WEDNESDAY, Nov. 1—P. M.

Gold is inactive and has been quoted at 145½@145¾ throughout the day. The Scotia took out $69,000 in specie.

There is more activity in Government Securities, and better prices have been paid for the currency as well as the gold-bearing issue. The share list has been excited and closes with a substantial advance upon nearly the whole list. At the improvement there was a good deal of realizing, but the market continued firm. The closing rates upon the street are: New-York Central, 100⅞@101; Erie, 92¾@92⅞; Hudson River, 108@108¼; Reading, 115½@115¾; Michigan Southern, 73¼@74; Cleveland and Pittsburgh, 81⅞@81¾; Rock Island, 108⅛@108¼; North-Western, 34¼.

An evening paper says:

"We have reason for asserting that the English capitalists in the interest of the Atlantic and Great Western have sailed without having made any definite arrangements respecting seaboard connections with their line. The interviews with the Erie Company, sought by the Atlantic and Great Western delegates, have done nothing more than make known to the parties mutually their respective views, but may hereafter issue in more definite proposals. The propositions made to the Erie Company are not such as could be accepted; but it is possible that modifications may hereafter be made which would result in a connection of the two roads, either in the way of an amalgamation or of a running arrangement between separate organizations. The reported negotiations with the Morris and Essex and the Catawissa Roads are, probably, intended simply as a sort of diplomatic play-off against the Erie management. An interview was held last evening between representatives of the Erie and Atlantic and Great Western Companies."

The Atlantic and Great Western road has upon its line 700 cars belonging to the Erie Company, which could now be used more profitably in moving the accumulation of freight along its own line. They will probably be used in bringing freight to the Erie road, until the Atlantic and Great Western is ready to straddle the roads from Correy to Jersey, which will not occur for some days.

Money is quoted easier, and at an early hour lenders were offering funds to stock houses. There is a steady flow of currency from the North-West to this city, and considerable remittances have also been made from Eastern cities. At the close of bank hours there was more money offering among stock houses than for some time. Commercial paper passes at 7@8 per cent for best names, and 9@13 for second grade.

In Exchange nothing doing. Best Sterling is quoted nominally at 108¼@108⅝, and France, 5.21¼@5.18¾; Antwerp, 5.22½@5.20; Hamburg, 35¼@36; Amsterdam, 40¼@40½; Frankfort, 40¼@40½; Bremen, 78@78¼; Prussian Thalers, 70¼@71¼.

Complaints are made of want of promptness in printing the new 5-20 bonds. For years dealers with the Treasury have been disappointed in this way, and the sooner reform is had the better.

The Pacific Mail Steamship Company dispatched its first vessel, the Henry Chauncey, to Aspinwall, to-day. She had 1,200 passengers, more than 1,000 tuns of freight, and had a way bill of $320,000.

The financial and speculative public are disposed to look upon the last foreign news as favorable to American affairs. The peaceable solution of all difficulties growing out of the acts of the English Government in connection with the Rebellion is regarded as a matter of course, and a better market is expected for our national and local stocks in Europe. The return of the English party cannot fail to improve American stocks abroad. As recent observers of the condition of affairs in the Northern States, their statements will have much influence upon European estimates of the value of investments in our national and local property. As a whole, they were competent judges of the soundness of our financial condition, and from their visit a substantial advantage to American interests will be secured.

Equal to dividends at 7 per cent per annum. The Company has on hand securities to the amount of $1,340,728, and has increased its materials in the year $504,562. The common stock of the corporation has probably as little value as anything upon the list so far as present income is concerned, taking the report of the Company as a basis of estimate. All the income above interest, leases, and sinking funds, will be required for new work, and the Company's officers do not expect dividends for three years. So far as the preferred shares are concerned, income appears as secure as upon the generality of Western roads, and at current market rates may be regarded as safe as anything offering with a margin for advance.

The business of the Sub-Treasury was: Receipts, $1,591,665 67—for Customs, $755,000; Payments, $1,665,009 62—on account of Loan, $136,000; Balance, $37,126,777 17.

The Northern Central Railway Company has declared a dividend of 2 per cent for the quarter ending Sept. 30.

The Resolute Fire Insurance Company has removed to No. 151 Broadway.

The Nassau Bank will pay a semi-annual dividend of five per cent.

