids may be uniform.

To prevent confusion and mistakes in opening the offers, no bid will be received which contains offers for more than one yard or one class; the navy yard which is to be supplied and complete in itself in connection with the form of offer and guarantee, and each bidder must sign the bid and guarantee.

Bidders are hereby cautioned and particularly notified that their offers must be in the form herein specified, and be mailed in time to reach the destination before the time expires for receiving them; no bid will be considered which will be received after the period stated, and no shortcuts will be made for failure of the mail. All offers must be accompanied by the bidder's bonds, or a certified copy thereof.

To guard against offers being opened before the time appointed, bidders are requested to inclose up the envelope, above the address, and draw a line under the indorsement of time.

"Proposals for Class No. (name the class) for the Navy-Yard at (name the yard)."

"To the Chief of the Bureau of Yards and Docks, Washington, D. C."

Instructions and forms of offer, with copies of the laws bearing on the subject, will be furnished by commandants of yards, navy agents, and the Bureau, on application to any or either of them.
