RAVEN & BACON'S PIANOS.
(Established 1829.)
A full assortment of these instruments, which have been well known in the New-York market for more than 30 years, constantly on hand. We are continually adding improvements to our pianos, and our facilities enable us to furnish them at prices satisfactory to purchasers. Pictorial circulars sent by mail. Warerooms, 135 Grand-st., New-York.

WANTED—A good STEINWAY or CHICKERING PIANO, in EXCHANGE for a good BILLIARD TABLE, or SHARES in a developed SILVER MINING COMPANY of California, at their market value. Address Box No. 3,372 City Post-Office.

Gas Fitting.

FIRMIN'S SCIENTIFIC SYSTEM of GAS-FITTING SECURES a better light at half the cost, and ever reliable and efficient. Nos. 64 and 66 Maiden-lane, south-east cor. William-st.
TESTIMONIAL FROM PROF. E. OGDEN DOREMUS.
COLLEGE OF THE CITY OF NEW-YORK,
Corner Lexington-ave. and Twenty-third-st.
NEW-YORK, June 5, 1866.
This is to certify that I have known Mr. John Firmin for several years, and that I esteem him as one familiar with the principles requisite for regulating and adjusting the burning of illuminating gas, and I have furthermore tested satisfactorily his mechanical skill in the same. Respectfully submitted, E. OGDEN DOREMUS.
CERTIFICATES.
OFFICE OF THE TRIBUNE,
NEW-YORK, April 3, 1866.
We employed Mr. Firmin, four years since, to take charge of our gas-burners, and the result was a deduction of our gas bills of over a thousand dollars per year, with better light. The result was so satisfactory that we have employed him regularly ever since.
THE TRIBUNE ASSOCIATION,
SAM'L SINCLAIR, Publisher.
BREVOORT HOUSE, March 31, 1866.
I have known Mr. Firmin since 1853, and have employed him to regulate my gas-burners on several occasions, always to my benefit and satisfaction.
I regard him, by his long experience and constant study, making it a specialty, as having a better knowledge of gas-burners and their operation in practice than any one I ever employed. He gives a better light at less cost, by his way of arranging the burners, and I would recommend him to any one that is not satisfied with his gas-bills.
ALBERT CLARK, Proprietor.
By a recent combination of improvements I guarantee and warrant my gaslight to be reliable, and at one half the cost of the same light burned at the usual rates. J. F.

Printing.

WM. EVERDELL'S SONS, No. 104 Fulton-st.—STEAM JOB PRINTERS and LABEL MANUFACTURERS.

Lectures and Meetings.

THE LADIES of the CHURCH of DIVINE PATERNITY (the Rev. Dr. E. H. Chapin, D. D.) will hold a SOCIAL FESTIVAL at the Everett Rooms, corner Broadway and Thirty-first-st., on the evenings of TUESDAY, June 12, 13 and 14. Where will be made up a Bedspread, Singer, Refreshments, &c. Admission 50 cts.

Machinery.

BRICK MAKING MACHINES, Brick Presses, Tempering Wheels, Tile Machines, Castings for Coal Kilns; all kinds of Machinery for manufacturing Brick. Please send for a circular. F. L. CARNELL & Co.,
No. 1,844 Germantown-ave., Philadelphia.

FOR SALE—A ROPERS CALORIC ENGINE, in good order, and but little used. Is a good Machine for any light Manufacturing purpose. MOSES G. WILDER,
West Meriden, Conn.

STEAM ENGINE for SALE—One second-hand, low pressure, 100 horse-power engine and boiler, 22 inch cylinder, five-foot stroke, and all in perfect working order. Can be seen running at the works of the J. Russell Manufacturing Company, Greenfield, Mass. Apply to WOODRUFF & BEACH, Hartford, Conn., or to J. RUSSELL Manufacturing Company, Greenfield, Mass.

THE ADAMANTINE BRICK PRESS
Is the ONLY BRICK PRESS that uses the PERFORATORS, or EXTRACTS THE AIR FROM THE CLAY while in the process of pressing.
It is the ONLY PRESS IN USE that is capable of making pressed Brick THAT WILL NEITHER CRACK, CHECK, or WARP IN BURNING. All others that profess to do so are imitators, and we caution the public against their impositions. L. C. WOODRUFF, President, No. 175 Broadway.

THE HARRISON BOILER a SAFE STEAM BOILER.—This new Steam Generator combines essential advantages IN ABSOLUTE SAFETY FROM EXPLOSION, in first cost and cost of repairs, durability, economy of fuel, facility of cleaning and transportation, not possessed by any other boiler.
It is formed of a combination of cast-iron hollow spheres, each eight inches in external diameter and three-eighths of an inch thick. These spheres are held together by wrought-iron bolts with caps at the ends. The form is the strongest that can be given to resist internal pressure. The joints are made vapor-tight as it is by pounding or riveting, which lessens the strength of the wrought-iron bolts plate about 40 per cent. Every boiler is tested by hydraulic pressure at 400 pounds to the square inch. IT CANNOT BE BURST UNDER ANY PRACTICABLE STEAM PRESSURE.
Under pressure which might cause rupture in ordinary boilers, every joint in this boiler becomes a safety valve. No other steam generator possesses the property of yielding under extreme pressure without injury to itself and thus preventing disaster.
It is not affected by corrosion, which soon destroys the wrought-iron boiler. Most explosions occur from this cause. It has economy in fuel equal to the best boilers, arising from the large extent and nearness to the fire of its heating surface, as also from the waved form of the surface, which thoroughly mixes the gases, induces better combustion, and keeps the heating surface clean, which makes it far more effectually heated than in the ordinary tubular or cylinder boiler.
It gets up steam quickly and with little fuel. It produces superheated steam without separate apparatus, and is not liable to priming or foaming. It is easily transported, and may be taken apart so that no piece need weigh more than 50 pounds. In difficult pieces of access, the largest boiler may be carried through a door opening one foot square. It is readily cleaned from soot and ashes. Under ordinary circumstances it is safe free from permanent deposit by blowing the water entirely out, under full pressure, once a week. It requires no special skill in its management. Injured parts can be renewed with great facility, as they are uniform in shape and size. When renewed the entire boiler remains as good as new. The greater part of the boiler will never need renewal unless unfairly used.
For the mining districts of California, Colorado and Nevada, it is without a rival, on the ease with which it can be taken apart, so that no single piece need weigh over eighty pounds. It has less weight and takes less than one-half the ground area of the ordinary cylinder boiler without being increased in light. Any kind of fuel may be used, from the most expensive to refuse coal dust. There are over 100 of these boilers now in use, some of them in the best establishments in England and in this country. Drawings and specifications free of charge. For circulars or prices address JOSEPH HARRISON, jr., Harrison Boiler Works, Gray's Ferry Road, adjoining United States Arsenal, Philadelphia, Pa.

FOR SALE.—Two new Horizontal Steam ENGINES, made very heavy and strong; Cylinder 24in. bore, 4 feet stroke, with variable Cut-off, wrought iron Fly Wheel, Shaft 18in. diameter; suitable for a Rolling Mill or other purposes. Address STANHOPE & SUPLEE, Bridgewater Iron Works, Frankford, Pa.
