FRIDAY, July 7—P. M.

Gold opened at 132½, and was firm all day, closing at 130½. The deliveries are made with less expense to borrowers, but the market cannot be quoted otherwise than "very strong."

Gold-bearing Governments, and indeed everything in the form of National obligations, are firm, and in active demand, not only from speculators but by investors. The 5-20s are quoted, new, 105@105½; old, 105½@105¾. A large business has been done in 7.30s, old, at 99½; 10-40s were sold at 97½@97¾. All Border State stocks are strong and held firmly. No Tennessee 6s are offered under 74. The miscellaneous shares firm. Quicksilver sold at 61½. Atlantic Mail, 156. Railway shares are strong and the disposition to operate for an advance increases. The argument of the Bulls is very brief, and is confined to the declaration that from the present harvest, the entire railway system is secure of all the business it can do for the next six months, and that under the influence of continual large earnings the profits will improve in market value. After the call prices were lower under sales to realize profits, but at the public session the market rallied and full prices were paid. A movement is on foot in Chicago and North-Western, and 61¾ was paid for the stock, a rise of 3 per cent in as many days. At Second Board the market was very steady; on the general hit Rock Island was very strong and sold at 107. North-Western Preferred sold at 62½. In the street, the market was strong. The closing quotations were: New-York Central, 96½; Erie, 81½; Hudson, 110½; Reading, 98½; Michigan Southern, 63½; Ill. Central, 136½; Cleveland and Pittsburgh, 70; Rock Island, 107½; North-Western, 28½; The Preferred, 82½; Fort Wayne, 98.

Money remains abundant on call at 4@5 per cent, and at the latter rate large sums remain idle. In commercial bills no change; 6½@9 per cent is the rate for best to quite ordinary paper.

Exchange is dull and favors the buyer. Bills at 60 days on London are selling at 108@108¾ for commercial; 108¾@109¼ for bankers'; do., at short sight, 109½@110.

The operations of the Philadelphia Mint for June were:

	Pieces.	Value.
Gold Coinage	20,035	$400,700 00
Silver	45,600	22,800 00
Copper	5,130,000	87,850 00
Total	5,195,635	$511,350 00

The business of the Sub-Treasury was: Receipts, $3,662,735 44—for Customs, $371,000; Payments, $6,192,437 31—on account of Loan, $580,000; Balance, $39,104,342 73.

Freights are more active, but sales are without change. The engagements to Liverpool are 42,000 bush. Wheat at 4s. 4d.@4s. 5d., 7,000 bush. Corn at 4s. 2d., and per steamer 2,000 boxes Cheese at 40s. To Bremen—7,000 bush. Rye, on private terms. To Hamburg—20,000 bush. Rye at 3½c.; a brig to Glasgow, 2,000 qrs. Wheat at 4s. 6d.; a bark to Rotterdam, 600 tuns, on private terms; and a brig to Bristol Channel on private terms.

Controller Robinson, Albany, addresses the following letter in reply to one of numerous communications addressed to him relative to the assessing of the shareholders in National Banks:

STATE OF NEW-YORK, CONTROLLER'S OFFICE, ALBANY, June 28, 1865.

DEAR SIR: Your letter, making inquiries in relation to assessing shareholders in National banks is duly received. I had previously read the circular published by the Hon. E. G. Spaulding, to which you refer. The printed circular issued by me states the duty of assessors in this respect as I understand it. Congress expressly authorized the taxing of the shareholders in National banks. The Legislature at its last session passed a law, "The Enabling Act," so called, which directs them to be taxed in pursuance of that authority. I do not see how any assessor can disregard that law. The Act of Congress requires that they shall not be taxed at any higher rate than State banks. Mr. Spaulding's circular assumes that they will be taxed at a higher rate, because they have no deduction on account of United States Stocks held by them, while the State banks have such deduction to the extent that their capital is invested in those stocks. The error of this assumption is manifest. The rate of taxation is one thing, the amount of assessment is quite another and different thing. If a State bank has invested any portion of its capital in Government securities, it can only be assessed for the residue, but it is taxed at the same rate as if it had no such investment, but not for the same amount. Its Government stocks are exempt by act of Congress. But Congress made no such exemption in the case of National banks. On the contrary, in the very same act in which it requires them to invest in Government stocks, it authorizes them to be taxed and makes no exemption in their favor. The decision of the Supreme Court does not affect the question, for it does not and cannot override the express act of Congress upon which the authority is based. If Congress has in this particular inadvertently given an advantage to State banks, the Assessors have not, for that reason, any right to disregard the law. Congress alone has power to remedy the defect. Too much property is already exempted from taxation by reason of its being invested in privileged securities, leaving the great burden of taxation to fall upon the less fortunate. The line of exemption should not be extended beyond the strict requirements of law.

