THURSDAY, Aug. 2—P. M.

Gold opened at 148¾ and closed at 148.

There was a large business done upon the street and at the Stock Exchange, and sharp changes were shown in prices. Early in the day there was a rush to buy almost everything upon the list and very full prices were paid. Erie selling at 69¾; Michigan Southern at 85¼; North-Western common at 38, and Rock Island at 103¼. After the first call the market broke, Erie falling to 68¾ and North-Western to 36¼. There was a good demand for Government securities and as high as 104¼ was paid for the first series of 7.30s. In Railway bonds and State and City stocks there was more doing at advancing rates. Pacific Mail rose to 223; Boston Water Power fell to 31¼, and Mariposa Preferred sold at 28¼. After the adjournment of the Board prices were irregular, but at the Open Board prices all improved, and the market closed strong at quotations: Ohio and Mississippi Certificates, 29@29¼; Canton Company, 52¼@53¼; Boston Water Power, 33@34; Cumberland Preferred, 46¾@47¾; Quicksilver, 50¼@51; Mariposa Preferred, 27¾@28; Western Union Telegraph, 55¼@55¾; New-York Central, 104¼@105; Erie, 69¼@69¾; Hudson River, 120@121¼; Reading, 112¼@112¾; Michigan Central, 111@111¼; Michigan Southern, 84¼@84¾; Illinois Central, 123@124; Cleveland and Pittsburgh, 88¼@88¾; Cleveland and Toledo, 117@117¼; Rock Island, 103¼@103¾; North-Western, 37¼@37¾; North-Western Preferred, 67¼@67¾; Fort Wayne, 103@103¼.

The Union Pacific Railroad are building their line at an average of a mile and a half a day, and they are pressing the contractors extending the Chicago and North-Western to get their line done to Omaha by the 1st of January; a large bonus, it is said, has been offered. The North-Western Company are adding largely to their rolling stock to meet the great increase of business that must come upon their line by the Pacific Railroad connection.

Money is refused by some houses at 3 per cent from banks, and 4 per cent loans are being paid off. For call loans the quotation is 3@5 per cent. In commercial paper little doing. Best names are scarce, and can be used at low rates.

The abundance of money among stock houses is stimulating speculation rapidly, and before August closes prices promise to show a great improvement. The buyers thus far are mainly young and not over-strong houses, and they have full control of the market. Most of the old brokers are disposed to be cautious, and prefer to see August well advanced before loading themselves with stocks.

Exchange is dull and favors the buyer. London prime bankers', 60 days, 107¾@108¼; London, prime bankers', sight, 108¾@109¼; Paris, bankers, long, 5.17½@5.16¼; Paris, bankers, short, 5.15@5.13¾; Antwerp, 5.20@5.17½; Swiss, 5.20@5.17½; Hamburg, 36¼@37; Amsterdam, 41@41¼; Frankfort, —, nominal; Bremen, 78¼@78¾; Berlin, 73@73¾.

In freights to Liverpool 23,000 bush. Corn at 4½d., and per steamer, 200 bales Cotton at ¼d. To London, 8,000 bush. Corn, 5d. To Cork for a bark with 15,000 bush. Corn at 5s.

The business of the Sub-Treasury was: Receipts, $5,316,744 53—for Customs, $479,000; Payments, $4,796,487 48; Balance, $82,464,223 36; Gold Notes, $300,000.

No London dispatches have been received in Wall-st. for two days by the cable.

The Times (editorial) says:

"It would not be astonishing if, within a year, Europe should attempt to increase her present supply of our bonds to a thousand millions of dollars, at an advance of 10 or 15 per cent upon existing prices."

If this attempt is made it is sure to succeed, and that, too, without putting the bonds up much. The borrowing portion of the American people would view with astonishment *and* pleasure the sale of 5-20s at something under current rates.

The Hon. Henry A. Foster, Justice of the Supreme Court, has decided to allow parties to offset their debts against bank shares, a fact of importance to tax-payers.

The Cincinnati Commercial of Tuesday says:

Exchange has stiffened up materially during the week, so that now it is in scant supply, and dealers ready to pay 1@2c premium for good checks. The receipts from the interior have been greatly diminished by the check in the West movement and there is but little making in the regular course of business, either by the movement of produce, or by the transfer of Government securities to the New-York market for sale, it is found to be difficult to keep up balances. The demand keeps up well. The demand for loans in regular mercantile circles seems to keep up above the usual but season's average. Much of it is still in the shape of renewals to cover a dull trade in merchandise, and to this extent it is not to be regarded as healthy, though, esteemed, of course, as things go, substantial as to the security.

The Secretary of the Treasury has decided to confine, for the present, the conversion of 7.30s into bonds of 1865 to the August series of notes.

As considerable inquiry is making in regard to the conversion of 7.30s into 5-20s of 1865, it is proper to state, as we are able to do on the best authority, that the Government is willing to receive in exchange the 7.30s falling due August 15, 1867.

The following will show the Eastward movement of Flour and Grain from Buffalo, including shipments for tide water for 14 days ending July 30, and shipments from Oswego 9 days from July 22 to July 30, inclusive, which will show about what there is afloat on canal destined for tide water:

Neill Brothers & Co., speaking of the cotton crop, say:

Our advices this week are again very satisfactory. From all parts of the cotton growing country we hear that the crop is progressing in a manner far beyond the earlier expectations. We have advices from almost every cotton growing state, and all are of the same tenor, reporting just such rains as the cotton fields wanted. Our correspondents in Georgia consider the crop in that section "out of danger," and venture to name figures for the whole crop, based on local experience. These figures are as yet, of course, mere guesses, and we are not ourselves at all prepared either to indorse them or dispute them. They are generally considered too large. Great errors in estimating this crop are, however, likely to arise from the fact that, throughout the South, there is among the old slave-holding class, a natural and very common determination to take the most hopeless view of the results of emancipation. Nearly all the reports, public and private, on which in former times confidence was placed, are now more or less biassed by this chronic hopelessness, and special pains seem to be taken to give it currency through the press. A great number of planters are, of course, doing well, but they have no interest in publishing the fact, and are not therefore heard from. There are, besides, a large number of small farmers and new men planting this year who never raised cotton before, and from these a great addition to the total crop may be looked for. The crop is now free from the danger of drouth, and probably of worms, although this is not yet quite certain. The result is, of course, liable to vast modifications, according to the date of frost, and the character of the picking season. A long warm Autumn may give us fair crops on all the lands replanted after the overflows, beside the late pickings over the whole crop, which often form a large proportion of the total. A wet Autumn or an early and severe frost, on the contrary, might cut off both these important sources.

Thompson's Bank Note Reporter says:

The money market continues easy and stocks are again higher, though we strenuously hold to the opinion that money will be tight and currency scarce in the Fall, when the stepping of all sections of the country are being moved to market. Before January the South and West will require $150,000,000 of currency, and at the same time the Middle, Northern and Eastern States will contract by retiring the old State currency. Fifteen millions more of National currency is ready that can be issued to fill the $300,000,000 maximum. The State bank currency to be retired is more than double this amount, so that a positive contraction of currency of somewhere between $6,000,000 and $7,000,000 per month is now to be encountered. This contraction commences in the wrong season of the year to work mildly.

