ted. The best is bad, and ought not to exist in any densely populated portion of the city.

BROWNING'S CATTLE YARD.

This is situated at Nos. 25 and 27 Sixth-st., and includes a building once used as a church. It is so well kept, perhaps, as any place of the kind could be, but is nevertheless offensive. At this point the tour of nuisances closed, ending with the foul bed of the dozen places visited. There are 180 slaughter pens in New-York of the kind we have so hurriedly described, and if any person has a doubt upon the subject of their removal, we invite him to visit any one of the places we have mentioned and witness for 10 minutes the sights we saw. When it is remembered that all of this business may be seen from the streets, and that the buildings are located in the very midst of our most densely populated tenant-house districts, it will not be deemed strange that disease is prevalent. The sanitary condition of the city will not be much improved until an entire reformation shall have taken place in the manner by which animals are prepared for food.

THE BATTLE ROW HOMICIDE.

CONCLUSION OF THE CORONER'S INVESTIGATION AND VERDICT OF THE JURY.

The investigation into the circumstances attending the death of Charles H. Rodgers (colored), who was stabbed by one of a party of white men in Battle Row, North First-st., E. D., on the evening of the 25th inst., was concluded before Coroner Smith and a jury yesterday afternoon. The evidence clearly proved that the wound which caused death was inflicted by Charles Kelly, and he was consequently held to await the action of the Grand Jury.

The substance of the evidence, with the verdict of the jury, is as follows:

Richard Gair, residing at No. 2 Garibaldi-place, North First-st.; Mary Jane Gair, living at the same place, and Thos. Fields, of No. 4 Battle-row (all colored), corroborated the testimony of the witnesses who gave their evidence yesterday, which went to show that Charles Kelly wanted to fight some one, and made threats that he would stab some person whom he said had struck him.

Ann Maria Johnson (colored) of No. 8 Marshall-st., testified that she was coming from market on Saturday evening, and passed deceased, who was in company with Hendrick Chester; a tall man came up, and putting his hand on her shoulder, asked her to point out the man who struck him; one hand was hanging down by his side; witness said, "You have got a knife;" he answered Yes, and that he would strike no one but the man who struck him; whatever he had in his hand glistened; he said he would give up his weapons, and fight him fair; one of the party with the tall man asked him to come away, as he one had done anything to him; he then walked away; witness identified the prisoner Kelly as the man who had the knife.

Frederick Fuller, one of the prisoners being placed on the stand, stated, without oath, that he resided at No. 229 North Second-st.; was in North First-st. near Union-ave., on Saturday night, in company with John Kennedy, John Tully, Geo. Rampton, Michael Quirk, and Charles Kelly; they were walking along when he saw a colored man strike Charles Kelly twice on the back of the neck; had only drank once; none of the party was intoxicated; witness ran out in the middle of the street to get out of the way; did not see any one strike the colored man; was near Kelly at the time he was struck; did not know how many colored men there was or whether there were any more than the one who struck Kelly; Kelly and Rampton had been skylarking in the street; witness did not see a knife, or hear any one in the party he was with say that he had one; witness and party were trying to get Kelly away; was told after he came back from the street that a man had been stabbed; all the party, except witness, were arrested; witness was arrested at his residence on Monday morning; did not pick up a stone in the street.

The statement of deceased, taken on the ante mortem examination, was read. The facts are similar to those testified to by all the witnesses except Foller.

The Coroner briefly charged the jury, who retired, and after some time spent in deliberation, brought in the following verdict:

"That Charles H. Rodgers came to his death by a stab, with a knife, or some sharp instrument, in the hands of Charles Kelly, in a skirmish, on the night of Saturday, August 25, 1866."

The prisoner being arraigned, answered the usual questions as follows: My name is Charles Kelly; am 20 years of age; born in New-York; live at No. 22 North Second-st.; am not a horse-shoer by occupation; I decline answering any further questions now.

Kelly was thereupon remanded to jail to await the action of the Grand Jury. There being no evidence against the other prisoners, they were discharged.

PRAYER MEETING—YOUNG MEN'S CHRISTIAN ASSOCIATION.—A Young Men's Prayer Meeting is held at the rooms of the Association, No. 161 Fifth-ave., corner Twenty-second-st., every Thursday evening. Open to all young men.

COMMERCIAL MATTERS.

WEDNESDAY, August 29—P. M.

Gold has been very steady and dull at 146¾@146¾. The supply of cash gold continues very limited, and ¼ is paid for the use of it for delivery.

