DR. JOHN BULL'S

COMPOUND

CEDRON BITTERS,

The Latest and Most Important Discovery of the 19th Century

No man's name is more intimately connected with the history of Medical Medicine of the United States, or more favorably known as a pioneer in medical discovery, than that of Dr. JOHN BULL of Louisville, Ky., His inimitable preparation of Sarsaparilla, has long stood at the head of the various components of that valuable drug. His Compound Pectoral of Wild Cherry has become a household word throughout the west and South, and in Worm Lozenges in less than a year after their introduction attained a reputation as wide spread as the continent of North America. But the crowning glory of his life remains to be attained in his latest discovery, or rather combination, for he does not claim to be the discoverer of CEDRON, which is the basis of the Bitters now offered to the public. That honor belongs to the native inhabitants of Central America, on whom its virtues have been known for more than two hundred years. Around with it the Indians bids defiance to the most deadly malaria, and hamless without fear the most venomous serpents. Hills a belief with them that while there is Cedron leaf in the body the Cedron is potent to cure, no matter what the disease may be.

While Dr. Bull is not prepared to endorse this extravagant pretension, he is nevertheless satisfied from a thorough examination of the evidence relating to its virtues, that as a remedy and preventive for all diseases arising from exposure either to changes of weather or climate, or to the miasmatic influence, it stands without a rival, and justly deserves the reputation it has so long in Central America and the West Indies. In

DYSPEPSIA,

And its attendant train of symptoms, it acts more like a charm than a medicine. There is nothing in the range of the Materia Medica, that can for a moment bear a comparison with it in this disease.

A full account of this wonderful plant may be found in the 11th edition of the U. S. Dispensatory, pages 1387 and 1388.

A series of experiments in which Dr. Bull has been for years engaged, has just been brought to a successful termination, and he is now enabled to offer to the public a combination of Cedron with other approved tonics, the whole preserved in the best quality of copper distilled bourbon whiskey, which he is confident has no equal in the world.

He might furnish a volume of certificates, but the public have long since learned to estimate such things at their true value. The safest plan is for every one to test for himself the virtues of a new medicine. Give the

CEDRON BITTERS

One trial and you will never use any others.

It is not necessary to publish a long list of diseases for which the Cedron Bitters are a specific. In all diseases of the Stomach, Bowels, Liver or Kidneys;

In all affections of the Brain depending upon Derangement of the Stomach or Bowels;

In Gout, Rheumatism and Neuralgia;

Had in Fever and ague, it is destined to supercede all other remedies. It not only cures these diseases but it prevents them.

A wine glass full of the Bitters taken an hour before each meal will counteract the ill effects of the most unhealthy climate, and screen the person taking it against disease under the most trying exposure.

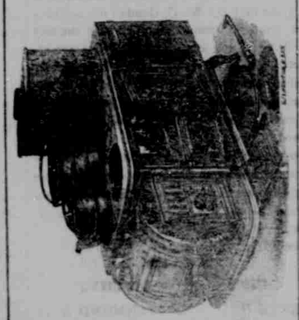
First Premium Cook Stove

This Stove took the first premium at the New York State Fair held at Rochester, Oct, 1st., 1862, and again at Utica, Sept. 15th 1863.

Economy is Wealth.

This maxim will be fully demonstrated by buying an

American Hot Air



COOKING STOVE.

As it will bake, broil and roast better than any other stove, with a saving of 25 per cent. in fuel, and a very large percentage in convenience. They have the following advantages.

1st. They are constructed with a view of great durability, all the plates directly exposed to the fire are made double with air passages between; this not only makes the stove very durable, but prevents any danger of cracking from the heat; this is a recent and valuable improvement.

2d. The flues are lined with non-conducting cement, thereby applying the heat directly to the oven, and the oven can be heated and kept in baking order with less fuel than any other stove.

3d. They have a hot air draft, which not only makes the fuel burn freely, and last longer, but adds to the heating and baking facilities.

4th. They consume all the gas from the fuel, thereby adding largely to the amount of heat obtained from the quantity of the fuel.

5th. The stove is made, mounted and finished in the most superior manner.—The oven is large and well ventilated.—The Stove is convenient in form, and made for use, to adopt the language of some who have used this Stove, "it will do more work with less fuel than any other Stove."

For description, pamphlets of the above and references to them now using them in this city, call at Scott & Valentine's, 144 & 146 Main street.

We warrant every Cook Stove we sell against fire cracks, and to do perfect work