The Chicago Tribune, speaking of the grain crop of the North-West, says:

The Winter wheat crop is generally better in quality and heavier in yield than for two years past. In some portions of Illinois and Indiana the yield is much above an average, while in other parts of those States and in spots throughout Michigan it is light. In Central Illinois and in Indiana rains have fallen almost every day for a week, and fears are entertained that the crops will be damaged in the shock; but our dispatches generally agree in stating that should the weather improve from this time, the crop will be mostly saved in good condition. In Michigan much of the Winter wheat was Winter-killed; but we have not many complaints of this character from Illinois or Indiana. From the evidence before us we should judge that the quality of the crop in the two latter States is much better than that of last years, while the yield is heavier. In Illinois Winter wheat for several years past has been a very uncertain crop, and the breadth sown is comparatively small; but if the present crop is harvested in good condition, farmers will be encouraged to sow more largely of it next Fall. With regard to Spring wheat, our advices nearly all go to indicate a heavy yield and excellent quality. In Iowa the crop is reported to be better in all respects than ever before, and we have very little complaint as to condition from any quarter. The harvesting of Spring wheat has commenced in various portions of Illinois, and there are some fears expressed regarding the effect of the recent rains; but there is not much room for doubt that, should the weather change for the better the crop will be large and good. For several years past the Spring wheat in many portions of Northern Illinois has been rather uncertain as regards quality and yield; but this year we have less complaint than usual. Although our advices from Wisconsin and Minnesota are not of so recent a date as those from Illinois, we have every reason to believe that the crop of Spring wheat in those States will be very heavy, both as regards quality and yield. The recent rains cannot have affected the crop in those States as in Illinois and Indiana, because it is generally two or three weeks later. On the whole, therefore, it is probable that the crop of Spring wheat will be unusually heavy and of good quality. The crop of corn will be enormous. Nothing can prevent this but very early frosts. The reports from nearly all portions of Illinois and Iowa are of quite a glowing character. Should we have no frosts to damage it before the 15th of August, the West will probably see the best corn crop ever raised. The crop of oats is unusually heavy, and it is mostly harvested and saved. In some portions, the crop is enormous. The barley crop, always an uncertain crop in the North-West, is reported to be better than for five or six years; but we fear the recent rains may have stained the crop somewhat and damaged it. Of this, however, we have no information. It is generally harvested, and the quality and yield are said to be satisfactory. The rye crop is heavier than usual, and the quality is good beyond doubt. It is generally harvested, and we hear of no complaints as to damage by recent rains. On the whole, the people of the North-West have reason to be grateful to Providence for the abundant yield of cereals with which they are likely to be enriched. There is but little in the crop reports, thus far, to cause alarm, but much to encourage and stimulate to greater endeavors hereafter.

Markets—CAREFULLY REPORTED FOR THE N. Y. TRIBUNE.

THURSDAY, Aug. 2, 1866.

ASHES—The market is unchanged; sales of Pots at $8 37½@$8 50. Pearls steady at $15 50@$15 75.

COTTON—A fair degree of activity has prevailed, the demand being principally from spinners, but the market still remains in an unsettled condition; we quote at about 36@38c. for Middling Uplands, to do. New-Orleans and Texas, though these figures are in a measure nominal owing to the difference in the views of holders; sales of 1,000 bales.

COFFEE—A very fair demand prevails for Rio, and several small parcels have changed hands at full previous figures; sales late last evening and to-day of 1,224 bags ex steamer South America; 487 bags ex steamer North America, 494 bags ex Campanero, and 518 bags ex Paulus, a total of 2,723 bags, part at 10@11¼c., gold, in bond; other kinds are fairly active; sales of 500 bags Laguayra, and 400 bags Maracaibo on private terms.

FLOUR AND MEAL.—At the opening prices were steady and close quite firm, and with an increased demand for Western and State Flour, especially the low and medium grades; there is a good inquiry for the West Indies and British Provinces; Family brands are not offered very freely; the sales are 13,500 bbls. at $5 80 for Superfine State, $7@$8 60 for Extra do., $8 60@$9 50 for Fancy do., $7@$8 60 for the low grades of Western Extra, $8 75@$9 00 for Shipping Ohio, $9 70@$11 for Trade and Family brands, and $10@$14 50 for St. Louis Extras. Canadian Flour is dull, in light supply, and is steady; sales of 80 bbls. at $8 40@$9 50 for common to fair Extra, and $9 60@$12 10 for Trade and Family do. Southern Flour is in fair request and prices are steady; the arrivals are small; sales of 280 bbls. at $9 40@$11 for common to fair Extra Baltimore and Country, and $11 10@$15 for Trade and Family do. Rye Flour is in increased demand and prices are unchanged; sales of 310 bbls. at $6@$6 50. Corn Meal is in demand for the West Indies, and is scarce.