Government Bonds are very firm, but the amount of business done was very small. Coupon 6 per cent, 1881, were 113@113¼; Coupon 5-20s, 1862, 113¼@113¾; Coupon 5-20s, 1864, 112@112; Coupon 5-20s, 1865, 109¼@109¾; 7.30s, first issue, 107¼@107¾; 7.30s, second, 106¾@106¾; 7.30s, third, 106¼@106¾. A few speculators met on Broad-st. at 10 o'clock and a moderate business was done in Erie at 73¾@74¼, and Reading at 115¼@115¾. The balance of the share list was neglected, and by noon the crowd had dispersed. The street was entirely deserted by the regular brokers, and the day has been observed very closely as a holiday. The quotations at noon were: New-York Central, 104@104¼; Erie, 73¾@74; Hudson River, 118¼@119¼; Reading, 115¼@115¾; Michigan Central, 113¼@113¾; Michigan Southern, 80¼@80¾; Illinois Central, 123¾@123¾; Cleveland and Pittsburgh, 87¼; Rock Island, 110¼@110¾; Northwestern, 36¾@37; North-Western Preferred, 68¼@68¾; Fort Wayne, 103¼@103¾.

Money is inactive, there is no demand from brokers today, and the rate remains unchanged at 4@5 per cent.

The Chicago Evening Journal of Monday says:

There is no material alteration to notice in the general features of the domestic money market. The country banks continue to check heavily on their balances here, and the mercantile community at large are just now in want of a larger amount of cash for the purpose of making purchases for their Autumn trade. The market is firm and closes at 7@10 per cent, even for first class paper. The demand for Eastern Exchange is light, and the market rates dull at ¼ of 1 per cent discount buying, and at par selling.

The Cincinnati Daily Times of Monday says:

We have nothing new of any special importance to report in relation to the discount market. The demand for money is fair, but with a liberal supply of currency legitimate borrowers experience no difficulty in negotiating such accommodations as they require at 8@10 ⅌ cent for first class signatures, and good mercantile bills. A moderate amount of outside paper is placed at 12@15 ⅌ cent.

In freights the offerings have been moderate, chiefly grain, and the rates have rapidly grown heavy at the close. The business has been mainly by steamer, and at irregular rates for heavy goods. In charters we have very little to note. The engagements to Liverpool are 7,000 bush. corn at 4½d. A bark was chartered to Cork and a market with 16,000 bush corn at 5s. 3d.

The business of the Sub-Treasury was: Receipts, $1,758,420 07—for Customs, $281,000; Payments, $8,514,938 08; Balance, $78,113,455 14; Gold notes, $428,000.

W. F. Wright's circular, per Cuba, says:

The sales of cotton in this market during the past week amount to 11,600 bales. The prices have been irregular and close at about ½c. lower than the submitted quotations, which are retained from last week. Shippers have been prevented from operating, owing to the extreme low rates, and difficulty of selling exchange, and some purchases for export have had to be resold. Our own spinners have been buying more freely, and speculators shown more spirit. The export of the week has been—to Liverpool, 4,661 bales; Havre, 433; Barcelona, 841; Bremen, 97. Total, 5,432 bales. On the whole the advices of the crop are not so encouraging as they have heretofore been. The question is mainly one of weather, and predictions of what that may be during the next two months are as likely to be realized as estimates made at the present time.

The following is a statement of the movement in Cotton since the 1st September last:

Receipts at the Ports in the United States	2,622,000
Export to Great Britain	1,927,000
Export to France	216,00
Export to other Foreign Ports	71,000
Total Exports	1,524,000
Stock on hand	255,000
Of which during the past week included in the above:	
Receipts at the Ports	5,000
Exports to Great Britain	6,000
Exports to France	1,000
Exports to other Foreign Ports	
Total Exports	7,000

A letter from Memphis gives the following statement as to the resources of the Tennessee banks:

We have in Memphis four National Banks, and one old bank under State authority, one savings' association, and several private banks or insurance companies, whose charters confer banking privileges. The aggregate capital employed in banking in this city approximates $1,500,000, a sum entirely inadequate to the wants of the city, with its rapidly increasing business and population. Before the war Memphis stood third on the list in point of importance in the cotton trade, she then enjoyed the banking facilities afforded by the State Bank of Tennessee, the Union, the Planters', the Bank of West Tennessee, the Bank of Memphis, the Southern and the Commercial Banks, as home institutions; also using largely of the issues of the banks of Louisiana, Alabama, Georgia, South Carolina and Kentucky. Now that the great majority of these issues have become uncurrent, or withdrawn from circulation, United States Treasury and National Bank Notes have taken their place, affording to the people a safe and entirely trustworthy currency, one that may be as confidently relied upon as the [illegible] Government itself. The object of the Government in providing for the establishment of National Banks, is mainly to secure to the people legitimate business facilities in the centers of trade and commerce, through out the country and incidentally to popularize Government securities with the great masses. The four banks existing here do not afford us the necessary facilities required at this point. Our private bankers are doing a large and profitable business, all of which speaks well for our growing city and the institutions referred to, which are in the hands of men of experience and well established integrity. It is not deemed necessary in this connection to speak of Memphis as one of the most important commercial and agricultural points in this country, as this fact is universally admitted. Its geographical position, mildness and health of climate, general productiveness of the country, its extensive water communications and first class railroad facilities, are only among the advantages that may be allowed to, insuring to Memphis in the near future, a populous and commercial importance second to no city in the great valleys of the Ohio and Mississippi.

Markets—CARFULLY REPORTED FOR THE N. Y. TRIBUNE.
WEDNESDAY, Aug. 29, 1866.

Our markets generally have been quiet since this day week. Breadstuffs have declined, and Cotton and Petroleum have improved. The weather has been very cold and unseasonable, and we have reports from the North of injury to the crops by frost, but we do not think the injury of any importance, but an early frost at the North-West would ruin the Corn crop, as it is backward but promises well. Provisions are rather scarce and have sold slowly.

ASHES—Have been in moderate request, but prices are without change. We quote at $6 50 for Pots and $13 50@$14 for Pearls.

BEESWAX—Yellow Western has been in more active demand, but prices are a shade easier, closing at 40@41c.

BRISTLES are without change; sales of American at from 75c. @$3, as to style, &c.

BROOM CORN—We notice the first arrival of Broom Corn from Middletown, Ohio, consigned to Messrs. J. A. Burnee & Co. The quality is very good, and of an excellent color, but the growth is short; it is superior for brushes. It was raised by Mr. Issac Wolverton of Middletown, Ohio, and is a credit to him.

CANDLES have been in moderate request at full prices: sales of Adamantine, at 22½@23c.; Sperm, at 40@45c.; and Patent at 50@55c.

COAL—The demand for Domestic has been moderate for the season, and with a steady addition to our stock prices favor the buyer; Cargo prices are the same as last June; from yard it is selling at $5 50@$6 per ton of 2,000 lb. Foreign is in limited supply, and closes firm and in demand; sales of 100 tons Liverpool House Canne at $18 cash.

COPPER—The advance of £6 to £7 in London, as per Cable, has strengthened the market for American Ingot, and a better demand prevailed, closing from at 30½@31c. per Ball and Lake; New Sheathing and Yellow metal are without change; we quote at 45c. for the former, 32c. for the latter.

COFFEE—There has been nothing doing worthy of notice. Prices are nominally unchanged. We quote Rio at 19½c. for Prime, 18½@18c. for Good, 17@17½c. for Fair, 15½@16c. for Ordinary, and 17@18½c. for fair to good cargoes. Java 25@26c., Ceylon 18@21½c., Maracaibo 18@20c., and Laguayra 18@19½c., all net cash, gold, duty paid.

COTTON—Only half a day's business was done, the brokers' offices all closing at 12 o'clock. During the morning about 1,000 bales were sold, the market rather favoring the buyer, and closing at 32½@32½c. for Middlings, and 34@34½c. for do. New-Orleans and Texas.

FLOUR AND MEAL—The demand for Flour has proved moderate, chiefly confined to the home trade; prices have declined with considerable variableness soon after the date of our last review; since then prices of most grades have declined, fresh ground Sound State excepted, this is scarce and in request for the East and the British Islands and provinces at full prices; but for future delivery there are no buyers at anything like present prices; the major part of the Spring Wheat Flour arriving is unsound and we find our stock of this is increasing, but of Sound it is diminishing daily, and hence we cannot anticipate low prices at a very early day, and not so early in September as we had looked for. To-day the demand for Western and State Flour is less active, and prices of most grades are lower, medium brands the exception—these are not plenty and are salable. The low grades are 5@10c. lower, and Family brands 15@25c. lower, and quite plenty; the sales are 8,000 bbls. at $5 70@$7 60 for Superfine State; $5 25@$7 for Extra State; $6@$10 10 for Fancy do.; $7@$9 for the low grades of Western Extra; $8 75@$10 for Shipping Ohio; $10 10@$12 50 for Trade do., and $11@$15 for St. Louis Family Extras. Southern Flour is unchanged and is quiet; sales of 400 bbls. at $10@$11 25 for common to fair Extra Baltimore and Country, and $11 50@$15 60 for Trade and Family do. Rye Flour is easier and more plenty; sales of 250 bbls. at $5 50@$6 25. Corn Meal is plenty and is unsalable.