There is a large business doing by European manufacturers on American account, and prices are very strong. As compared with orders placed 40 days back, goods bought early show a very handsome profit. At present, manufacturers are cautious about making new engagements. It is apparent that the Autumn importations are to be upon an extended scale, and quite as many goods will be brought in for sale as will be required by the South in its dearth of supply, or by the North and West with their great wealth of crops. There is to be no lack of gold in the Sub-Treasury to pay interest upon the National stocks. There is every reason to anticipate an accumulation in that quarter, which will maintain gold at a high premium and oblige the Treasury to anticipate the November coupons.

A large meeting was held at Frankfort, Indiana, on the 24th ult., to promote the building of the Indianapolis and Chicago Air Line Railroad.

The Western and Atlantic Railroad has been completed to Aeworth, Ga., 100 miles from Chattanooga, Tenn., and 38 from Atlanta, from which last named place to Chattahooche River, a distance of seven miles, trains run regularly. The entire road will soon be in running order.

The Great Western Railway of Canada reports the following earnings for the week ending June 30:

The London Economist of June 24 says:

The Bank return of this week indicates that the usual precautions are being taken by the mercantile community at the approach of the half year. There is less money offering in the general market, where the Bank rate is fairly maintained. The provision for the anticipated expenditure at the coming elections tends also to limit the supply of money, and, in consequence, there is more activity in the discount department at the Bank. Exceptional operations have nevertheless taken place at 2½ per cent and there are no appearances to indicate that other than the temporary causes alluded to influence the market or its future prospects. In the Stock Exchange there is a steady inquiry, with sufficient employment for money at 3 per cent on Government securities at short periods.

The same Journal says:

Telegrams from Marseilles announce the failure of Messrs. Charles Rostand & Co., sugar refiners, with liabilities estimated at about £500,000. A favorable liquidation is expected. Advices from Bombay state the liabilities of Mr. Byramjee Hormusjee Camie, whose failure was announced in London on the 23d ult., reach about £3,300,000, and the assets £2,800,000. A deed of assignment has been dispatched to England. There has been a very excited cotton market at Liverpool throughout the week, and the sales have been on a very extensive scale. On Wednesday 40,000 bales changed hands, a number which has never been exceeded, if even equaled. All classes seemed ready to buy, and there is no doubt, if holders had not exhibited some reserve in selling their cotton, that the sales would have been larger than they were. Yesterday, although there was less excitement, yet, through the firmness of holders, prices advanced ⅛d. Prices may be quoted ½d. to ¾d. higher than last Friday. To-day the market is much quieter, the late large purchasers of spinners having given them a present supply.

It is stated, in consequence of the scarcity of corn and the high price at which it has sold during the last twelve months, the cultivation of that cereal is being rapidly renewed in Egypt; while the cultivation of cotton is, in several districts, being discontinued.

Mr. Satterthwaite's American Circular says:

The London market for American securities has during the past week been characterized by considerable animation and buoyancy. United States Government Bonds have been in request on home account, and a rise of 5 per cent has been established since our last. There have been numerous buyers of a good class for Illinois shares, which at one time to-day touched 87½, closing 85½ to 6, a rise of nearly eight dollars on the week. The inquiry for the various securities of the Atlantic and Great Western Railway still continues, the bonds being scarce and the debentures finding daily investors.

THE COST OF LIVING IN NEW-YORK.

FRIDAY, July 7—P. M.

The following tables, carefully revised every week, give a pretty clear idea of the cost of living in this city, at least so far as eatables are concerned. Some household articles of common or frequent use are also included. Only *good* articles are quoted, unless specially noted, and the prices are such as are charged at Washington and Fulton Markets, and down-town groceries. Street and sidewalk peddlers sell a little under these figures, but their articles are not always fresh and in good condition. The uptown and avenue traders usually charge a little more than here quoted. Stale vegetables and fruits are hawked about the streets and sold at irregular prices, depending partly upon the condition of the articles offered, and quite as much upon locality. The principal feature affecting the cost of living this week is the decline in that universal article of food, fresh beef. With a falling off of 1½ to 2c. per lb. in the live stock markets, butchers are at last constrained to lower the retail prices—perhaps the many refusals to buy at the old and unwarranted rates had something to do with the reaction. Once down, they will find it up-hill business to advance again. Other leading articles of food are nearly unchanged. Raspberries are not plenty, and are higher than yesterday—their season is drawing to a close, and blackberries are already taking their place. Whortleberries are cheaper. Peaches are on sale from Norfolk, but are dearer and high. Hot-house grapes begin to come in. The vegetable markets are fairly supplied—well stocked with new potatoes. Prices are in some cases higher, but the vegetables are larger and better. New-Jersey tomatoes are in market. We quote:
