Making more stringent the act to punish the fraudulent issue of receipts or fraudulent transfer of property by warehousemen, wharfingers and others.

Amending the act providing for a Deputy Clerk for the Court of General Sessions of Kings County.

Increasing the compensation of Justices of the Sessions, in Kings and Westchester Counties, to $5 a day.

THE UNDERGROUND RAILROAD.

Mr. SESSIONS inquired why the Railroad Committee had not made any report in regard to the underground railroad in Broadway.

Mr. LOW explained that the Committee were unable to agree, and he thought that it would be best to discharge the Committee from the further consideration of that bill, and that it be referred to the Committee of the Whole.

Mr. SESSIONS made a motion to that effect.

Mr. FOLOKA moved to include all the Broadway underground railroads.

Motion lost.

The original motion was also lost.

Mr. LENT introduced a bill dividing the City of New-York into 21 Aldermanic Districts.

Recess.

EVENING SESSION.

The Buffalo Street Railroad bill and the bill amending the Charter of the City of Oswego were read and passed.

The bill directing the distribution of the Safety-Bank Fund among the bill-holders of Insolvent Safety Fund Banks was amended so as to provide that nothing in the act shall be construed as affecting any rights that may have been secured by the receivers of any such banks under existing laws.

The bill incorporating the Citizens' Gaslight Company of Poughkeepsie was ordered to a third reading; also the bill authorizing towns to subscribe to capital stock of the Black River Valley Railroad.

Adjourned.

Adjourned.

The Senate Resolutions—The Civil Rights Bill.

ALBANY, Friday, April 6, 1866.

In the report of the proceedings of the Senate on the resolution disapproving of President Johnson's veto of the Civil Rights Bill, it should have been stated that the resolution requested our Representatives and instructed our Senators in Congress to vote to sustain the bill notwithstanding the objections of the President.

New-York State Canals—Date of Their Opening.

ALBANY, Friday, April 6, 1866.

At a meeting of the Board of Canal Commissioners, held at their office in the City of Albany on Saturday, March 31, 1866, it was resolved that the canals of this State be opened for navigation on the 1st day of May next, except the Champlain Canal which will be opened for navigation on the 7th day of May next.

The Court of Appeals.

ALBANY, Friday, April 6, 1866.

The following is the day calendar of the Court of Appeals for Saturday, April 7: Nos. 34, 35, 106, 107, 108, 109, 112, 113, 114, 115.

Super-Phosphates.

From The Philadelphia Commercial List and Price Current.

The man that draws from mother earth a greater amount of produce and of a better quality than the one who farms without knowledge, science, thought or system, is a public benefactor. The wealth, the success, the progress of this great country depend in a great measure upon the success of the agricultural classes, for they are the bulwarks of our national stability. There is a difference between a full crop and a half crop. Intelligence seasonably applied often averts or counteracts dangers, which ignorance never thinks of till it is too late to escape them. From what we read of the products of English farms, it is evident that the amount depends greatly on the mode of tillage—upon the proper application of super-phosphates and other manures. The crops raised in our country, as a general rule, would not sell for enough to pay the rent of a farm in England. Yet, our produce sells nearly as high. The difference is that we raise *so much less on the ground*, owing to the want of good tillage and the proper application of ammoniacal and phosphatic stimulants to the soil. Farmers expect the land to do everything for them while they do nothing for the land. This will not do for any long period. The land gets tired of that way of farming. Wheat protests against it, corn pines away; potatoes, cabbage, fruit, and everything shrinks to a dwarfish size. The man's pocket shares in the general shrinkage. There is intelligence enlisted in the farming interests of the country. It is diffusing itself, but the whole lump is not yet entirely leavened. There are still fears of agricultural books and papers, of book-farming, and of super-phosphates, but this prejudice is rapidly disappearing. There are unmistakable evidences in this, from the fact that, 12 years ago, Messrs. BAUGH & SONS, the well-known manufacturers of Raw Bone Super-Phosphate of Lime could only find sale in Pennsylvania, New-Jersey, Delaware and Maryland for 50 tuns of that article, while last year they made nearly *ten thousand tuns*, valued at over *half a million of dollars*.

The value of ground bones as an enricher and a natural fertilizer of the soil is now acknowledged by every intelligent farmer, and they are not only extensively used in the adjoining States, but since the close of the Rebellion orders have been received from Western Pennsylvania, Ohio, Virginia, North and South Carolina, Alabama, Georgia, and other points "away down in Dixie."