GRAIN—In Wheat a fair business has been done at variable prices. Of new Spring again advanced soon after our last, but since then has declined, and closes lower. Common and medium qualities have declined, and have sold slowly; the stock of these is large and prices are quite nominal; the more favorable reports of the weather in Great Britain have added to the depression, and the tendency is strongly downward. At the close New Winter Wheat is more plenty, and with a limited demand prices have declined and are very unsettled. We have had favorable weather reports from the North-West since our last, and our advices in regard to the Spring crop are more favorable than we had reason to expect. To-day (Wednesday) the market is less active, and prices are lower. The inquiry is confined to millers; the sales are 18,000 bush. at $1 12½ for Rejected Spring; $2 for good No. 2 Milwaukee Club; $2 20@$2 30 for No. 1 Milwaukee Club; $2 70@$2 72 for Amber State, and $3 16 for New White Michigan, closing here. Barley is dull and nominal. Barley Malt is steady, with moderate business at $1 40@$1 50. Indian Corn has been in good demand for the home trade, but with liberal arrivals, less favorable news from Europe, and a rapid decline in gold, prices have declined 2 cents ⅌ bush., at which the demand is brisk, and the market steady, the market closing lower. Speculative holders are disposed to realize; sales of 70,000 bush. at 81@82c. for Red Mixed, 84@85c. for Mixed Western, 82@83c. for Choice Mixed Western, and $1 01@$1 03 for White Western.

We quote: Dry Hides—Buenos Ayres, 25 to 27 lb, 21½@22c.; Buenos Ayres, 20 to 23 lb, 20½@21c.; Montevideo, 20 to 22 lb, 19@19½c.; Corrientes, 24½ to 27 lb, 18@19c.; Rio Grande, 20 to 22 lb, 17½@18c.; Orinoco, 21 to 23 lb, 17@17½c.; California, 22 to 25 lb, 18@18½c. gold, usual sel. PROVISIONS—Our Pork market has been fairly active; the trade has been good as usual at this season of the year; the moderate arrivals and steady reduction in the stock have induced more active speculative demand for the future, but buyers have the advantage. To-day the market for Mess was very dull, and prices fell off a trifle, closing steady; we hear of no sales for the future; the sales, cash and regular, are 2,000 bbls. at $31 for Old Mess, and $32 70@$32 75 for New do. In Prime Mess very little has been done; the supply is limited and prices are well maintained. Tierce Beef has been in better demand, but at lower and irregular prices; the stock is moderate. Cut Meats have been in fair demand, but at irregular prices; the supply is larger. Bacon has been in good request for the Southern trade, and is firmer; the stock is very small and prices are uncertain. Lard has been pressed on the market, and with a moderate demand has declined; the stock of Old is reduced, but new City is more plenty, at the close the market is heavy; we quote at 17½@18c. for No. 1; 18½@19c. for City, and 20@20½c. for Steam and Kettle Rendered, and 20½c. for small lots choice.

REMARKS—At Cambridge about 1,300 Northern cattle, and about 700 Eastern at Brighton, with nearly 7,200 Western; the great majority of which are merely grass-fed cattle; consequently the supply of ordinary stock is large. Good cattle are comparatively scarce, and prices as high as last week; but the market thus far has been quite dull on ordinary grades, and there are still many to be disposed of. The real state of trade cannot be expressed this week by mere figures. Good heavy oxen, or any really fat animal, command a good price, while there are so many of the lighter grades that the butchers feel safe in holding back, and as one expressed it, wait till the drovers come to terms. But the drovers pay so high for their stock that they are reluctant to submit to a large discount. But this they have done to some extent, and may be obliged to go even lower to induce the butchers to "clean them out."

The same remarks apply to the sheep market. Both sheep and lambs are poor, and the large number at market gives the butchers the advantage. The best lots sell at last week's prices, while inferior grades are even lower. Most lots are sold at $3 to $3 75 per head for lambs, and 5 to 5½c. per lb. for old sheep. One lot of good