GRAIN—The Wheat market opened steady, and at the close is a little easier; the inquiry for milling is light, and the supply is small; sales of 22,000 bush. at $1 75@$1 95 for No. 2 and fair No. 1 Milwaukee Club. Barley is inactive and prices are uncertain. Barley Malt is in good demand, and prices are firm; sales of 1,700 bush. at $1 45@$1 50. Oats opened dull, but steady, and at the close are easier; the sales are 47,000 bush. Western at 43@45c., Jersey and Southern at 39@41c., and Iowa in bag-lots at 41c. Corn opened inactive and heavy, and closed 2c. easier; the inquiry is chiefly for export; sales of 169,000 bush. at 78@80c. for Unsound, 80@82½c. for New Western Mixed, the latter for choice, $1 10 for Western White, and 86c. for do. Yellow.

HIDES—There is a steady demand, and with small receipts prices are firm; sales 3,300 Buenos Ayres (dry) 22 lb, part at 21c., gold; 1,000 Texas, 24 lb., on private terms.

HOPS—The market is poorly supplied, and prices are 50@72½c. for Bavarian, and 50c. for American.

HEMPS are fairly active and prices are steady; the supply is small; we quote at from 50@60@70c., as to growth and quality.

MOLASSES—We hear of no sales; prices are unchanged.

NAVAL STORES—Spirits Turpentine is decidedly higher, 75c. bid for straight lots with papers, and 71@72c. paid without papers. For common Rosin $3 25 is freely bid, but no sellers under $3 38@$3 50. Crude Turpentine is firm at $4 75. Tar $3@$3 50.

WHISKY is inactive, but holders are firm.

N. Y. Wholesale Prices of Country Produce.

FOR THE WEEK ENDING Aug. 2, 1866.

(Expressly for THE N. Y. TRIBUNE by our own Reporter.)

The following are the current rates of articles in good condition, as sold by commission houses at wholesale. Shippers receive 5 to 10 ₱ cent less, deducted for commissions, beside freight and other charges. Parties receiving produce to sell, often with the request that immediate returns be made, cannot always obtain the prices which transient buyers save to pay. Our figures are intended more for the farmer than the merchant, and we prefer not to disappoint by giving the outside prices of very choice articles.

BEANS AND PEAS.

These are quiet at low prices for all except prime. A small lot superior medium was sold at $2. We quote:	
Beans, pea, prime, ₱ bush	$2 10@$2 25

FRUITS AND BERRIES.

The great trade at present is in Lawton blackberries, and these vary in price nearly every day—in fact, late arrivals often sell lo. per quart lower than early receipts. It is very important that all fruits are received early in the morning. Some days they run down to 14@15c. at which price preserve men will usually take them. They brought 20@22c. this morning—15c. before night. Peaches are arriving more freely, and gradually decline in price. We quote:

ROMAN LOAN.

AMERICAN ISSUE—FOUR MILLION DOLLARS.

To insure the Treasury of the States of the Holy See complete independence during the negotiations pending between the Governments of France and Italy for the liquidation of the Papal State debt, His Holiness, Pope Pius IX., by Pontifical Act of the 11th of April, 1866, decreed the emission by subscription of the loan now offered to the public.

Although former loans have commanded nearly par, His Holiness, in view of the present condition of monetary matters, not wishing to impose a sacrifice upon those willing to assist him in surmounting his present temporary embarrassments, as well as to present inducements to capital, has decided to issue this loan at sixty-six (66) dollars gold for the one hundred dollar gold bond.

The Bonds, payable to bearer, are of 500 francs, or $100 (gold),