An immense establishment has recently been erected on Morris-st. wharf by Messrs. Baugh and Sons, for the manufacture of this invaluable article. Their lot is 2,500 feet long by 120 feet wide, extending east from Otsego-st. to the river front, with an excellent pier, and ample room for several vessels drawing 20 or less feet of water. Their manufacturing establishment is a mammoth one, occupying a space of 64x360 feet, with a storage capacity of 5,000 tuns. The crushing mills, &c., are driven by a 76-horse engine, and the machinery is so arranged that nearly all the work in the building is executed by their elevators. Their Raw Bone Phosphate is made by a peculiar process, patented by themselves, and embraces the manipulation of bones with their adhering organic matter, a true bird guano (of which particular sort they consume nearly all brought to this market), and sulphuric acid, all ground up and scientifically mixed, resulting in a coarse powder, the fertilizing qualities of which are too well known to require any commendatory notice from us. The guano employed is brought from an island in the Caribean Sea, and is claimed to be of the same origin as Peruvian Guano, but differing in the amount of ammonia it contains, owing to the difference of locality. The latter being taken from a rainless latitude, the ammonia preponderates. The guano used by the Messrs. Baugh is of a very soft and soluble nature, and by their special process is supplied abundantly with ammonia, which is obtained from the organic part of the bone. It is held by many agriculturists that the ammonia as well as the phosphate of lime obtained from the bones of animals and the deposit of birds is of more practical value as a manure than the ammonia of commerce and the phosphate of lime of a hard mineral guano.

"But where do the bones come from?" it will naturally be asked. We will answer. There are now stored in the basement of this establishment 1,000 tuns of Government horse bones and meat, all the glory that now remains of the gallant steeds that sent Gen. Jubal Early "whirling" up the Shenandoah Valley, and bore Kilpatrick's valiant horsemen on their victorious career. The agents of the firm are constantly receiving supplies from Pittsburgh, Cincinnati, Chicago, New-Orleans, Mobile, and most of the other Southern ports. The pork-packing establishments of the West furnish a large supply—in fact, the amount coming forward from Ohio and Illinois requires the constant use of about $20,000 worth of heavy gunny bags. A single train of 23 car-loads of hog bones were received last Summer at one time. The reader would naturally infer that the collection of such a mass of animal matter at a single point would create an offensive and insufferable nuisance. Such is far from the fact. All the bones, &c., are perfectly dried and disinfected before they are received, by a process patented by this firm, and the only offensive odor which we found during our visit to the establishment was from the ammonia which is constantly escaping during the preparation of the super-phosphates, and every one knows that ammonia and phosphoric acid are the great enriching ingredients of Peruvian guano—the best of all fertilizers. The superiority and popularity of Messrs. Baugh & Sons' "Raw Bone Phosphate" has brought out many imitations, and they have been compelled, in order to protect their friends from imposition, and warn them against the purchase of an inferior article, to adopt a peculiar trade mark, which will be found upon every bag and barrel of their manufacture.

A branch office has lately been opened at No. 181 Pearl-st., New-York, where Baugh Brothers & Co. are established as general Wholesale Agents, and from this point they can readily supply all parts of the world with this celebrated manure.

A REMARKABLE BOOK.—Mr. C. C. Yeaton, to whose energy it is due that the Alden Type Setting Machine has been brought to its present condition of efficiency, has recently had printed a Manual descriptive of it. It is printed in large type of several kinds and of the handsomest face, and the best paper ever used for books. As a specimen of book-making it is unique and beautiful, but its special merit is in its accurate description of this most ingenious and complicated piece of mechanism, every part, from the smallest screw or pin to the heavier parts being carefully drawn, engraved, marked and numbered to correspond with similar marks and numbers upon the different parts of the machine itself. Each print is accompanied with letter-press description and direction, and the whole work is so carefully done and with such attention to minute details that any good machinist with the catalogue before him could pick out the parts of the machine from a heap and put it accurately together in running condition. No attempt of this sort, we believe, has ever before been made with any other machine, inventors and manufacturers hitherto relying solely upon instructed workmen. The advantages of the plan are obvious. Mr. Hoe, the inventor of the greatest printing press in the world, says that such a catalogue of his machine, if made at the outset, would have saved him many thousands of dollars. Mr. Boilleau, the French Consul-General at this port, has asked for a copy of Mr. Yeaton's Manual to send to the Emperor, and a volume, very splendidly bound, has been forwarded for presentation. One of the machines will be sent to the Exhibition, where it must attract much attention as the latest evidence of American invention.

On the third page, under "Instruction," see advertisement of BURNHAM'S AMERICAN BUSINESS COLLEGE, a superior institution, located at Springfield, Massachusetts.

FIRE IN FOURTH-AVE.—Last evening a fire was caused in Columbia College, at the corner of Fourth-ave. and Fiftieth-st., by a defect in the flue of the muffled furnace in the basement. Before it was extinguished, the premises were damaged to the amount of $3,000, by fire and water. Fully insured in The North American, Globe and other companies.

NEW-JERSEY.

The Legislature Adjourns Without Choosing a United States Senator.

SCOVEL "DEFINES HIS POSITION."

TRENTON, Friday, April 6, 1866.

The Legislature adjourned to-day at noon. Before the adjournment Mr. Scovel made a speech defining his position. He said he was then and there ready to go into joint meeting, and in addition to the candidates already named he suggested the names of Ex-Gov. Newell and Brig.-Gen. McAllister as candidates for Senator, for whom he would gladly go into joint meeting, even before adjournment. There is some talk of an extra session to choose a Senator. The Republicans held a caucus this afternoon. Both Houses adjourned with much good feeling.