The Citizens' National Bank has removed from the Bowery to the corner of Broadway and Whitestreet.

Freights are firm, but quiet. The engagements to Liverpool are: 14,000 bushels Corn at 5d. in bulk and ship's bags; 200 bales Cotton at 3s. 8d., and 175 bales Sea Island at ¼d.; per steamer, 200 bales Cotton at 1d.

The Secretary of the Treasury has informed the Assistant Treasurer at New-York that the new gold certificates of the denominations of $100 and $1,000 will be sent to this city in the beginning of next week. Notes of the $5,000 denomination have been received here, as already reported. The $20, $50 and $500 notes may not be ready for some time to come. It is the intention of Mr. Van Dyck to begin the issue of the certificates to depositors next week.

The Bank of the State of New-York (National) have declared a dividend of 5 percent, payable 10th inst.

The Berrehoff Run Petroleum Co. has made a dividend of 5 per cent from its October earnings.

The Chicago Tribune of Monday says:

The money market during the week has ruled close, but there has been less stringency than formerly. This is due, however, mainly to the fact that borrowers are less urgent, and are accommodating themselves to the stringent order of things, rather than to any increase in the supply of currency. On Saturday there was an active demand for currency, but the bankers were unwilling to accommodate any but their best customers. The supply of currency is fast decreasing. Our shipments are too light to supply the current demand for exchange, and almost daily during the present week our leading houses have been compelled to express greenbacks to New-York to meet their drafts. This shows that the balance of trade is against us with the East. On the other hand, the receipts of produce, though not heavy, are liberal, and currency is constantly going West to pay for it. So we have at present a drain of currency going out both to the East and to the West. All this of course tends to reduce the supply here, and render the money market more stringent. The rate of discount is still unchanged, viz.: 10 per cent per annum; but private bankers are charging 1 per cent commission in addition. The market for Eastern exchange today was quite bare, and the rates were firm at par buying and 1-10 premium selling. Bankers were offering 30c. premium for round lots, but there was very little made, and the offerings were light. The leading banks had generally to ship currency to meet their drafts.

Markets—CAREFULLY REPORTED FOR THE N. Y. TRIBUNE WEDNESDAY, Nov. 1, 1865.

ASHES—The inquiry for both kinds is fair, and the market is firm at an advance in prices; sales at $8 25@$8 50 for Pots, and $8 50@$8 75 for Pearls.

BEESWAX—Yellow Western and Southern have been in fair request and prices have improved, closing firm at 48@50c.

COTTON—The demand is not very active, but prices are firmer and close strong at 57c. for Middlings; sales of 1,500 bales.

COFFEE—Rio has been moderately active, but prices, though moderately unchanged, are not very firm; sales of 1,000 bags ex Cecrops, and 120 ex Chanticleer, on private terms; other kinds are quiet. COPPER—Advices from England are rather more favorable; prices for American Ingot have improved and a fair business was done, closing firm at 32¼@33¼c. for Lake and Baltimore. New Sheathing and Yellow are steady at 50c. for the former and 34c. for the latter.

COAL—The market for Domestic is largely supplied, and is heavy. The consumption thus far during the Autumn has been much less than for the same time last year, and stock has accumulated; sales from yard at $11@$12.50 ⅌ tun. In Foreign very little has been doing, and the market is heavy.

FLOUR AND MEAL—The inquiry for the low and medium grades of Western and State Flour is quite active, and these have advanced fully 5@10c. per bbl., at which the market closes; the demand is confined chiefly to the home and Eastern trade; Trade and Family brands are firm but not active; we have had rapid changes in the market during the week, though a fair consumptive demand prevailed, and as the season advances there is some disposition to operate for the future; we have added considerably to our stock, and this, together with a tight money market, compelled many to realize, especially holders of choice Family brands; these have been pressed for sale, and in some instances a very large concession has been made in order to effect sales, but at the close of the week a more active demand prevailed, and prices gradually favored the seller. The fact of the low grades being relatively 50c. per barrel lower than Wheat, induces able holders to withdraw their samples from the market, and the moderate supply here for the season adds firmness and confidence. The sales to-day are 12,600 bbls., at $7 75@$8 05 for Superfine State; $8 25@$8 50 for Extra do.; $8 35@$8 60 for Fancy do.; $8 30@$8 75 for the low grades of Western Extra; $8 90@$9 15 for Shipping Ohio; $9 25@$11 50 for Trade do.; $12@$16 for St. Louis do., and small lots 25@50c. higher. Canadian Flour is moderately active, and 5@10c. better; sales of 230 bbls. at $8 25@$8 50 for common to fair Extra, and $8 60@$11 00 for Trade and Family do. Southern Flour fairly active, and the low grades are 10c. better; sales of 875 bbls. at $9 50@$11 25 for common to fair Extra Baltimore and Country, and $10 50@$16 25 for Trade and Family do. FISH—The inquiry for Dry Cod has been very limited, and prices may be quoted a shade easier. Mackerel are in less active demand, the offerings are more liberal, prices have declined, and at the close are quite heavy. There is a better supply of both Smoked and Pickled Herrings; the demand though is light and the market is heavy; in prices however, we have no particular variation to note. We quote as follows:

FRUIT—The inquiry for all descriptions of foreign fruits has been very good since our last, and as the supply is not large, prices have advanced, closing firm; the stock of Raisins in first hands is indeed small. We quote:

GRAIN—The Wheat market is inactive, but holders are very firm in their views, especially for old Spring, for which they ask $1 70@$1 80; buyers hold off; we have only to note a sale of 7,000 bush. Amber State at $2 35. The past week we have had a very valuable market and only a fair domestic trade; the arrivals have been more liberal, and were it not for the current high prices demanded a much larger business would have been done for milling as well as for export. The quantity of wheat likely to reach tide-water ere the close of the season we think cannot exceed 1,500,000 bushels, which, added to our present stock, will give us an aggregate of less than 3,000,000 bushels; hence we cannot export wheat to any extent during the Winter. The wants of the coastwise trade are sure to prove large, and as the season advances the great deficiency in the crop of Winter Wheat will be more noticeable, and it will be demonstrated that our present high prices result from a failure in the crop, and not from speculation. Barley is firm but quiet; the supply is liberal; sales to-day of 8,500 bushels Canada West at $1 30. Barley Malt is dull, but is firmly held. Oats opened steady, but with a more active demand, closed better and firm; sales of 84,000 bush. at 48@50½c. for Unsound; 55½c. for Canadian; 58@59c. for old Western in store, and 56@57c. for State. Rye is only in limited demand, but in prices we have no change to note; sales of 3,000 bush. Canadian at $1 20. Corn is easier, but at the concession a more active business was done, in part for export, but chiefly for home use, closing firm. During the week we have had a very lively demand, and, notwithstanding the larger arrivals, prices have steadily improved; the inquiry has been chiefly for export; some speculative demand has prevailed. We have added largely to our stock, which is now about 2,500,000 bush., and is daily increasing; the sales to-day are 95,000 bush. at 82@87c. for Unsound; 87½@88c. for Mixed Western afloat, and 89c. in store.

The exports of Breadstuffs to Great Britain and the Continent for the week ending Oct. 31, 1865, were as follows: To Liverpool, 50 bbls. Flour, 19,766 qrs. Corn; to other foreign ports, 8 bbls. Flour, 1,000 qrs. Wheat, 11,345 qrs. Corn. Total to Great Britain and the Continent, 58 bbls. Flour, 1,000 qrs. Wheat, 31,111 qrs. Corn. Total since Sept. 1, 1865, 15,961 bbls. Flour, 44,221 qrs. Wheat, 193,981 qrs. Corn. Same time in 1864, 34,625 bbls. Flour, 143,724 qrs. Wheat, 5,630 qrs. Corn.

HOPS—There is no new feature to note in the market since our last; in fact, for the past two or three weeks only a moderate consumptive demand prevailed from day to day; holders, however, have been very firm in their views and generally obtained very full prices; this has checked the shipping demand, and we do not hear of a single bale having gone to Europe since Sept. 1. The stock on hand of choice grades is much reduced, and of what little there is here is held above the views of buyers. The crop accounts, we understand, are still unfavorable, the damage done by lice and vermin in the principle growing districts is said to be severe; at the close the market is firm, at from 20c., 40c., 50c., and 60c., for the crop of 1863, 1864 and 1865 as to quality.

BUTTER—The inquiry for choice State butter has been very good for home consumption; prices have advanced, and at the close are firm, owing to the reduced stock and limited present and prospective arrivals.
