THURSDAY, Jan. 9—P. M.

Gold is lower, and closes at 136¼. The extremes of the day have been 137¼@136⅛. The clearings of the Gold Exchange Bank were $79,940,000, and the balance $2,256,297. The exports per Deutchland were $248,000.

All the issues of Government stocks were strong, except the 5-20s of 1862. Missouri bonds are lower, and sold at 100⅛. Bank shares are firm, and all offered are readily taken. The extreme advance of last night in Railway shares was not sustained under free sales to realize profits. At the decline there were strong buyers, and the dealings large. The temper of the street is "bullish." Express stocks are not in favor, and no large amounts could be sold at quotations. It is stated that the trunk roads from New-York intend to resume possession of the business done by "dispatch lines," and to make the express companies pay much larger prices for transportation than heretofore. A business which pays so largely on $35,000,000 of express stocks cannot be too soon recovered for the benefit of railway shareholders. Throughout the day the market was feverish, and the only noticeable feature was that each reaction in prices was availed of to put up stocks by good houses. Cleveland and Toledo was sold at 102. Milwaukee and St. Paul stocks were firm, and sold at 49½ for the Common, and 65½ for Preferred. After the Call the market was barely sustained, but at the Second Board a strong disposition to buy was shown, and quotations were advanced upon the whole active list. New-York Central and Hudson River were specially strong, and 122⅞ was paid readily after the Second Board adjourned, and 140 for Hudson River. At the close the market reacted a fraction, but closed strong and active at quotations, with small amounts of stock offering.

Money continues easy on call at from 5 to 7 per cent. In commercial bills no change. Best sell at 7@8½, and second grade at 9@12 per cent. The Treasury keeps its balances with the National banks closely drawn down, and leaves so little with them that the advantage of being a deposit bank is nominal. The currency balance in the Sub-Treasury is small, and the Department is probably working from day to day upon the credit of balances to the credit of disbursing officers.

Exchange is dull at the following quotations: Bills at 60 days on London are quoted at 109@109⅛ for commercial; 109⅞@110⅛ for bankers'; do. at short sight, 110⅛@110⅞; Paris at 60 days, 5.18⅞@5.13⅞; do. at short sight, 5.12⅞@5.10; Antwerp, 5.18⅞@5.13⅞; Swiss, 5.18⅞@5.13⅞; Hamburg, 36@36⅛; Amsterdam, 40⅞@41⅛; Frankfort, 40⅞@41⅛; Bremen, 79@79⅛; Prussian thalers, 71⅞@72⅛.

The New-York Stock Exchange has resolved to conduct its business on the first-floor of the building after February 1, and to hold a continuous session throughout the day, instead of meeting as at present, at 10½ a. m. and 2½ p. m. The open Board of Brokers is preparing a large public room, accessible to the public at $25 per annum. What is wanted is a union of the two Stock Boards, and a new room, Neither of the present rooms are adapted to the business, which demands a spacious edifice, capable of accommodating not only brokers but dealers, who have now become accustomed to attend the sittings of the boards.

The following are William Heath & Co.'s last quotations of stocks:

The Rock Island affair is under examination in the Fisk & Belden case, which is of small consequence compared with the proceedings in the case of Rufus Hatch et als. This suit is intended to show whether a foreign corporation can in a night sell five millions of new capital, and, when called to account by its shareholders, flout them, and run off the books of the concern. If such things are to be, the sooner capitalists and money-lenders know it the better, for there is no safety while this question is in doubt. If Messrs. Dow & Tracy, as agents for the Company in the sale of stock, had promptly given the directors, and through them the old stockholders, a statement of their doings, this scandal would not have been created, and they would have been spared a judicial examination, which now cannot be too speedy and searching, extending, if possible, to the private dealings of the whole board of directors. If any of them were "short" upon facts which should have been sacred, it should be known before the annual election occurs. As to spending the money on construction west of Des Moines, that, too, should now come before a stockholders' meeting; for it is stated on competent authority that the President has declared that building the western extension at the present time is inexpedient, or unnecessary. What the stockholders are after now is a report from their servants of their doings, and an opportunity to express an opinion as to the management of their property, which is not now in hands to inspire public confidence.

The following was the day's business at the office of the Assistant Treasurer: Receipts for Customs, $231,000; for Gold Notes, $568,000; total Receipts, $3,531,356 01; total Payments, $3,760,406 48; Balance, $95,642,464 56.

The message of the Governor of Missouri says that the operations of the Treasury for the fiscal year, commencing on the 1st of October, 1865, show a balance in the Treasury at that date, of $3,962,808; receipts from all sources to September 30, 1867, $7,048,006; total, $11,010,814. Disbursements, $10,333,432; balance on October 1, 1867, $677,382; total debt of the State, $23,941,000; annual interest to be provided for, $1,401,480; to which is to be annually added one-fourth of the whole State revenue.