The Governor has not yet signed the Wet Basin bill.

Musical.

ITALIAN OPERA—ACADEMY OF MUSIC.

There will be a matinée at the Academy to-day, to commence at 11 o'clock instead of the usual hour. The opera of Lucrezia Borgia will be given, the chief rôles to be sustained by Señorita Carmelina Poch, Signor Irfre, Miss Adelaide Phillips and Signor Antonucci.

This evening the grand opera, "Les Huguenots," will be given at the Academy of Music, Brooklyn, with the same strength of cast as in New-York, namely, Carozzi-Zucchi, Adelaide Phillips, Signorina Cairoli, Mazzoleni, Bellini, Antonucci, and other excellent artists. Such an opera and such a cast should make the Brooklynites turn out en masse.

GRAND CONCERT AT IRVING HALL.

A grand concert for the benefit of the attaches of Irving Hall, will be given at that place this evening. The following excellent artists have volunteered their services on the occasion: Mrs. Marie Abbott, Miss Emilie Knauss, Mr. L. P. Thatcher, Mr. S. B. Mills, Mr. G. W. Morgan, Mr. L. P. Warren, Theo. Thomas, F. Eben, and W. Dressler, Conductor. Odell's new organ will be played, and with such varied talent the programme cannot fail to be highly interesting. The attaches of Irving Hall are proverbially most polite and obliging to all, and we trust that all those who have been obliged by their attention will be present this evening on the occasion of their benefit.

BLIND TOM'S CONCERTS.

Blind Tom, who has just returned from a highly successful concert tour, where he seems to have made both fame and honor, will commence a series of concerts at Irving Hall on Monday evening next. Tom has no assistance, his talents are so varied that he holds the attention of his audience by his personal efforts alone. His performances are singular in the extreme, and those who have not seen him should take this opportunity of hearing the most singular exhibition of natural musical abilities that ever came before the public.

INSURANCE BY DEPOSIT.—By the advertisement of the Metropolitan Insurance Company, which will be found elsewhere, it will be seen that the Company proposes to introduce the deposit plan of insuring dwellings. This system has been tried successfully elsewhere, and probably will become popular here, not only because of its greater cheapness, but the relief it affords from all anxiety after the insurance is once effected.

The attention of our readers is called to the advertisement of the NEW ENGLAND MUTUAL LIFE INSURANCE COMPANY OF BOSTON, an institution which deservedly ranks high among those best acquainted with insurance matters. It is one of the oldest and most successful companies, having been organized in 1843. It has never yet had a case before a jury—a fact which speaks volumes for those concerned in the management of its affairs. Its returns to its members have been liberal, and its accumulation has reached nearly $4,000,000.

THE REV. HENRY BLANCHARD will lecture to-morrow evening in the Church of the Restoration, corner Monroe-place and Clark-st., Brooklyn, on "The Theology of Whittier," illustrating by selections from the poet's writings.

THE LAST DAYS of ex-President Martin Van Buren were made comfortable by the use of JONAS WHITCOMB'S ASTHMA REMEDY. Letters in our possession from his physician, and from Mr. Van Buren himself, express much gratification with the results of its use.

Extract from the "Life of Washington Irving," by his nephew, Pierre M. Irving, Vol. IV., page 272;

"The doctor prescribed, as an experiment—what had been suggested by Dr. (O. W.) Holmes on his late visit—'Jonas Whitcomb's Remedy for Asthma,' a teaspoonful in a wineglass of water, to be taken every four hours. A good night was the result."

In no case of purely Asthmatic character has it failed to give prompt relief, and in many cases a permanent cure has been effected. No danger need be apprehended from its use. An infant may take it with perfect safety. (See circular.)

JOSEPH BURNETT & Co., Boston, Sole Proprietors.

For sale by all druggists.

Much sickness with children, as well as adults, attributed to other causes, is occasioned by Worms. BROWN'S VERMIFUGE COMFITS are effectual in destroying Worms, and can do no possible injury to the most delicate child.

A UNIVERSAL REMEDY.—BROWN'S BRONCHIAL TROCHES, for Coughs, Colds and Bronchial Affections, now stand the first in public favor and confidence. This result has been acquired by a test of many years. Their merits and extensive use have caused the TROCHES to be counterfeited, and we would caution purchasers to be on their guard against worthless imitations.

TO MOTHERS.—MRS. WINSLOW'S SOOTHING SYRUP, for Children, is an old and well-tried remedy. It has stood the test of many, many years, and never known to fail. It not only relieves the child from pain, but invigorates the stomach and bowels, cures wind colic, and gives rest and health to the child and comfort to the mother.

A MYSTERY.—We cannot understand why KNOX is putting up a building large enough to hold twenty-five million hats, when his new Spring style, which is light and graceful as a poet's dream, goes off as fast as it can be manufactured. Until the new palace is completed, KNOX'S depot is at No. 151 Fulton-st., two doors from Broadway, and No. 533 Broadway.
